## Valid Deep-Security-Professional Test Topics Pdf - Find Shortcut to Pass Deep-Security-Professional Exam

Many people prefer to buy our Deep-Security-Professional valid study guide materials because they deeply believe that if only they buy them can definitely pass the Deep-Security-Professional test. The reason why they like our Deep-Security-Professional guide questions is that our study materials' quality is very high and the service is wonderful. For years we always devote ourselves to perfecting our Deep-Security-Professional Study Materials and shaping our products into the model products which other companies strive hard to emulate. We boost the leading research team and the top-ranking sale service.

## Trend Micro Certified Professional for Deep Security Sample Questions (Q76-Q81):

### NEW QUESTION # 76

What is the default priority assigned to Firewall rules using the Allow action?

- A. Firewall rules using the Allow action always have a priority of 0.
- B. Firewall rules using the Allow action can be assigned a priority between 0 and 4.
- C. Firewall rules using the Allow action always have a priority of 4.
- D. Firewall rules using the Allow action can be assigned a priority between 1 and 3.

**Answer: B**

Explanation:

Firewall rules in Deep Security can be assigned a priority value between 0 (lowest) and 4 (highest), regardless of whether the action is Allow or Deny. The priority determines the order in which rules are evaluated.

#### NEW QUESTION # 77

Which of the following statements is true regarding Maintenance Mode in the Application Control protection Module?

- A. When enabled, Maintenance Mode rescans the protected computer to rebuild the software inventory. Any new or changed software will be included in this rebuilt inventory.
- **B. When in Maintenance Mode, the Application Control Protection Module will continue to block software identified in Block rules, but will allow new and changed applications to be added to the software inventory.**
- C. While in Maintenance Mode, all Block and Allow rules are ignored while new or updated applications are added to the software inventory
- D. Maintenance Mode can be configured as a Scheduled Event. In this scenario, all software upgrades will be performed at the same time every day to avoid creating Alerts for normal software updates.

**Answer: B**

#### NEW QUESTION # 78

The maximum disk space limit for the Identified Files folder is reached. What is the expected Deep Security Agent behavior in this scenario?

- A. Deep Security Agents will delete any files that have been in the folder for more than 60 days.
- **B. Deep Security Agents will delete the oldest files in this folder until 20% of the allocated space is available.**
- C. Files will no longer be able to be quarantined. Any new files due to be quarantined will be deleted instead.
- D. Any existing files in the folder are compressed and forwarded to Deep Security Manager to free up disk space.

**Answer: B**

Explanation:

If the limit is reached, the oldest files will be deleted first until 20% of allocated space is freed up.

Explanation: Study Guide - page (203)

#### NEW QUESTION # 79

Which of the following statements is true regarding Deep Security Manager-to-database communication?

- A. Deep Security Manager-to-database traffic is encrypted by default but can be disabled by modifying settings in the db.properties file.
- B. Deep Security Manager-to-database traffic is encrypted by default, but can be disabled by modifying settings in the dsm.properties file.
- **C. Deep Security Manager-to-database traffic is not encrypted by default, but can be enabled by modifying settings in the dsm.properties file.**
- D. Deep Security Manager-to-database traffic is not encrypted by default, but can be enabled by modifying settings in the ssl.properties file.

**Answer: C**

#### NEW QUESTION # 80

Based on the Malware Scan Configuration displayed in the exhibit, which of the following statements is false.

- A. Any document files that display suspicious behavior will be submitted and executed in a sandbox environment on a Deep Discover Analyzer device.
- B. Internet access is required to properly enable the features identified in this configuration.
- C. Deep Security Agents will only be able to identify malware in files by using patterns downloaded from the Smart Protection Network.
- D. Deep Security Agents using this Malware Scan Configuration will not monitor for compromised Windows processes.

**Answer: C**

Explanation:

The configuration shown enables Predictive Machine Learning, Process Memory Scan, Document Exploit Protection, and other advanced technologies beyond just pattern-based detection. This means Deep Security Agents will use more than just patterns downloaded from the Smart Protection Network to detect malware.
