Preparation Materials for 400-007 Exam

It is important for candidates to start preparing for 400-007 beforehand so that they have enough time to get the right knowledge. As this exam is necessary for obtaining the CCDE certification, the examinees can focus their attention on the materials dedicated to this Cisco Certified Design Expert designation, among which you'll encounter the following resources:

- **CCDE Certification Training Videos**

This video material is ideal for those candidates who prefer interactive training. The candidates can find the videos on the Cisco official site which contain a series of recordings that will help them get the necessary information for obtaining such a high-level certificate. The videos were created by the vendor's senior experts and development team who were open to share their past experiences with the exam-takers. Also, they included valuable information in each video to help the candidates identify the best practices and use them to meet the requirements of businesses. The videos' total duration is of approximately

21 hours and they cover the following topics:

- Understanding the Cloud Computing and Deployment Model fundamentals;
 - Introduction in Workload Portability and understanding how to use hybrid cloud solutions;
 - Overview and understanding the key elements in cloud security;
 - Being exposed to topics such as APIs and scripting management along with network programmability;
 - Introduction to data virtualization and programming;
 - How to manage IOS XE programmability features that are useful for network engineers;
 - Understanding how to provide software-defined access and solving campus network problems;
 - Designing Cisco SD-WAN financial services, healthcare, retail, manufacturing, and viptela drivers, solution architects, and concepts;
 - Working with fundamental notions related to data center network;
 - Being exposed to design approaches and methodologies;
 - Learning about WAN network design fundamentals.
- **CCDE Study Guide (Quick Reference)**

This guide is available on Amazon in different formats. The candidates for the Cisco 400-007 can download it in Kindle format for somewhere about \$72. Also, it can be bought in paperback format for a price that varies between \$65 to \$76. Its author is **Marwan Al-Shawi**. Overall, the book focuses on the main topics that the exam-takers need to demonstrate to obtain the CCDE certification. Some of the areas that the candidates will find in such a resource are the following:

- Understanding the requirements related to network design and discovering the most effective design as well as analysis principles that can be implemented in an organization.
- Grasping how to work with Layer 2 and 3 design concepts as well as getting exposed to enterprise edge and campus architecture design.
- Managing service provider architecture and network design.
- Learning more about Data Center Network Design.
- Understanding how other network services and technologies work and contribute to business process improvement.

More so, this book is an effective tool to clarify all the questions that the candidates might have after the instructor-led or online classes. In all, it is a helpful tool to check the exam-taker's preparedness level and understand which topics they should focus on. Each of the above-mentioned chapters, in particular, is centered on presenting different technologies and protocols related to networking. It also highlights and compares the advantages and disadvantages of several design options and provides flexibility, scalability, and availability which will help in simplifying job roles and making the employees more productive.

Cisco Certified Design Expert (CCDE) Written Exam Sample Questions (Q64-Q69):

NEW QUESTION # 64

As part of workspace digitization, a large enterprise has migrated all their users to Desktop as a Service (DaaS), by hosting the backend system in their on-premises data center. Some of the branches have started to experience disconnections to the DaaS at periodic intervals, however, local users in the data center and head office do not experience this behavior.

Which technology can be used to mitigate this issue?

- **A. WRED**
- B. traffic shaping
- C. traffic policing
- D. tail drop

Answer: A

NEW QUESTION # 65

Company XYZ allows employees to use any open desk and plug their laptops in. They want authentication using domain credentials and future capability for segmentation within the same subnet. Which protocol can be recommended?

- A. LDAP
- B. RADIUS
- **C. EAP**
- D. TACACS+

Answer: C

Explanation:

* B (EAP - Extensible Authentication Protocol): EAP is commonly used for 802.1X port-based authentication, allowing identity-based control for users on the network. This enables policy enforcement, identity-based segmentation (micro/macro segmentation), and leverages existing domain credentials via backend integration.

Other options explained:

* A: LDAP is backend directory, not an authentication protocol for access ports.

* C: TACACS+ is used primarily for administrative access.

* D: RADIUS transports the EAP exchange but is not the authentication protocol itself.

NEW QUESTION # 66

Company XYZ wants to use the FCAPS ISO standard for network management design. The focus of the design should be to monitor and keep track of any performance issues by continuously collecting and analyzing statistical information to monitor, correct, and optimize any reduced responsiveness across the network. Which layer accomplishes this design requirement?

- A. accounting management
- **B. performance management**
- C. security management
- D. fault management

Answer: B

NEW QUESTION # 67

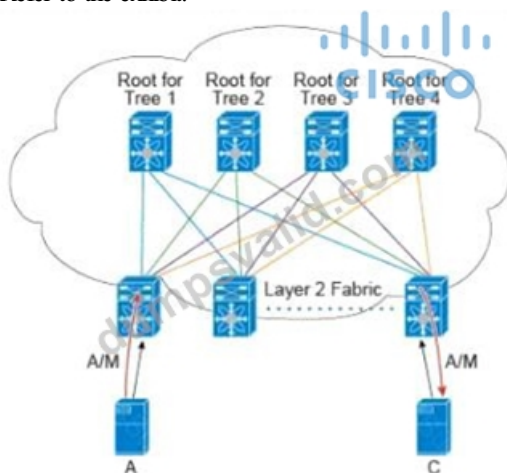

In large-scale networks controllers need to be able to process millions of flows per second without compromising the quality of the service. What are two actions that must be implemented to address scaling limitations when deploying the network*? (Choose two.)

- **A. Delegate work to the forwarding devices to reduce control plane overhead**
- B. Deploy authoritative switches to reduce the amount of controller workloads.
- **C. Split the control logic functions between specialized data plane devices and controllers**
- D. Deploy high performance controllers to increase the performance of the data plane
- E. Deploy a high-throughput application platform

Answer: A,C

NEW QUESTION # 68

Refer to the exhibit.

There are multiple trees in the Cisco FabricPath. All switches in the Layer 2 fabric share the same view of each tree. Which two concepts describe how the multicast traffic is load-balanced across this topology? (Choose two.)

- A. The multicast traffic is generally load-balanced across all trees
- B. A specific (S,G) traffic is not load-balanced

- C. Every leaf node assigns the specific (S,G) to the same tree.
- D. A specific (S,G) multicast traffic is load-balanced across all trees due to better link utilization efficiency.
- E. All trees are utilized at the same level of the traffic rate

Answer: D,E

NEW QUESTION # 69
