

# HPE2-W12 Quiz Studying Materials: Selling HPE Aruba Networking Solutions - HPE2-W12 Test Torrent & HPE2-W12 Test Bootcamp

BTW, DOWNLOAD part of DumpsKing HPE2-W12 dumps from Cloud Storage: <https://drive.google.com/open?id=1by23JuY7YbhmYJ3ZkTTHw6dBLcHSGwX2>

You hardly have to worry about whether or not you can pass the exam with our HPE2-W12 exam braindumps. Many users of HPE2-W12 exam prep can use your own achievements to prove to you that under the guidance of our HPE2-W12 Study Materials, you must pass the exam. Don't hesitate anymore. What you should treasure now is time! Just come and buy our HPE2-W12 learning guide, you will never feel regret!

Most of our clients found our HPE2-W12 exam questions and answers amazing. All they learned from DumpsKing is that the HP HPE2-W12 practice test questions were accurately similar to the actual questions they faced on their Selling HPE Aruba Networking Solutions exam. It made them utterly confident to go through the whole process of the Selling HPE Aruba Networking Solutions. Feel free to compare our quality of HP HPE2-W12 Exam Questions dumps with other courses. Nothing can help people pass their HP HPE2-W12 certification exam more than we do. Even people who were on their first time taking HP Target HPE2-W12 certification can pass their Selling HPE Aruba Networking Solutions exam with DumpsKing's help.

## First-grade HPE2-W12 Learning Engine: Selling HPE Aruba Networking Solutions Offer You Amazing Exam Questions - DumpsKing

Nowadays the test HPE2-W12 certificate is more and more important because if you pass it you will improve your abilities and your stocks of knowledge in some certain area and find a good job with high pay. If you buy our HPE2-W12 exam materials you can pass the exam easily and successfully. Our product boosts many advantages and it is worthy for you to buy it. You can have a free download and tryout of our HPE Sales Certified exam torrents before purchasing. After you purchase our product you can download our HPE2-W12 Study Materials immediately. We will send our product by mails in 5-10 minutes. We provide free update and the discounts for the old client.

## HP Selling HPE Aruba Networking Solutions Sample Questions (Q34-Q39):

### NEW QUESTION # 34

What is one value provided by HPE Aruba Networking Cloud Access Security Broker (CASB)?

- A. Accelerating performance for real-time apps across all of a customers' sites.
- B. Replacing a traditional virtual private network (VPN) for remote users with a more secure alternative.
- C. Preventing users from sharing restricted data when using SaaS applications.

- D. Improving quality of experience for branch users running SaaS applications.

**Answer: C**

Explanation:

The correct answer is D because the core value of a Cloud Access Security Broker (CASB) is to provide visibility, compliance, data protection, and threat prevention for SaaS applications. Aruba CASB helps prevent sensitive or restricted data from being uploaded, shared, or leaked through SaaS platforms (e.g., Microsoft 365, Salesforce, Google Workspace). This directly addresses compliance and data loss prevention (DLP) challenges.

Relevant extracts from official HPE Aruba Networking documentation:

\* "CASB solutions secure the use of SaaS applications by enforcing policies that prevent unauthorized sharing of sensitive or restricted data."

\* "Aruba CASB provides inline controls and API-based integrations to detect and block risky SaaS activity."

\* "By preventing data exfiltration and ensuring compliance, CASB closes a major cloud security gap introduced by uncontrolled SaaS adoption."

\* "CASB helps IT maintain visibility into SaaS usage, ensuring data security and compliance across distributed environments." Why the other options are incorrect:

\* A Quality of experience improvements for branch SaaS apps are enabled by SD-WAN optimization, not CASB.

\* B Real-time app acceleration is a WAN optimization and SD-WAN function, not CASB.

\* C Replacing VPNs with secure alternatives is handled by ZTNA (Zero Trust Network Access), not CASB.

References (HPE Aruba Networking Solutions / Study Guides):

## NEW QUESTION # 35

Which outcome could the customer achieve with Network Insights in HPE Aruba Networking Central?

- A. Automatically detect any client connecting to the network and block any client with suspicious behavior.
- B. Detect and profile Internet of Things (IoT) devices connected to the network.
- C. Search for users, endpoints, or locations status; provide a status report; and automatically resolve any issues detected.
- **D. Identify performance issues and follow recommendations for resolving the issue.**

**Answer: D**

Explanation:

The correct answer is D because Aruba Network Insights, a feature of Aruba Central's AI-powered operations (AIOps), focuses on identifying performance issues and providing actionable, prescriptive recommendations to resolve them. This enables IT teams to proactively address network issues before they impact end users, improving operational efficiency and minimizing downtime.

Relevant extracts from official HPE Aruba Networking documentation:

\* "Aruba Central AIOps with Network Insights provides actionable recommendations to resolve network performance issues."

\* "AI/ML-based analytics continuously monitor network health, identifying anomalies and performance degradations."

\* "By offering prescriptive guidance, Central reduces mean time to resolution (MTTR) and empowers IT teams to optimize the network."

\* "Network Insights transforms reactive troubleshooting into proactive operations by identifying issues early and suggesting corrective actions." Why the other options are incorrect:

\* B Blocking suspicious clients is part of ClearPass Policy Manager and Zero Trust enforcement, not Network Insights.

\* C Searching for users and endpoints with automated resolution aligns more with ClearPass and Client Insights, not Network Insights.

