## Use PK0-005 Exam Questions [2026]-Best Preparation Material

Our product boosts three versions which include PDF version, PC version and APP online version. The CompTIA Project+ Certification Exam test guide is highly efficient and the forms of the answers and questions are the same. Different version boosts their own feature and using method, and the client can choose the most convenient method. For example, PDF format of PK0-005 guide torrent is printable and boosts instant access to download. You can learn at any time, and you can update the PK0-005 Exam Questions freely in any day of one year. It provides free PDF demo. You can learn the APP online version of PK0-005 guide torrent in your computer, cellphone, laptop or other set. Every version has their advantages so you can choose the most suitable method of CompTIA Project+ Certification Exam test guide to prepare the exam. Believe us that we can bring you the service of high quality and make you satisfied.

CompTIA Project+ Certification Exam is an excellent way to demonstrate your expertise in project management. CompTIA Project+ Certification Exam certification is recognized by employers worldwide and is a valuable credential that can help you advance your career. Whether you are a seasoned project manager or just starting out in this field, the CompTIA Project+

Certification Exam is an excellent investment in your professional development.

## CompTIA Project+ Certification Exam Sample Questions (Q54-Q59):

### NEW QUESTION # 54

An opportunity emerged in the middle of a project life cycle. Which of the following is the BEST action for the project manager to take?

- A. Exploit the risk.
- B. Avoid the risk.
- C. Accept the risk.
- D. Transfer the risk.

**Answer: A**

Explanation:

The project manager should exploit the risk after an opportunity emerged in the middle of a project life cycle. Exploit is a risk response strategy that aims to increase the probability and/or impact of a positive risk or opportunity. Exploit can involve actions such as allocating more resources, changing the scope or schedule, or adding more features or benefits to the project deliverables. Exploit can help to ensure that the opportunity is realized and that the project gains more value or advantage from it.

### NEW QUESTION # 55

While working with a contractor, the project manager identified a communication conflict. The contractor did not agree that there was an issue. Which of the following should the project manager and contractor review?

- A. Scope of work
- B. Project schedule
- C. Request for proposal
- D. Vendor rules of engagement

**Answer: D**

Explanation:

The project manager and contractor should review the vendor rules of engagement, which are the guidelines and expectations for the communication and interaction between the project team and the contractor. The vendor rules of engagement can help to prevent or resolve communication conflicts by clarifying the roles and responsibilities, the frequency and mode of communication, the escalation process, the feedback mechanism, and the performance evaluation criteria of the contractor. The vendor rules of engagement are usually part of the contract or the procurement management plan.

The vendor rules of engagement are different from the scope of work, which is the document that describes the work to be performed, the deliverables to be provided, and the acceptance criteria to be met by the contractor. The vendor rules of engagement are also different from the request for proposal, which is the document that solicits proposals from potential contractors by specifying the project requirements, evaluation criteria, and contract terms. The vendor rules of engagement are also different from the project schedule, which is the tool that displays the planned start and finish dates, durations, dependencies, and resources of the project activities and tasks. References = CompTIA Project+ Study Guide: Exam PK0-005, 3rd Edition, Chapter 12: Procurement Management1; CompTIA Project+ Certification Study Guide, 3rd Edition, Chapter 12: Procurement Management2; Vendor Rules of Engagement3

### NEW QUESTION # 56

A company is working on a software development project that involves an external customer. Which of the following describes a project manager's responsibility within this type of project?

- A. Define the functional requirements.
- B. Manage the project schedule.
- C. Assess and authorize security policies.
- D. Develop components for the software.

**Answer: B**

Explanation:

In a software development project with an external customer, the project manager (PM) is responsible for coordinating and managing the project-including building, maintaining, and controlling the schedule.

CompTIA Project+ specifically identifies schedule management as a core skill area (e.g., maintaining schedules and related activities), which aligns directly with option A.

The other options describe responsibilities typically owned by other roles or governance functions. Defining functional requirements is usually led by a business analyst and/or product owner/customer stakeholders, with the PM facilitating requirements activities and ensuring traceability and impact awareness-not owning definition outright. Developing software components is a developer/engineer responsibility, not the PM's.

And assessing/authorizing security policies is commonly handled by security/compliance leadership (or a governance authority), while the PM ensures the project aligns with required policies and coordinates related work.

Therefore, the clearest PM responsibility in this scenario is managing the project schedule (along with integrating scope, resources, risks, stakeholders, and communications).

#### NEW QUESTION # 57

Due to multiple changes, the sign-off for the project scope baseline is delayed. The project sponsor has restricted the budget for this project. Which of the following should the project manager MOST likely do to move forward?

- **A. Communicate with the affected stakeholders.**
- B. Adjust the scope to stay within the cost.
- C. Set a new cost using a lightweight estimation method.
- D. Initiate a formal change request to modify the cost

**Answer: A**

#### NEW QUESTION # 58

Which of the following situations would require a project manager to revise the communication plan during a project's execution?

- A. The test results are not as expected
- **B. The team is unclear which meetings they should attend**
- C. A change is approved that impacts the project schedule and budget
- D. A stakeholder requests some changes to the scope

**Answer: B**

Explanation:

If team members are confused about which meetings to attend, this indicates a flaw in the communication plan. Revising the plan ensures clear expectations on who participates in which communication events. Scope or schedule changes don't automatically require altering the communication plan.
