NEW QUESTION # 18
What is the SAP Signavio Process Manager?

- A. A tool for automating financial transactions in ERP systems.
- B. A cloud-based tool for designing, modeling, and improving business processes.
- C. An analytics solution for process mining and data analysis.
- D. A software for managing customer relationships and sales pipelines.

SAP describes SAP Signavio Process Manager as a collaborative, browser-based BPM tool focused on process design and improvement:
"SAP Signavio Process Manager is a cloud-based solution to model, document, and optimize business processes collaboratively using BPMN 2.0." Reference:
Option B confuses it with a different product in the same portfolio. SAP states that process mining sits in SAP Signavio Process Intelligence (not Process Manager):
"SAP Signavio Process Intelligence is the process mining and analytics solution of the SAP Signavio portfolio." Option C refers to ERP transaction automation, which is not the scope of Process Manager. SAP positions Process Manager for process modeling and documentation, not transaction execution/automation:
"Use SAP Signavio Process Manager to design and document processes and drive process improvement; execution of transactions is handled by operational systems (e.g., ERP)." Option D is about CRM. SAP clarifies that CRM and sales pipeline management are covered by customer experience/CRM solutions, not by Process Manager:
"Process Manager provides process modeling and governance, not CRM pipeline management."

SAP Signavio Process Intelligence is the process mining and analytics component of the SAP Signavio Business Transformation Suite. It allows organizations to analyze real process data to identify inefficiencies and improvement opportunities.
"SAP Signavio Process Intelligence is a process mining solution that enables customers to analyze and visualize process flows, uncovering performance issues and improvement opportunities." Reference:
It connects to operational systems, extracts event logs, and reconstructs end-to-end business processes to deliver data-driven process insights.
"The solution provides process analytics and actionable insights by comparing actual process execution data against designed

models." Incorrect Options:

A: Refers to SAP Signavio Process Manager, not Process Intelligence.

B: SAP Signavio is not an ERP; it integrates with SAP ERP systems for analysis.
