Updated DA0-002 Latest Study Guide and Practical DA0-002 Test Vce Free & Correct CompTIA Data+ Exam (2025) Reliable Test Preparation

We know deeply that a reliable DA0-002 exam material is our company's foothold in this competitive market. High accuracy and

high quality are the most important things we always looking for. Compared with the other products in the market, our DA0-002 latest questions grasp of the core knowledge and key point of the real exam, the targeted and efficient CompTIA Data+ Exam (2025) study training dumps guarantee our candidates to pass the test easily. Our DA0-002 Latest Questions is one of the most wonderful reviewing CompTIA Data+ Exam (2025) study training dumps in our industry, so choose us, and together we will make a brighter future.

CompTIA Data+ Exam (2025) Sample Questions (Q87-Q92):

NEW QUESTION # 87

A data analyst is generating a custom report for a Chief Executive Officer's executive meeting. Later, the analyst learns that other custom reports will be required for future executive meetings. Which of the following delivery methods should the analyst use?

- A. Ad hoc
- **B. Recurring**
- C. Self-service
- D. Real-time

Answer: B

Explanation:

This question falls under the Visualization and Reporting domain of DA0-002, which involves selecting appropriate delivery methods for reports. The scenario describes a need for custom reports for future executive meetings, implying a scheduled, repeated delivery.

* Ad hoc (Option A): Ad hoc reports are generated on-demand for one-time use, not suitable for ongoing needs.

* Real-time (Option B): Real-time delivery provides live data updates, which isn't necessary for scheduled executive meetings.

* Recurring (Option C): Recurring delivery involves scheduling reports to be generated and delivered at regular intervals (e.g., weekly or monthly), which fits the need for future executive meetings.

* Self-service (Option D): Self-service allows users to generate reports themselves, but the scenario implies the analyst will create the reports.

The DA0-002 Visualization and Reporting domain includes understanding "the appropriate visualization in the form of a report" with delivery methods, and recurring delivery aligns with scheduled reporting needs.

NEW QUESTION # 88

Which of the following allows a data analyst to send out a spreadsheet containing sensitive information without revealing personal details?

- A. Encrypting the spreadsheet
- B. Using a UUID in the data file
- **C. Redacting all PII**
- D. Adding access controls to the ID column

Answer: C

Explanation:

This question pertains to the Data Governance domain, focusing on data privacy and security. The task is to share a spreadsheet with sensitive information while protecting personal details.

* Using a UUID in the data file (Option A): A UUID (Universally Unique Identifier) can anonymize records, but if other PII (e.g., names) remains, personal details are still exposed.

* Redacting all PII (Option B): Redacting personally identifiable information (PII) removes sensitive details (e.g., names, addresses), ensuring personal information isn't revealed while sharing the spreadsheet.

* Adding access controls to the ID column (Option C): Access controls limit who can view the data, but the question focuses on the spreadsheet content itself, not access.

* Encrypting the spreadsheet (Option D): Encryption protects the file during transmission, but once opened, personal details are still visible unless redacted.

The DA0-002 Data Governance domain includes "data privacy concepts," and redacting PII is the most direct method to protect personal details in a shared spreadsheet.

NEW QUESTION # 89

Which of the following elements is the most important to include in a dashboard for internal technical audiences?

- A. Key performance indicators
- B. Methodology section
- C. Company branding
- D. Dynamic features

Answer: A

Explanation:

This question pertains to the Visualization and Reporting domain, focusing on dashboard design for specific audiences. Internal technical audiences (e.g., data analysts, IT staff) need actionable, data-driven insights.

* Methodology section (Option A): Methodology is important for research reports, not dashboards, especially for technical audiences who prioritize data.

* Dynamic features (Option B): Dynamic features (e.g., interactivity) are useful but not the most critical element for technical audiences.

* Key performance indicators (Option C): KPIs provide critical metrics (e.g., system uptime, error rates) that technical audiences need to monitor and act on, making this the most important element.

* Company branding (Option D): Branding is more relevant for external audiences, not internal technical ones.

The DA0-002 Visualization and Reporting domain emphasizes "translating business requirements to form the appropriate visualization," and KPIs are essential for technical dashboards.

NEW QUESTION # 90

A data analyst learns that a report detailing employee sales is reflecting sales only for the current month. Which of the following is the most likely cause?

- A. An error in SQL code
- B. Connectivity issues
- C. Report refresh failure
- D. Lack of permissions

Answer: A

Explanation:

This question falls under the Data Analysis domain, focusing on troubleshooting issues in data reports. The report should show all employee sales but is limited to the current month, suggesting a data retrieval issue.

* Lack of permissions (Option A): Permissions issues would likely prevent access entirely, not limit data to the current month.

* An error in SQL code (Option B): The report likely uses an SQL query to retrieve data, and an error (e.g., a WHERE clause filtering for the current month) could restrict the data to the current month, making this the most likely cause.

* Report refresh failure (Option C): A refresh failure would result in outdated data, not specifically current-month data.

* Connectivity issues (Option D): Connectivity issues would likely prevent the report from running, not limit it to a specific time frame.

The DA0-002 Data Analysis domain includes "applying the appropriate descriptive statistical methods using SQL queries," and errors in SQL code are a common cause of incorrect data retrieval in reports.

NEW QUESTION # 91

A manager wants to use the information in a recurring report on incomplete timesheets for the prior month to guide employee outreach. Which of the following report types is the best for this task?

- A. Ad hoc
- B. Infographic
- C. Summary
- D. Snapshot

Answer: C

Explanation:

This question is part of the Visualization and Reporting domain, focusing on selecting the appropriate report type for a specific purpose. The manager needs a recurring report on incomplete timesheets to guide outreach, which requires a concise, data-driven report.

* Summary (Option A): A summary report aggregates data (e.g., total incomplete timesheets per employee) and presents it concisely, making it ideal for recurring use to guide decisions like employee outreach.

* Infographic (Option B): Infographics are visual representations for broad audiences, not typically used for recurring, detailed employee outreach tasks.

* Snapshot (Option C): A snapshot report captures data at a specific point in time, but it's not ideal for recurring analysis of trends or aggregates.

* Ad hoc (Option D): Ad hoc reports are one-time, on-demand reports, not suitable for recurring needs.

The DA0-002 Visualization and Reporting domain includes "the appropriate visualization in the form of a report", and a summary report best fits the need for recurring, actionable data.
