Quiz 2026 UiAAAv1: UiPath Agentic Automation Associate Authoritative Exam Vce Format

With the pass rate reaching 98.65%, our UiAAAv1 training materials have gained popularity in the international market. If you choose us, we can ensure that you can pass the exam in your first attempt. We are pass guarantee and money back guarantee for UiAAAv1 exam dumps. If you fail to pass the exam, we will give you refund. You can try free demo before buying UiAAAv1 Exam Materials, so that you can have deeper understanding of what you are going to buy. Free update for one year is available, the update version for UiAAAv1 exam braindumps will be sent to your email automatically.

UiPath Agentic Automation Associate Sample Questions (Q29-Q34):

NEW QUESTION # 29
Scenario: A Citrix Administrator has enabled an HDX Session printers policy within a Citrix Virtual Apps and Desktops Site. The administrator added a printer to a print server and assigned the printer to all users through a session printer policy. In addition, several local client printers are auto-created within HDX sessions. No other printing policies are configured. How will print jobs be routed when users send print jobs to a printer managed by the print server?

- A. Over the HDX virtual channel, through the endpoint, and then to the print server
- B. Over the HDX virtual channel to the specified printer attached to the print server
- C. Directly from the session Virtual Delivery Agent (VDA) machine to the printer
- D. Directly to the network print server and then to the specified printer

Answer: D

Explanation:

When using session printers from a print server, print jobs are routed directly from the VDA to the network print server, which then forwards them to the physical printer. The HDX virtual channel is only used for client printers, not for print server-based session printers.

NEW QUESTION # 30
By default, what are the settings for browser content redirection and client drive mapping in Citrix Virtual Apps and Desktops?

- A. Browser content redirection: Disabled, Client drive mapping: Enabled
- B. Browser content redirection: Allowed, Client drive mapping: Enabled
- C. Browser content redirection: Disabled, Client drive mapping: Disabled
- D. Browser content redirection: Allowed, Client drive mapping: Disabled

Answer: A

Explanation:
In Citrix Virtual Apps and Desktops, browser content redirection is disabled by default and must be explicitly configured. Client drive mapping is enabled by default, allowing users to access local drives within their sessions unless restricted by policy.

NEW QUESTION # 31
A Citrix Administrator is looking to provide apps and desktops to users. Project requirements dictate that management and maintenance should be minimized for the administrator, while still maintain control of the Virtual Delivery Agent (VDA machines). (Choose three.)

- A. XenServer
- B. Microsoft HyperV
- C. Amazon Web Services
- D. Microsoft Azure
- E. Nutanix Acropolis
- F. Google Cloud Platform

Answer: C,D,F

Explanation:
Using public cloud platforms such as AWS, GCP, or Azure with Citrix Cloud services minimizes infrastructure management and maintenance for the administrator, while still providing control over the VDA machines. The cloud provider handles most of the underlying infrastructure, reducing administrative overhead.

NEW QUESTION # 32
Which components should be defined with the Resource Layer? (Choose three.)

- A. NetScaler Gateway
- B. Personalization settings
- C. Virtual Delivery Agents
- D. Host Connections
- E. Citrix Virtual Apps and Desktop Sites
- F. Citrix Virtual Apps and Desktop Zones
- G. StoreFront Stores
- H. Images

Answer: C,D,H

Explanation:
The Resource Layer in Citrix Virtual Apps and Desktops defines the components that provide compute and application resources to users. This includes Virtual Delivery Agents (VDAs) that deliver apps and desktops, host connections to the underlying hypervisor or cloud, and images that serve as the basis for machine provisioning.

NEW QUESTION # 33
Scenario: A Citrix Administrator previously configured a Citrix Virtual Desktops Site to use evaluation licenses. The administrator then installed valid advanced licenses on the Citrix License Server and confirmed that licenses show correctly in the licensing console. However, a user reports an issue about logging on to the published desktop. The user receives an error message stating that the evaluation license is about to expire. What should the administrator do to fix this issue?

- A. Verify the host name entry in the license file.
- B. Restart the License service.
- C. Change the product edition in Citrix Studio.
- D. Remove the evaluation license.

Answer: C

Explanation:
After installing valid licenses on the License Server, the Site must be configured in Citrix Studio to use the correct product edition (for example, Advanced, Enterprise, or Premium). If it remains set to "evaluation," users will continue to see the expiration warning. Updating the product edition in Studio resolves the issue.

NEW QUESTION # 34
.....

UiPath UiAAAv1 training materials have won great success in the market. Tens of thousands of the candidates are learning on our UiAAAv1 practice engine. First of all, our UiPath UiAAAv1 study dumps cover all related tests about computers. It will be easy for you to find your prepared learning material. If you are suspicious of our UiAAAv1 Exam Questions, you can download the free demo from our official websites.
