The Open Group OG0-093 Certification is highly valued in the IT industry and is recognized by organizations around the world. It is an important credential for enterprise architects, IT professionals, and consultants who are involved in the design, development, and implementation of enterprise architecture solutions. Achieving this certification demonstrates a commitment to excellence and a dedication to staying current with the latest industry standards and best practices.

Exam Details

The OG0-093 test includes two sections as it is a combination of the Part 1 (OG0-091) and the Part 2 (OG0-092) exams. Part 1 has 40 multiple-choice questions and lasts for 60 minutes. The passing score is 55%. Part 2 includes 8 complex scenario-based questions and has the time duration of 90 minutes. The pass mark is 60%. Both these tests will cost you \$550. The candidates can take them in English or Simplified Chinese.

To get the TOGAF 9 Certified certification, the students must meet the requirements for each section of the exam. If you miss the minimum requisite score in any of the sections, you have to wait for one month to try it again. Please note that once you have completed the first part and moved to the second one, it will not be possible to come back to the questions in the first part.

The TOGAF 9 certification exam is based on the latest version of the TOGAF framework - TOGAF 9.2. The framework provides a comprehensive approach to enterprise architecture, covering all aspects of the enterprise, including business, data, applications, and technology. The framework also provides a set of tools, techniques, and best practices for developing and implementing enterprise architecture.

OG0-093 Exam Format | Reliable OG0-093: TOGAF 9 Combined Part 1 and Part 2 100% Pass

As for our OG0-093 exam braindump, our company masters the core technology, owns the independent intellectual property rights and strong market competitiveness. What is more, we have never satisfied our current accomplishments. Now, our company is specialized in design, development, manufacturing, marketing and retail of the OG0-093 test question, aimed to provide high quality product, solutions based on customer's needs and perfect service of the OG0-093 Exam braindump. At the same time, we have formed a group of passionate researchers and experts, which is our great motivation of improvement. Every once in a while we will

release the new version study materials. You will enjoy our newest version of the OGO-093 study prep after you have purchased them. Our ability of improvement is stronger than others. New trial might change your life greatly.

The Open Group TOGAF 9 Combined Part 1 and Part 2 Sample Questions (Q136-Q141):

NEW QUESTION # 136

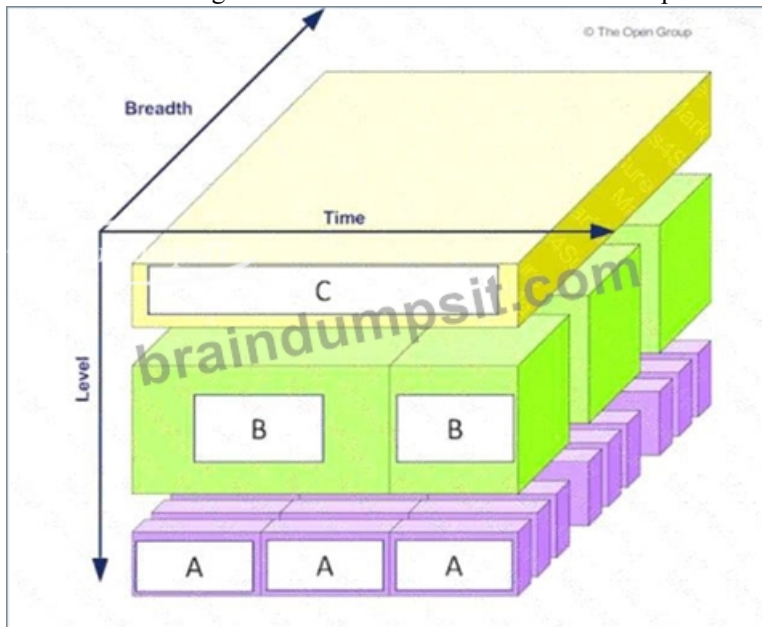

What is used to structure architectural information in an orderly way so that it can be processed to meet stakeholder needs?

- A. A Stakeholder Map
- B. An Architecture Framework
- C. An EA Library
- D. A Content Metamodel

Answer: D

NEW QUESTION # 137

Consider the following classification model for Architecture Landscapes.

What are the items labelled A, B, and C?

- A. A = Corporate Capability, B = Portfolio Capability, C = Project Capability
- B. A = Capability Architecture, B = Segment Architecture, C = Enterprise Strategic Architecture
- C. A = Architecture Vision, B = Business Architecture, C = Architecture Development
- D. A = Operational Architecture, B = Tactical Architecture, C = Strategy Architecture

Answer: B

Explanation:

The correct answer is B .

The diagram represents the TOGAF Architecture Landscape classification model. TOGAF 9.2 divides the Architecture Landscape into three levels of granularity: Strategic Architectures , Segment Architectures , and Capability Architectures . In the diagram, the top layer labelled C represents the broad, long-term enterprise-level view, which corresponds to Strategic Architecture . The middle layer labelled B represents more detailed operating models for areas within the enterprise, which corresponds to Segment Architecture .

The bottom layer labelled A represents the most detailed level, focused on particular units of capability, work packages, projects, or capability increments, which corresponds to Capability Architecture .

Option A is incorrect because TOGAF 9.2 does not classify the Architecture Landscape using "Operational Architecture", "Tactical Architecture", and "Strategy Architecture" as the three official levels.

Option B is correct because it maps the labels properly: A = Capability Architecture , B = Segment Architecture , and C = Enterprise Strategic Architecture . TOGAF 9.2 describes Strategic Architectures as long-term summary views of the entire

enterprise, Segment Architectures as more detailed operating models for areas within the enterprise, and Capability Architectures as more detailed descriptions of how the enterprise supports a particular unit of capability.

Option C is incorrect because "Corporate Capability", "Portfolio Capability", and "Project Capability" are not the official TOGAF 9.2 Architecture Landscape levels.

Option D is incorrect because Architecture Vision, Business Architecture, and Architecture Development refer to ADM-related concepts and phases, not the Architecture Landscape classification levels.

NEW QUESTION # 138

Which section of the TOGAF template for Architecture Principles highlights the requirements for carrying out the principle?

- A. Rationale
- **B. Implications**
- C. Name
- D. Statement

Answer: B

NEW QUESTION # 139

Which one of the following best describes the purpose of the Communications Plan?

- A. To ensure that information is communicated to the right stakeholders at the right time
- **B. To ensure that the results of a Compliance Assessment are distributed to the Architecture Board**
- C. To act as a deliverable container for artifacts created during a project
- D. To inform the Architecture Board of changes to the architecture
- E. To show progression of change from the Baseline Architecture to the Target Architecture

Answer: B

NEW QUESTION # 140

In which part of the ADM cycle do the earliest building block definitions start as abstract entities?

- A. Preliminary Phase
- B. Phases E and F
- C. Phases G and H
- **D. Phase A**
- E. Phases B, C, and D

Answer: D

Explanation:

Section: Part 1
