|---------|---|

## Microsoft 365 Administrator Sample Questions (Q40-Q45):

### NEW QUESTION # 40

You have a Microsoft 365 E5 subscription that contains the users shown in the following table.

| Name  | Member of |
|-------|-----------|
| User1 | Group1    |
| User2 | Group2    |
| User3 | None      |

You create an administrative unit named AU1 that contains the members shown in the following exhibit.

### AU1

#### Members Role assignments

Add users and groups, or select and remove them. The administrators assigned to this unit will manage these users and groups. Adding groups doesn't add users to the unit, it lets the assigned admins manage group settings.

| <input type="checkbox"/> | Group1     | Unavailable for groups | Organization |
| <input type="checkbox"/> | Group2     | Unavailable for groups | AU1          |

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

| Answer Area | Microsoft | Statements                             | Yes                   | No                    |
|-------------|-----------|--|-----------------------|-----------------------|
|             |           | User1 can reset the password of User3. | <input type="radio"/> | <input type="radio"/> |
|             |           | User2 can reset the password of User3. | <input type="radio"/> | <input type="radio"/> |
|             |           | User2 can reset the password of User1. | <input type="radio"/> | <input type="radio"/> |

**Answer:**

**Explanation:**

| Answer Area | Microsoft | Statements                             | Yes                   | No                               |
|-------------|-----------|--|-----------------------|----------------------------------|
|             |           | User1 can reset the password of User3. | <input type="radio"/> | <input checked="" type="radio"/> |
|             |           | User2 can reset the password of User3. | <input type="radio"/> | <input checked="" type="radio"/> |
|             |           | User2 can reset the password of User1. | <input type="radio"/> | <input checked="" type="radio"/> |

**Explanation:**

| Answer Area | Microsoft | Statements                             | Yes                   | No                               |
|-------------|-----------|--|-----------------------|----------------------------------|
|             |           | User1 can reset the password of User3. | <input type="radio"/> | <input checked="" type="radio"/> |
|             |           | User2 can reset the password of User3. | <input type="radio"/> | <input checked="" type="radio"/> |
|             |           | User2 can reset the password of User1. | <input type="radio"/> | <input checked="" type="radio"/> |

#### NEW QUESTION # 41

You have a Microsoft 365 E5 subscription.

Several users have iOS devices.

You plan to enroll the iOS devices in Microsoft Endpoint Manager.

You need to ensure that you can create an iOS/iPadOS enrollment profile in Microsoft Endpoint Manager.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

| Actions   | Answer Area |
|---|-------------|
| From the Microsoft Endpoint Manager admin center, add a device enrollment manager.          |             |
| From the Microsoft Endpoint Manager admin center, download a certificate signing request.   |             |
| Upload an Apple MDM push certificate to Microsoft Endpoint Manager.                         |             |
| Create a certificate from the Apple Push Certificates Portal.                               |             |
| From the Microsoft Endpoint Manager admin center, configure device enrollment restrictions. |             |

**Answer:**

Explanation:

| Actions   | Answer Area   |
|---|---|
| From the Microsoft Endpoint Manager admin center, add a device enrollment manager.          | From the Microsoft Endpoint Manager admin center, download a certificate signing request. |
| From the Microsoft Endpoint Manager admin center, download a certificate signing request.   | Create a certificate from the Apple Push Certificates Portal.                             |
| Upload an Apple MDM push certificate to Microsoft Endpoint Manager.                         | Upload an Apple MDM push certificate to Microsoft Endpoint Manager.                       |
| Create a certificate from the Apple Push Certificates Portal.                               |   |
| From the Microsoft Endpoint Manager admin center, configure device enrollment restrictions. |   |

Explanation:

|   |
|---|
| From the Microsoft Endpoint Manager admin center, download a certificate signing request. |
| Create a certificate from the Apple Push Certificates Portal.                             |
| Upload an Apple MDM push certificate to Microsoft Endpoint Manager.                       |

You need to onboard Device1 and Device2 to Microsoft Defender for Endpoint.

What should you use to onboard each device? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Device1:

Microsoft Endpoint Manager

A local script

Group Policy

Microsoft Endpoint Manager

An app from the Google Play store

Integration with Microsoft Defender for Cloud

Device2:

A local script

A local script

Group Policy

Microsoft Endpoint Manager

An app from the Google Play store

Integration with Microsoft Defender for Cloud

Answer:

Explanation:

**Answer Area** Microsoft

Device1: Microsoft Endpoint Manager  
 A local script  
 Group Policy  
**Microsoft Endpoint Manager**  
 An app from the Google Play store  
 Integration with Microsoft Defender for Cloud

Device2: A local script  
**A local script**  
 Group Policy  
 Microsoft Endpoint Manager  
 An app from the Google Play store  
 Integration with Microsoft Defender for Cloud

Explanation:

**Answer Area**

Device1: Microsoft Endpoint Manager

Device2: A local script

Microsoft

#### NEW QUESTION # 44

You have a hybrid Azure Active Directory (Azure AD) tenant and a Microsoft Endpoint Configuration Manager deployment. You have the devices shown in the following table.

| Name    | Platform   | Configuration   |
|---------|------------|---|
| Device1 | Windows 10 | Hybrid joined to on-premises Active Directory and Azure AD only                               |
| Device2 | Windows 10 | Joined to Azure AD and enrolled in Configuration Manager only                                 |
| Device3 | Windows 10 | Enrolled in Microsoft Endpoint Manager and has the Configuration Manager agent installed only |

You plan to enable co-management.

You need to identify which devices support co-management without requiring the installation of additional software.

Which devices should you identify?

- A. Device1 only
- B. Device1, Device2, and Device3
- C. Device3 only
- D. Device2 only
- E. Device2 and Device3 only

**Answer: E**
