MS-102시험문제집 & MS-102최신버전 덤프데모문제

지금 같은 세대에 많은 분들이 IT업계에 관심을 가지고 있습니다. 이렇게 인재가 많은 사회에서 IT관련인사들은 아직도 적은 편입니다. 면접 시에도 IT인증 자격증유무를 많이들 봅니다. 때문에 IT자격증이 많은 인기를 누리고 있습니다.이런 살아가기 힘든 사회에서 이런 자격증들 또한 취득하기가 넘 어렵습니다.Microsoft MS-102인증시험 또한 아주 어려운 시험입니다. 많은 분들이 응시하지만 통과하는 분들은 아주 적습니다.

Microsoft MS-102 시험요강:

주제	소개
주제 1	• Manage security and threats by using Microsoft Defender XDR: This topic discusses how to use Microsoft Defender portal to manage security reports and alerts. It also focuses on usage of Microsoft Defender for Office 365 to implement and manage email and collaboration protection. Lastly, it discusses the usage of Microsoft Defender for Endpoint for the implementation and management of endpoint protection.
주제 2	• Implement and manage Microsoft Entra identity and access: In this topic, questions about Microsoft Entra tenant appear. Moreover, it delves into implementation and management of authentication and secure access.
주제 3	• Deploy and manage a Microsoft 365 tenant: Management of roles in Microsoft 365 and management of users and groups are discussion points of this topic. It also focuses on implementing and managing a Microsoft 365 tenant.

- Manage compliance by using Microsoft Purview: Implementation of Microsoft Purview information protection and data lifecycle management is discussed in this topic. Moreover, questions about implementing Microsoft Purview data loss prevention (DLP) also appear.

최신 Microsoft 365 Certified MS-102 무료샘플문제 (Q356-Q361):

질문 # 356

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an on-premises Active Directory domain named contoso.com. The domain contains the users shown in the following table.

□ The domain syncs to an Azure AD tenant named contoso.com as shown in the exhibit. (Click the Exhibit tab.)

□ User2 fails to authenticate to Azure AD when signing in as user2@fabrikam.com.

You need to ensure that User2 can access the resources in Azure AD.

Solution: From the on-premises Active Directory domain, you set the UPN suffix for User2 to @contoso.com.

You instruct User2 to sign in as user2@contoso.com.

Does this meet the goal?

- A. No
- B. Yes

정답: B

설명:

The on-premises Active Directory domain is named contoso.com. You can enable users to sign on using a different UPN (different domain), by adding the domain to Microsoft 365 as a custom domain. Alternatively, you can configure the user account to use the existing domain (contoso.com).

질문 # 357

You have a Microsoft 365 E5 tenant that contains the users shown in the following table.

□ You perform the following actions:

* Provision the private store in Microsoft Store for Business.

* Add an app named App1 to the private store.

* Set Private store availability for App1 to Specific groups, and then select Group3.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

□

질문 # 358

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an on-premises Active Directory domain named contoso.com. The domain contains the users shown in the

following table.

☐ The domain syncs to an Azure AD tenant named contoso.com as shown in the exhibit. (Click the Exhibit tab.)

☐ User2 fails to authenticate to Azure AD when signing in as user2@fabrikam.com.

You need to ensure that User2 can access the resources in Azure AD.

Solution: From the Microsoft Entra admin center, you assign User2 the Security Reader role. You instruct User2 to sign in as user2@contoso.com.

Does this meet the goal?

- A. No
- B. Yes

정답: A

설명:

This is not a permissions issue so you do not need to assign the Security Reader role.

The on-premises Active Directory domain is named contoso.com. User2 could sign on as user2@contoso.com but you would first need to change the UPN of User2 to user2@contoso.com.

질문 # 359

HOTSPOT

Your network contains an on-premises Active Directory domain and a Microsoft 365 subscription.

The domain contains the users shown in the following table.

☐ The domain contains the groups shown in the following table.

☐ You are deploying Azure AD Connect.

You configure Domain and OU filtering as shown in the following exhibit.

☐ You configure Filter users and devices as shown in the following exhibit.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

정답:

설명:

☐ Explanation:

질문 # 360

You have a Microsoft 365 E5 subscription that contains the users shown in the following table.

☐ You have a Microsoft Office 365 retention label named Retention1 that is published to Exchange email.

You have a Microsoft Exchange Online retention policy that is applied to all mailboxes. The retention policy contains a retention tag named Retention2.

Which users can assign Retention1 and Retention2 to their emails? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

정답:

설명:

☐ Explanation:
