CLT-4.0 Exam Reference & CLT-4.0 Latest Practice Questions

MSSC certification is very helpful, especially the CLT-4.0 which is recognized as a valid qualification in this industry. So far, CLT-4.0 free download pdf has been the popular study material many candidates prefer. CLT-4.0 questions & answers can assist you to make a detail study plan with the comprehensive and detail knowledge. Besides, we have money refund policy to ensure your interest in case of your failure in CLT-4.0 Actual Test. Additional, if you have any needs and questions about the MSSC test dump, our 24/7 will always be here to answer you.

MSSC Certified Logistics Technician (CLT) 4.0 Sample Questions (Q48-Q53):

NEW QUESTION # 48

Which of the following is NOT the purpose of JIT?

- A. easily place inventory into stock
- B. respond quickly to changes in demand
- C. produce only the exact number of units needed at a specific time
- D. minimize inventory

Answer: A

Explanation:

JIT is designed to synchronize production with demand, reduce WIP and finished-goods inventory, and eliminate non-value-added activities. Its aims include quick response, minimal buffers, and producing to actual need. "Easily place inventory into stock" implies building inventory and storing it-a practice JIT explicitly seeks to avoid.

NEW QUESTION # 49

During the receiving process, after the materials are staged, all of the following are completed by the material handler EXCEPT

- A. check the materials against the order and Bill of Lading
- B. check quantities
- C. inspect material for damage
- D. perform housekeeping in the staging area

Answer: D

Explanation:

The CLT "Product Receiving" activities outline that after materials are staged, handlers verify shipment accuracy, quantity, and condition against the purchase order and Bill of Lading. Inspection ensures quality control and discrepancy identification. While housekeeping is important for safety, it is not a functional step in the receiving verification process. The purpose of staging is to separate materials by order or destination, allowing organized inspection and documentation. CLT emphasizes accuracy and documentation at this stage, as errors during receiving propagate through the inventory system. Housekeeping tasks occur after receiving completion to maintain workplace order but are not part of the inspection checklist.

NEW QUESTION # 50

Which of the following is the common name for wood containers used to provide a structure that enables material handlers to grasp and move items while providing a degree of protection at the same time?

- A. wire mesh containers

- B. drums
- C. crates
- **D. pallets**

Answer: D

Explanation:

The pallet is the most widely used base platform in logistics, described in the CLT "Product Storage" module as a load-handling unit that provides both structure and protection for materials during handling, storage, and transport. Typically made of wood (though plastic and metal versions exist), pallets allow forklifts and pallet jacks to easily lift and move unitized loads. Their standardized dimensions (such as the 48x40-inch GMA pallet) ensure compatibility with racking systems and automated equipment. Unlike crates, pallets are open-structured, facilitating efficient storage and airflow. The CLT curriculum emphasizes the use of pallets to improve safety, reduce handling time, and protect goods from damage through secure strapping or stretch-wrapping. Proper palletization reduces manual lifting, streamlines workflow, and maintains load stability-critical for warehouse efficiency and safety compliance.

NEW QUESTION # 51

Which of the following governing bodies is responsible for collecting taxes on imported and exported goods?

- A. World Trade Organization
- B. Food and Drug Administration
- **C. U.S. Customs and Border Protection**
- D. U.S. State Department

Answer: C

Explanation:

The U.S. Customs and Border Protection (CBP) collects tariffs, duties, and taxes on imported goods entering the United States. As CLT 4.0 explains, CBP is part of the Department of Homeland Security and manages both trade enforcement and revenue collection functions. Duties and tariffs are assessed based on the Harmonized Tariff Schedule (HTS), which classifies goods according to their type, value, and country of origin. The WTO and State Department guide policy, but only CBP enforces and collects. Understanding CBP's role helps logistics personnel ensure accurate customs declarations and prevent costly penalties for underpayment or misclassification. Tariff collection supports fair trade and protects domestic industries from unfair competition while funding essential government programs.

NEW QUESTION # 52

A system for standardizing and harmonizing the classification and labeling of chemicals is

- A. JIT
- B. LIFO
- **C. GHS**
- D. FIFO

Answer: C

Explanation:

The Globally Harmonized System (GHS) standardizes chemical classification, hazard statements, pictograms, signal words, and Safety Data Sheet (SDS) formats. CLT highlights GHS as the framework used across workplaces and supply chains to ensure consistent hazard communication, enabling safe handling, storage, and transport alignment with OSHA/DOT adoption of GHS elements.

NEW QUESTION # 53

.....

We can provide you with a safety and efficiency shopping experience when you choose ExamsLabs CLT-4.0 test Camp Questions. You see, we use Paypal to do the payment, so the payment process is secured and your personal information is secret and protected. In addition, the payment process is very easy to operate.
