ISO-IEC-27001-Foundation Real Sheets: Unparalleled ISO/IEC 27001 (2022) Foundation Exam - Free PDF Quiz 2026 ISO-IEC-27001-Foundation

If you want to pass the exam smoothly buying our ISO/IEC 27001 (2022) Foundation Exam guide dump is your ideal choice. They

can help you learn efficiently, save your time and energy and let you master the useful information. Our passing rate of ISO-IEC-27001-Foundation study tool is very high and you needn't worry that you have spent money and energy on them but you gain nothing. We provide the great service after you purchase our ISO-IEC-27001-Foundation cram training materials and you can contact our customer service at any time during one day. It is a pity if you don't buy our ISO-IEC-27001-Foundation study tool to prepare for the test APMG-International certification.

APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q41-Q46):

NEW QUESTION # 41

Which statement describes a requirement of an internal audit programme?

- **A. The programme must consider the importance of the target processes**
- B. All processes must be audited within a 3-year cycle
- C. Previous audit results are disregarded to ensure objectivity
- D. The programme must use third party auditors to ensure impartiality

Answer: A

Explanation:

Clause 9.2.2 of ISO/IEC 27001:2022 specifies requirements for the internal audit programme. It requires organizations to: "Plan, establish, implement and maintain an audit programme(s) including the frequency, methods, responsibilities, planning requirements and reporting, which shall take into consideration the importance of the processes concerned, changes affecting the organization, and the results of previous audits." This makes option C correct, since importance of the processes is a required factor. Option A is incorrect because audits do not need third-party auditors; objectivity can be maintained internally if independence is respected. Option B is wrong because previous audit results must be considered, not disregarded. Option D is also incorrect - the standard does not specify a 3-year cycle; frequency depends on risks and needs. Thus, the correct verified answer is C.

NEW QUESTION # 42

To whom are the information security policies required to be communicated, according to the control in Annex A of ISO/IEC 27001?

- A. Employees within the scope of the ISMS
- **B. Relevant personnel and relevant interested parties**
- C. Only staff with accountability for ISMS operation
- D. Top management

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:

Annex A.5.1 (Policies for information security) clearly specifies:

"Information security policy and topic-specific policies should be defined, approved by management, published, communicated to and acknowledged by relevant personnel and relevant interested parties..." This means the communication obligation is not limited to top management (A) or only ISMS staff (B), nor does it stop at employees only (C). Instead, ISO/IEC 27001/27002 mandate a broader scope: all relevant personnel and relevant interested parties must be informed. This ensures both internal stakeholders (employees, contractors, temporary staff) and external interested parties (suppliers, partners, regulators, customers, etc.) receive the right policy communications where applicable. Therefore, the correct and verified answer is D.

NEW QUESTION # 43

Which action must top management take to provide evidence of its commitment to the establishment, operation and improvement of the ISMS?

- A. Producing a risk assessment report
- B. Implementing the actions from internal audits
- C. Communicating feedback from interested parties to the organization
- **D. Ensuring information security objectives are established**

Answer: D

Explanation:

Clause 5.1 (Leadership and Commitment) requires top management to demonstrate leadership by:

* "ensuring the information security policy and the information security objectives are established and are compatible with the strategic direction of the organization;"

* "ensuring the integration of the ISMS requirements into the organization's processes;"

* "ensuring that the resources needed for the ISMS are available;"

Among the options, the one explicitly mandated is ensuring that information security objectives are established. Risk assessments (C) and implementing audit actions (D) are responsibilities of management but not the direct leadership evidence required in Clause 5.1. Communicating interested party feedback (A) is relevant but not specifically cited as leadership evidence. Thus, the verified answer is B.

NEW QUESTION # 44

Who is required to ensure that staff are supported so that they can contribute to the information security management system?

- A. Top management of the organization
- B. ISO/IEC 27001 practitioners within the organization
- C. Management responsible for each area of operation
- D. Auditors who audit each area of operation

Answer: A

Explanation:

Clause 5.1 (Leadership and Commitment) requires that:

"Top management shall demonstrate leadership and commitment with respect to the information security management system by... ensuring that the resources needed for the ISMS are available... and supporting persons to contribute to the effectiveness of the ISMS." This makes it explicit that top management has the responsibility to ensure personnel are supported so they can contribute to the ISMS. Option B (line management) may provide local support, but ultimate accountability rests with top management. Auditors (C) only evaluate compliance, not provide support.

Practitioners (D) help implement, but they don't bear formal responsibility under the standard.

Thus, the verified answer is A: Top management of the organization.

NEW QUESTION # 45

Which action must top management take to provide evidence of its commitment to the establishment, operation and improvement of the ISMS?

- A. Producing a risk assessment report
- B. Implementing the actions from internal audits
- C. Communicating feedback from interested parties to the organization
- D. Ensuring information security objectives are established

Answer: D

Explanation:

Clause 5.1 (Leadership and Commitment) requires top management to demonstrate leadership by:

* "ensuring the information security policy and the information security objectives are established and are compatible with the strategic direction of the organization;"

* "ensuring the integration of the ISMS requirements into the organization's processes;"

* "ensuring that the resources needed for the ISMS are available;"

Among the options, the one explicitly mandated is ensuring that information security objectives are established. Risk assessments (C) and implementing audit actions (D) are responsibilities of management but not the direct leadership evidence required in Clause 5.1. Communicating interested party feedback (A) is relevant but not specifically cited as leadership evidence. Thus, the verified answer is B.
