The benefit in Obtaining the Advanced-Administrator Exam Certification

- After completing the Salesforce Certified Advanced Administrator certification Candidate becomes a solid, well-rounded Salesforce Certified Advanced Administrator.
- If the Candidate has the desire to move up to a higher-paying position in an organization. This certification will help as always.
- A candidate might have incredible IT skills. Employers that do the hiring need to make decisions based on limited information and as it always. When they view the official Salesforce Certified Advanced Administrator certification, they can be guaranteed that a candidate has achieved a certain level of competence.
- When an organization hiring or promotion an employee, then the decision is made by human resources. Now while Candidate may have an IT background, they do their decisions in a way that takes into record many different factors. One thing is candidates have formal credentials, such as the Salesforce Certified Advanced Administrator.

Salesforce Certified Advanced Administrator Sample Questions (Q76-Q81):

NEW QUESTION # 76

A sales manager wants to edit the opportunities owned by the sales team. The manager does NOT have Edit access to the Opportunity object.

What is a recommended solution?

- **A. Create a permission set for Opportunity Edit and associate it to the user record**
- B. Enable team selling on the Opportunity object to grant Read/Write access
- C. Change the opportunity's organization-wide default settings to Public Read/Write
- D. Redefine the role hierarchy by enabling "grant access using hierarchies"

Answer: A

NEW QUESTION # 77

Cloud Kicks has updated several profiles and created a new app in the sandbox. After testing, everything is working as expected. Which two options should the administrator use to migrate these changes to production from the sandbox?

Choose 2 answers

- **A. Outbound Change Set**
- **B. Inbound Change Set**
- C. Package deployment
- D. Change Data Capture

Answer: A,B

Explanation:

Change sets are tools that allow administrators to move customizations such as fields, page layouts, profiles, permission sets, etc. from one Salesforce org to another. To use change sets, administrators need to establish a deployment connection between a source org (such as a sandbox) and a target org (such as production). Then, administrators can create an outbound change set in the source org that contains the components they want to deploy, and upload it to the target org. In the target org, administrators can view and validate the inbound change set before deploying it to their org. References: <https://help.salesforce.com/s/articleView?id=sf.changesets.htm&type=5>

NEW QUESTION # 78

A user has a profile with read only permissions for the case object. How can the user be granted edit permission for cases? How can the user be granted edit permission for cases?

- A. Create a public group with edit permissions for the case object
- **B. Create a permission set with edit permissions for the case object**
- C. Add the user in a role hierarchy above users with edit permissions on the case object
- D. Creating a sharing rule on the case object with read/write level of access

Answer: B

NEW QUESTION # 79

Universal Containers sells monthly service subscriptions and wants to ensure their Opportunity report accurately represent the amount of money to be received each month.

Which solution an administrator use to meet this requirement?

- **A. Use monthly Opportunity reporting snapshot.**
- B. Use process Builder and Flow to create custom object records
- C. Use product revenue schedules for each revenue period.
- D. Use Opportunity formula fields for each reporting period.

Answer: A

NEW QUESTION # 80

System admin wants to know which delegated admin is actively customizing their organization. What will he use ?

- A. Login History
- B. Delegated Admin Logs
- **C. System Audit Trails**
- D. Debug Log

Answer: C
