Topic 3	<ul style="list-style-type: none"><li>Business AI Solutions Positioning: Covers how to effectively position SAP's Business AI offerings within the SAP Business Suite to support intelligent enterprise goals.</li></ul>

## SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite Sample Questions (Q19-Q24):

### NEW QUESTION # 19

How does SAP AI support sales and marketing automation?

Please choose the correct answer.

Response:

- A. By managing cloud infrastructure
- B. By generating payroll reports
- **C. By providing AI-driven lead scoring and customer insights**
- D. By automating workforce planning

**Answer: C**

### NEW QUESTION # 20

Which SAP AI solution helps optimize supply chain operations?

Please choose the correct answer.

Response:

- A. SAP AI Core
- B. SAP Digital Assistant
- **C. SAP AI for Supply Chain**
- D. SAP Business Workflow

**Answer: C**

### NEW QUESTION # 21

(What are some generative AI capabilities in SAP Build Process Automation? Note: There are 3 correct answers to this question.)

- **A. AI-driven recommendations**
- B. AI-powered conversion of BPMN diagrams into automations
- **C. AI-powered process artifact generation**
- **D. AI-driven generation of test scripts for automations**
- E. AI-driven document information extraction

**Answer: A,C,D**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract: Generative AI capabilities in SAP Build Process Automation include AI-powered generation of process artifacts such as processes, decisions, forms, and script tasks; AI-driven generation of test scripts for automations to accelerate testing; and AI-driven recommendations for optimizing automations and next best actions. These capabilities leverage natural language to generate and edit artifacts, enhancing productivity in process automation.

Exact extracts supporting this:

AI-powered process artifact generation: "You can use generative AI in SAP Build Process Automation to generate a business process, decisions, forms, and script tasks."help.sap.com "You can now use generative artificial intelligence in SAP Build Process Automation to generate and edit business processes, generate business rules, generate forms, and generate script tasks."community.sap.com "The design capabilities leverage generative AI to allow users to interactively generate and edit artifacts from natural language."community.sap.com AI-driven generation of test scripts for automations: "Generate script tasks."community.sap.com (Script tasks include automation scripts, which encompass test scripts in the context of process automation testing.) AI-driven recommendations: "AI-driven recommendations for next best actions."community.sap.com "SAP Build integrates AI capabilities to enhance application development, process automation, and overall business efficiency."community.sap.com Other options are incorrect because:

Option A: While BPMN diagrams are used in process modeling (e.g., in SAP Signavio), there is no specific generative AI-powered conversion to automations mentioned in SAP Build Process Automation; generation starts from natural language descriptions.

Option C: AI-driven document information extraction is an AI capability in SAP Build Process Automation, but it relies on machine learning for extraction rather than generative AI for creating new artifacts.

Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: Based on SAP

Help Portal documentation for "Generative AI - SAP Build Process Automation" and community blogs like "SAP Build Brings Generative AI to Process Automation." These position generative AI in SAP Build as a tool for artifact generation and recommendations within the SAP Business Suite, as covered in SAP Learning journeys for enterprise automation and the C\_BCBAI\_2502 certification for custom AI in business processes.

#### NEW QUESTION # 22

Which SAP AI solutions help businesses create personalized marketing campaigns?

There are 3 correct answers to this question.

Response:

- A. SAP Business Warehouse
- B. SAP Blockchain for Business
- C. SAP Conversational AI
- D. SAP Predictive Analytics
- E. SAP AI for Marketing (SAP Customer Experience)

Answer: C,D,E

#### NEW QUESTION # 23

How does SAP AI improve financial forecasting and reporting?

There are 3 correct answers to this question.

Response:

- A. SAP Blockchain for invoice validation
- B. AI-powered predictive analytics for financial trends
- C. AI-based anomaly detection in financial transactions
- D. Conversational AI for customer service automation
- E. Automated financial risk assessment

Answer: B,C,E

#### NEW QUESTION # 24

.....
