## SAP C-TADM-23 Exam | C-TADM-23 Examcollection - Latest updated of Latest C-TADM-23 Braindumps Free

Our Certified Technology Consultant - SAP S/4HANA System Administration test torrent boost 99% passing rate and high hit rate so you can have a high probability to pass the exam. Our C-TADM-23 study torrent is compiled by experts and approved by the experienced professionals. The questions and answers of our C-TADM-23 study tool have simplified the important information and seized the focus and are updated frequently by experts to follow the popular trend in the industry. Because of these wonderful merits the client can pass the C-TADM-23 Exam successfully with high probability.

### SAP Certified Technology Consultant - SAP S/4HANA System Administration Sample Questions (Q74-Q79):

#### NEW QUESTION # 74

When performing a local client copy with transaction SCCLN, in which client is it recommended to start the client copy?

- A. The target client
- B. The source client
- C. A client different from both the source and the target client

Answer: C

#### NEW QUESTION # 75

You configure the Transport Management System (TMS) as part of the installation of an AS ABAP based SAP system. What information can you supply for the first SAP system that uses a specific transport directory? Note: There are 3 correct answers to this question.

- A. The name of the Transport Group
- B. The password of a new user that will be created
- C. The user ID of a new user that will be created
- D. The description of the AS ABAP-based SAP system
- E. The name of the Transport Domain

Answer: D,E

#### NEW QUESTION # 76

What are prerequisites to use the Software Update Manager (SUM) to apply SAP Support Packages to an AS ABAP-based SAP system? Note: There are 3 correct answers to this question.

- A. The SUM archive must have been extracted.
- B. A suitable Stack XML file must exist
- C. The SAP Host Agent must have been configured by SUM
- D. The SUM archive must have been provided to the SAP Host Agent
- E. The latest SAP kernel patch must have been applied to the SAP system

Answer: A,B,C

Explanation:

To use the Software Update Manager (SUM) for applying SAP Support Packages to an AS ABAP-based SAP system, certain prerequisites must be met:

\* B. The SUM archive must have been extracted: Before starting the update process, the SUM tool itself must be available. This involves downloading the SUM archive from the SAP Software Download Center and extracting it on the host where the update will be performed. This step is foundational to ensure that the latest version of SUM, with all its features and improvements, is used for the update process.

\* C. A suitable Stack XML file must exist: The Stack XML file contains information about the components and versions that are to be installed or updated in the system. This file is created using the Maintenance Planner tool on the SAP Support Portal. It ensures

that the SUM tool has a clear roadmap of the specific updates and patches to be applied, tailored to the system's current configuration and future requirements.

\* E. The SAP Host Agent must have been configured by SUM: The SAP Host Agent plays a critical role in the system update process, facilitating communication and operations between the SUM tool and the SAP system components. Configuring the SAP Host Agent to work with SUM is essential for a seamless and automated update process, allowing SUM to perform its tasks efficiently.

Meeting these prerequisites ensures that the SUM tool is ready and properly equipped to handle the complexities of applying SAP Support Packages, leading to a smoother and more predictable update process.

#### NEW QUESTION # 77

Your SAP S/4HANA Server system consists of an ABAP Central Services instance, a Primary Application Server instance, and two Additional Application Server instances.

How many system profile files are evaluated for this SAP system during a complete system start?

- A. 0
- **B. 1**
- C. 2
- D. 3

**Answer: B**

Explanation:

For an SAP S/4HANA Server system consisting of an ABAP Central Services (ASCS) instance, a Primary Application Server (PAS) instance, and two Additional Application Server (AAS) instances, a total of 5 system profile files are evaluated during a complete system start. This includes the START profile for each of the 4 instances (1 ASCS, 1 PAS, and 2 AAS) and 1 DEFAULT or INSTANCE profile that is shared across the system. Each instance reads its own START profile, while the DEFAULT or INSTANCE profile contains parameters that apply to the entire system.

#### NEW QUESTION # 78

You are using a Change and Transport System (CTS) for the transport of native SAP HANA applications. Which tool can you use to create a transport request for these applications in the CTS system?

- **A. Transport Organizer Web UI (in transaction STMS)**
- B. Transport Organizer (in transaction SE09)
- C. Database Assistant (in transaction DB50N)
- D. Transport Organizer (Extended View) (in transaction SE01)

**Answer: A**

#### NEW QUESTION # 79

.....

As the most important element that almost all the candidates will take into consideration, the pass rate of our C-TADM-23 exam questions is high as 98% to 100%, which is unique in the market and no one has made it. And also the exam passing guarantee that makes our C-TADM-23 Study Guide superior in the market. As the best seller, our C-TADM-23 learning braindumps are very popular among the candidates. Many of the loyal customers are introduced by their friends or classmates.
