How can we occupy a place in a market where talent is saturated? The answer is a certificate. All kinds of the test certificationS, prove you through all kinds of qualification certificate, it is not hard to find, more and more people are willing to invest time and effort on the CCAAK exam guide, because get the test CCAAK Certification is not an easy thing, so, a lot of people are looking for an efficient learning method. And here, fortunately, you have found the CCAAK exam braindumps, a learning platform that can bring you unexpected experiences.

Confluent CCAAK Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Deployment Architecture: This section of the exam measures skills of a Kafka Administrator and covers different Kafka deployment topologies. It evaluates understanding of high availability, disaster recovery, multi-data center replication, and the roles of Zookeeper or KRaft in the cluster architecture.
Topic 2	<ul style="list-style-type: none">Kafka Connect: This section of the exam measures skills of a Site Reliability Engineer and addresses the use and management of Kafka Connect for data integration. It includes setting up connectors, managing configurations, and ensuring efficient movement of data between Kafka and external systems.
Topic 3	<ul style="list-style-type: none">Apache Kafka® Security: This section of the exam measures skills of a Site Reliability Engineer and focuses on securing Kafka environments. It includes authentication mechanisms such as TLS and SASL, authorization using ACLs, and encrypting data at rest and in transit to ensure secure communication and access control.

Pass Guaranteed 2026 Reliable CCAAK: Valid Test Confluent Certified Administrator for Apache Kafka Tips

In today's society, there are increasingly thousands of people put a priority to acquire certificates to enhance their abilities. With a total new perspective, CCAAK study materials have been designed to serve most of the office workers who aim at getting a CCAAK certification. The CCAAK test guide offer a variety of learning modes for users to choose from, which can be used for multiple clients of computers and mobile phones to study online, as well as to print and print data for offline consolidation. We sincere hope that our CCAAK Exam Questions can live up to your expectation.

Confluent Certified Administrator for Apache Kafka Sample Questions (Q36-Q41):

NEW QUESTION # 36

Which option is a valid Kafka Topic cleanup policy? (Choose two.)

- A. **delete**
- B. cleanup
- C. **compact**
- D. default

Answer: A,C

Explanation:

The delete policy deletes old log segments when they exceed the retention period or size.

The compact policy retains only the latest record for each key, enabling efficient key-based storage.

NEW QUESTION # 37

You want to increase Producer throughput for the messages it sends to your Kafka cluster by tuning the batch size ('batch size') and the time the Producer waits before sending a batch ('linger.ms').

According to best practices, what should you do?

- A. Decrease 'batch.size' and increase 'linger.ms'
- B. Increase 'batch.size' and decrease 'linger.ms'
- C. **Increase 'batch.size' and increase 'linger.ms'**
- D. Decrease 'batch.size' and decrease 'linger.ms'

Answer: C

Explanation:

Increasing batch.size allows the producer to accumulate more messages into a single batch, improving compression and reducing the number of requests sent to the broker.

Increasing linger.ms gives the producer more time to fill up batches before sending them, which improves batching efficiency and throughput.

This combination is a best practice for maximizing throughput, especially when message volume is high or consistent latency is not a strict requirement.

NEW QUESTION # 38

Your Kafka cluster has four brokers. The topic t1 on the cluster has two partitions, and it has a replication factor of three. You create a Consumer Group with four consumers, which subscribes to t1.

In the scenario above, how many Controllers are in the Kafka cluster?

- A. **One**
- B. three
- C. Four
- D. two

Answer: A

Explanation:

In a Kafka cluster, only one broker acts as the Controller at any given time. The Controller is responsible for managing cluster metadata, such as partition leadership and broker status. Even if the cluster has multiple brokers (in this case, four), only one is elected as the Controller, and others serve as regular brokers. If the current Controller fails, another broker is automatically elected to take its place.

NEW QUESTION # 39

If a broker's JVM garbage collection takes too long, what can occur?

- A. **ZooKeeper believes the broker to be dead.**
- B. Log files written to disk are loaded into the page cache.
- C. There will be a trigger of the broker's log cleaner thread.

- D. There is backpressure to, and pausing of, Kafka clients.

Answer: A

Explanation:

If the broker's JVM garbage collection (GC) pause is too long, it may fail to send heartbeats to ZooKeeper within the expected interval. As a result, ZooKeeper considers the broker dead, and the broker may be removed from the cluster, triggering leader elections and partition reassessments.

NEW QUESTION # 40

Which secure communication is supported between the REST proxy and REST clients?

- A. MD5
- **B. TLS (HTTPS)**
- C. Kerberos
- D. SCRAM

Answer: B

NEW QUESTION # 41

.....

Our CCAAK study materials have enough confidence to provide the best CCAAK exam torrent for your study to pass it. With many years work experience, we have fast reaction speed to market change and need. In this way, we have the latest CCAAK guide torrent. You don't worry about that how to keep up with the market trend, just follow us. We can say that our CCAAK Test Questions are the most suitable for examinee to pass the CCAAK exam, you will never regret to buy it.
