Pass Guaranteed ISO-IEC-27001-Foundation - Accurate Composite Test ISO/IEC 27001 (2022) Foundation Exam Price

Our ISO-IEC-27001-Foundation prep material target all users and any learners, regardless of their age, gender and education background. We provide 3 versions of our ISO-IEC-27001-Foundation learning prep for the clients to choose based on the consideration that all the users can choose the most suitable version to learn. The 3 versions each support different using method and equipment and the client can use the ISO-IEC-27001-Foundation Exam study materials on the smart phones, laptops or the tablet computers. The clients can choose the version of our ISO-IEC-27001-Foundation exam questions which supports their equipment on their hands to learn.

APMG-International ISO-IEC-27001-Foundation Exam Syllabus Topics:

Topic	Details
Topic 1	• Security Breaches: Security breaches occur when unauthorized access or violations of security protocols are detected or imminent, potentially compromising data or system integrity.
Topic 2	• Data Security: Data security refers to protecting digital information—such as that stored in databases or networks—from destruction, unauthorized access, or malicious attacks, ensuring confidentiality and integrity.
Topic 3	• Self Confidence: Self-confidence is the belief in one's abilities, competence, and value, reflecting a sense of assurance and inner strength.
Topic 4	• Continuous Improvement Process (CI, CIP): A continuous or continual improvement process (CIP or CI) involves ongoing, systematic efforts to enhance products, services, or operational processes to achieve higher efficiency and effectiveness over time.
Topic 5	• Framework Design: Framework design is the process of developing a reusable structural foundation that supports and guides the creation and organization of software systems.
Topic 6	• Information Management (IM): Information management (IM) encompasses the entire lifecycle of information within an organization—from its collection and storage to its distribution, use, and eventual archiving or disposal.

APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q36-Q41):

NEW QUESTION # 36
Which item is required to be included in an information security policy?

- A. A plan for the continual improvement of the information security management system
- B. A framework enabling concerns with the information security policy to be addressed
- C. A Statement of Applicability which defines the necessary controls to be implemented
- D. A commitment to satisfy applicable requirements related to information security

Answer: D

Explanation:
Clause 5.2 (Information security policy) requires that the policy:
* "includes information security objectives (or provides a framework for setting them)"
* "includes a commitment to satisfy applicable requirements related to information security"
* "includes a commitment to continual improvement of the ISMS."
Among the listed options, the exact mandatory requirement is"a commitment to satisfy applicable requirements related to information security". Option B partially reflects Clause 5.2 (commitment to continual improvement), but the wording given in the standard prioritizes the satisfaction of applicable requirements (e.g., legal, regulatory, contractual). Option C is not a policy requirement. Option D (Statement of Applicability) is a separate mandatory document (Clause 6.1.3) and not part of the policy itself.
Thus, the correct answer isA.

NEW QUESTION # 37
To whom does the scope of the Terms and conditions of employment control apply?

- A. All employees, contractors and third-party users
- B. Contractors only
- C. Employees only
- D. Personnel and the organization

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:

Annex A.6.1 (Terms and conditions of employment) states:

"The contractual agreements with employees and contractors shall state their and the organization's responsibilities for information security." This means the control applies not just to employees, but also contractors and, where relevant, third-party users who are subject to contractual obligations with the organization. The goal is to ensure that all parties engaged in work under the organization's control understand their security responsibilities before, during, and after employment or contract engagement.

Options A and B are too narrow, excluding key groups. Option C misrepresents the scope by implying a mutual responsibility but not identifying the individuals covered. The explicit scope includes employees, contractors, and third-party users.

Therefore, the correct answer is D.

NEW QUESTION # 38

Which action must top management take to provide evidence of its commitment to the establishment, operation and improvement of the ISMS?

- A. Ensuring information security objectives are established
- B. Communicating feedback from interested parties to the organization
- C. Producing a risk assessment report
- D. Implementing the actions from internal audits

Answer: A

Explanation:

Clause 5.1 (Leadership and Commitment) requires top management to demonstrate leadership by:

* "ensuring the information security policy and the information security objectives are established and are compatible with the strategic direction of the organization;"

* "ensuring the integration of the ISMS requirements into the organization's processes;"

* "ensuring that the resources needed for the ISMS are available;"

Among the options, the one explicitly mandated is ensuring that information security objectives are established. Risk assessments (C) and implementing audit actions (D) are responsibilities of management but not the direct leadership evidence required in Clause 5.1. Communicating interested party feedback (A) is relevant but not specifically cited as leadership evidence. Thus, the verified answer is B.

NEW QUESTION # 39

Which item is required to be considered when defining the scope and boundaries of the information security management system?

- A. The level of quality to which the ISMS must adhere
- B. The lessons learned from the information security experiences of other organizations
- C. The dependencies between activities performed by the organization
- D. The regular activities necessary to maintain and improve the ISMS

Answer: C

Explanation:

Clause 4.3 (Determining the scope of the ISMS) requires consideration of:

"the external and internal issues referred to in 4.1; the requirements referred to in 4.2; and interfaces and dependencies between activities performed by the organization, and those that are performed by other organizations." This confirms that dependencies between activities are a required factor when defining scope. Options B (quality levels), C (lessons learned), and D (regular activities for improvement) are not scope requirements, though they may be relevant in planning or improvement processes.

Thus, the verified answer is A: Dependencies between activities performed by the organization.

NEW QUESTION # 40

Identify the missing word(s) in the following sentence.

"Information security, cybersecurity and privacy protection - [?]" is the title of ISO/IEC 27005.

- A. Guidelines for information security management systems auditing
- B. Guidance on managing information security risks
- C. Information security controls

- D. Information security management systems - Requirements

Answer: B

Explanation:
Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27005 standards:
ISO/IEC 27005:2022 is titled:
"Information security, cybersecurity and privacy protection - Guidance on managing information security risks." This standard provides structured methodologies for identifying, analyzing, evaluating, and treating risks, in alignment with ISO/IEC 27001's risk management requirements (Clause 6.1.2 and 6.1.3). It supports organizations in implementing the risk management process that underpins an ISMS. Options A and B are titles of other ISO standards (ISO/IEC 27007 for auditing, ISO/IEC 27001 for requirements). Option D refers to ISO/IEC 27002 (controls).
Thus, the correct answer isC: Guidance on managing information security risks.

NEW QUESTION # 41

......

Do you still worry about that you can't find an ideal job and earn low wage? Do you still complaint that your working abilities can't be recognized and you have not been promoted for a long time?