\* D IoT profiling is handled by Device Insight, not Network Insights.

References (HPE Aruba Networking Solutions / Study Guides):

\* Aruba Central AIOps and Network Insights - Solution Overview

## NEW QUESTION # 36

A customer needs to deploy IoT more securely. How can HPE Aruba Networking solutions help the customer achieve this

objective?

- A. HPE Aruba Networking is the only vendor to offer IoT-centric security solutions without incorporating partnerships.
- B. HPE Aruba Networking Fabric Composer helps customers build secure tunnels between IoT devices and the data center.
- **C. HPE Aruba Networking Central with AI for networking helps customers discover and monitor all the devices connected to their network.**
- D. HPE Aruba Networking offers agents that can easily be installed on IoT devices to encrypt communications.

**Answer: C**

Explanation:

The correct option is B because HPE Aruba Networking Central, combined with AI-powered insights, provides visibility into all devices on the network, including IoT. This allows customers to discover, classify, and monitor IoT endpoints and enforce security policies. HPE emphasizes that IoT devices are often difficult to secure due to their diversity and lack of built-in protections, so network-based discovery and monitoring is critical.

Relevant extracts from official HPE Aruba Networking materials:

"Aruba Central provides AI-powered visibility that automatically identifies and profiles all devices- including IoT-connected to the network, enabling IT to apply consistent security and segmentation policies."

"IoT devices often lack inherent security; Aruba's approach leverages dynamic segmentation, policy enforcement, and AI-driven monitoring to ensure IoT traffic is visible and secured."

"By using AI-driven Central, organizations can quickly discover rogue, unknown, or misbehaving IoT devices and take automated action to reduce risk." Why the other options are incorrect:

A is inaccurate; HPE Aruba Networking works with an ecosystem of security and IoT partners and does not claim to be the only vendor with IoT-specific security.

C Fabric Composer is a data center automation tool and is not designed to create secure IoT tunnels.

D is incorrect because HPE Aruba Networking does not require agents to be installed on IoT devices, as most IoT endpoints cannot support agents. Instead, Aruba provides agentless discovery and monitoring.

## NEW QUESTION # 37

What is one customer need that HPE Aruba Networking Central addresses?

- **A. Optimizing network performance through actionable AI recommendations.**
- B. Eliminating the need for network admins and letting server admins maintain the network.
- C. Deploying the network and then letting it run without further management and monitoring.
- D. Managing each network silo with tools specialized for that silo's needs.

**Answer: A**

Explanation:

The correct answer is B because Aruba Central addresses the need for continuous optimization and operational efficiency by providing AI-driven recommendations, anomaly detection, and performance insights. These capabilities help network admins proactively manage performance, improve user experience, and reduce troubleshooting overhead.

Relevant extracts from official HPE Aruba Networking documentation:

\* "Aruba Central leverages AI/ML to provide actionable insights and recommendations to optimize network performance."

\* "By continuously monitoring the health of the network and user experience, Aruba Central ensures IT can proactively identify and resolve issues."

\* "AI recommendations empower IT staff to focus on strategic initiatives rather than reactive troubleshooting, enhancing operational efficiency."

\* "Aruba Central transforms operations by consolidating management across LAN, WLAN, and WAN, while improving performance with automated optimization." Why the other options are incorrect:

\* A is incorrect: Aruba Central emphasizes ongoing monitoring, management, and optimization; it is not a "set and forget" solution.

\* C is incorrect: Aruba Central does not eliminate the need for network admins-it enhances their efficiency, not replaces them.

\* D is incorrect: Aruba Central's strength is breaking down silos by unifying management across wired, wireless, and WAN, not managing them separately.

### NEW QUESTION # 38

What is one way that HPE Aruba Networking Central Client Insights helps customers minimize risks?

- A. It enables zero trust security for a remote workforce by replacing the traditional virtual private network (VPN).
- **B. It helps customers implement a ZTNA strategy by applying least-privilege access controls to each device, based on high confidence in device.**
- C. It integrates with HPE Aruba Networking Fabric Composer to automatically configure the correct distributed firewall policies for a particular customer's environment.
- D. It acts as a central repository for security events, logs, metrics, and other information collected by HPE Aruba Networking devices and third-party security solutions.

**Answer: B**

Explanation:

The correct answer is B because HPE Aruba Networking Central Client Insights provides advanced device discovery, profiling, and classification, giving IT high confidence in the identity of each connected endpoint.

This enables enforcement of least-privilege access policies, which are foundational to Zero Trust Network Access (ZTNA).

Relevant extracts from official HPE Aruba Networking documentation:

\* "Aruba Central's Client Insights service leverages AI/ML to automatically discover, classify, and monitor all connected endpoints, including IoT and BYOD, to provide high confidence in device identity."

\* "With Client Insights, IT can implement Zero Trust principles by applying role-based and least-privilege access policies aligned to device type and posture."

\* "Client Insights eliminates blind spots and minimizes risks by ensuring every device is visible and continuously verified, reducing the chance of unauthorized access or lateral movement." Why the other options are incorrect:

\* A Fabric Composer is a data center orchestration tool and does not integrate directly with Client Insights for firewall automation.

\* C describes a SIEM-like function, but Central Client Insights is focused on device discovery and profiling, not acting as a log repository.

\* D Zero Trust for remote access is delivered through Aruba SSE/ZTNA solutions, not Client Insights.

Client Insights applies within the enterprise network to secure connected endpoints.
