## CWISA-103 Exam Torrent | CWISA-103 Exams Collection

We provide a wide range of learning and preparation methodologies to the customers for the CWISA-103 complete training. After using the CWISA-103 products, success would surely be the fate of customer because, self-evaluation, highlight of the mistakes, time management and sample question answers in comprehensive manner, are all the tools which are combined to provide best possible results. We are also offering 100% money back guarantee to the customers in case they don't achieve passing scores in the CWNP CWISA-103 in the first attempt.

## CWNP Certified Wireless IoT Solutions Administrator(2025 Edition) Sample Questions (Q80-Q85):

### NEW QUESTION # 80

You are planning to outsource the implementation of a new LoRaWAN w of the service provider performing the implementation in all cases?

- A. Ongoing paid support
- B. Ongoing free support
- C. **Effective documentation**
- D. Proof of concept

**Answer: C**

Explanation:

Outsourcing Knowledge Transfer: When outsourcing implementation, the service provider has firsthand knowledge of system setup and configuration. Clear documentation ensures this knowledge remains accessible to you after the project is complete.

Ongoing Support: While paid/free support options influence long-term maintenance, they won't substitute missing documentation about the specific setup.

Reducing Future Vendor Reliance: Detailed documentation helps mitigate over-reliance on the service provider for minor changes and troubleshooting, giving you more long-term autonomy.

Proof of Concept: A POC typically happens before outsourcing, and focuses on validating the solution's feasibility, not ensuring smooth knowledge transfer thereafter.

### NEW QUESTION # 81

You are performing an implementation for a cloud-based wireless solution. How is connectivity to the cloud established? (Choose the single best answer.)

- A. Through BLE Layer 2 connections that do not use IP
- B. Through the use of IPX/SPX routers
- C. Through cellular Internet connections only
- D. Through any Layer 3 network connected to the Internet

#### Answer: D

Explanation:

\* Cloud Connectivity Relies on IP: Most cloud-based services operate via the internet, which utilizes Internet Protocol (IP) at Layer 3 of the network model.

\* Flexibility: Various Layer 2 technologies (Ethernet, Wi-Fi) can connect to a Layer 3 network that ultimately provides Internet access

\* BLE Exception: Bluetooth Low Energy can have cloud connectivity, but often through gateways and not as a direct Layer 2 connection.

\* Eliminating Incorrect Options: IPX/SPX is an outdated protocol, and cellular is only one possible way to achieve Internet access.

References:

OSI Model: Descriptions of Network Layers, especially Layer 2 (Data Link) and Layer 3 (Network).

Cloud Architecture: Diagrams showing how devices commonly access cloud resources through internet-based infrastructures.

### NEW QUESTION # 82

You are considering the implementation of a lab for testing wireless equipment. What is the primary benefit of such a lab? (Choose the single best answer.)

- A. Provides a safe environment in which to develop practical skills and knowledge of a technology and to test the technology
- B. Provides for testing to determine how much RF exposure you can tolerate
- C. Provides a failover environment for your production systems
- D. Provides a way to repurpose old hardware that is not ready for final removal

#### Answer: A

Explanation:

\* Lab Purpose: Wireless testing labs offer controlled settings to:

\* Skill Development: Hone practical understanding of wireless technologies without impacting production environments.

\* Experimentation: Safely test different configurations, compatibility, and potential issues.

\* Troubleshooting: Isolate problems, test solutions, and understand how equipment behaves in various scenarios.

\* Other Benefits (While not the primary benefit):

\* Learning Environment: Ideal for structured training and exploration.

\* Evaluation: Compare hardware performance before deployment.

References

\* Benefits of IT Labs: Can be extended from wireless to broader IT experimentation and learning.

### NEW QUESTION # 83

What factor severely limits the range of systems operating in the 60GHz band?

- A. Rain Fade
- **B. Oxygen Fade**
- C. Atmospheric Scattering
- D. Solar Radiation

**Answer: B**

Explanation:

\* 60GHz Absorption: The 60GHz band experiences significant signal attenuation due to absorption by oxygen molecules in the atmosphere. This severely restricts the usable range of wireless systems operating in this frequency.

\* Why Other Options Don't Apply:

\* Atmospheric Scattering: Impacts longer wavelength transmissions, less significant at 60GHz.

\* Solar Radiation: Can cause interference on some frequencies, but not a primary range limitation at 60GHz.

\* Rain Fade: Primarily affects higher frequencies (above 10GHz), but its impact is less severe than oxygen absorption at 60GHz.

References:

60GHz Propagation Characteristics: Technical papers discussing oxygen absorption and its influence on range limitations.

Millimeter-wave (mmWave) Communication: Overviews highlighting the challenges and short-range applications of 60GHz systems.

**NEW QUESTION # 84**

What provides the security (encryption) in an HTTPS connection?

- A. IPSec
- B. SNMPv3
- **C. SSL/TLS**
- D. SSH

**Answer: C**

Explanation:

\* SSL/TLS Secures Web Traffic: HTTPS builds upon HTTP, adding the encryption provided by Secure Sockets Layer (SSL) or its successor, Transport Layer Security (TLS).

\* Other Protocols Have Different Purposes:

\* IPSec: Secures IP traffic at a network level, can be used alongside TLS.

\* SNMPv3: Management protocol, offers security features, but not the primary mechanism in HTTPS.

\* SSH: Secure remote shell, unrelated to web data encryption.

References:

TLS (and SSL): Explanations of their role in HTTPS and how they provide encryption for web communication.

HTTPS Overview: Materials showing how TLS fits into the overall HTTPS architecture.
