最有效的最新CIS-HAM試題，提前為Certified Implementation Specialist - Hardware Asset Management CIS-HAM考試做好準備

在這個都把時間看得如此寶貴的社會裏，選擇NewDumps來幫助你通過ServiceNow CIS-HAM 認證考試是划算的。如果你選擇了NewDumps，我們承諾我們將盡力幫助你通過考試，並且還會為你提供一年的免費更新服務。如果你考試失敗，我們會全額退款給你。

最新的 CIS-Hardware Asset Management CIS-HAM 免費考試真題 (Q10-Q15):

問題 #10

Normalization status is the level of normalization match based on what characteristics? (Choose three.)

- A. Manufacturer
- B. Model number
- C. Model name
- D. Display name
- E. Model category

答案：A,B,C

解題說明：

According to the Hardware Model Normalization document, normalization status is the level of normalization match based on the characteristics of the hardware model data in the ServiceNow platform and the Content Library, which is a cloud-based service that provides normalized and enriched hardware model data.

The normalization status shows how well the hardware model data matches the Content Library data, and it can be one of the following1:

Fully Normalized: The hardware model data matches the Content Library data completely, indicating a complete and accurate model record.

Partially Normalized: The hardware model data partially matches the Content Library data, indicating a missing or incorrect model field.

Match Not Found: The hardware model data does not match any of the Content Library data, indicating a discrepancy or a gap in the model normalization process.

Not Normalized: The hardware model data has not been compared with the Content Library data yet, indicating a pending or incomplete model normalization process.

The characteristics that are used to determine the normalization status are the following1:

Model name: The name of the hardware product, such as Dell Latitude E7450 or HP ProLiant DL380 Gen10.

Model number: The unique identifier of the hardware product, such as 210-AFZC or 875671-B21.

Manufacturer: The name of the company that produces the hardware product, such as Dell or HP.

Therefore, the correct answers are options A, C, and E, as they are the characteristics that are used to determine the normalization status. Reference:

Hardware Model Normalization

What is Hardware Asset Management?

問題 #11

A given collection of methodologies, assets, and templates within Now Create is referred to as what?

- A. Methodology pack
- B. Project pack
- C. Asset pack
- **D. Success pack**
- E. Now Create pack

答案： D

解題說明：

* Now Create is a solution that provides step-by-step delivery guidance based on real-world experiences and proven leading practices, to perform digital transformations using ServiceNow products12.

* A success pack is a collection of processes and assets that, when executed by qualified ServiceNow practitioners, will deliver successful outcomes for your project13.

* A process is a set of tasks that guides you through the implementation or upgrade of a ServiceNow product or feature1.

* An asset is an input to the methodology and can be product specific leading practice detailed instructions related to the success pack or other product agnostic project templates and accelerators1.

* A success pack can be exported into ServiceNow SPM (and other project execution tools) to accelerate project start-up and provide easy links back to Now Create throughout the project execution1.

* The other options are not correct terms used in Now Create. There is no such thing as a Now Create pack, a project pack, a methodology pack, or an asset pack.

* 1: ServiceNow Create - Now Create

* 2: Project Methodology - Customer Success - ServiceNow

* 3: Now Create: Faster implementations, better outcomes - ServiceNow

問題 #12

Which plugins for asset management functionality are inactive by default? (Choose three.)

- A. Depreciation
- B. My Assets
- **C. Hardware Asset Management**
- D. Expense Line

- E. Procurement
- F. Cost Management

答案： C,E,F

解題說明：

Hardware asset management, Procurement, and Cost management are the plugins which are not active by default in base Servicenow System

問題 #13

What are the main purposes of transfer order line tasks? (Choose two.)

- A. To help track the total number of assets moved from one stockroom to another
- B. To automate reordering of consumables as they are consumed by users
- C. To move transfer order lines from one stage to another
- D. To move transfer orders from one stage to another
- E. To help track service levels and the time frame needed to complete a transfer order

答案： C,E

解題說明：

According to the ServiceNow Product Documentation on Transfer Orders¹, transfer orders are records that define the movement of assets from one stockroom to another¹. They can be used to replenish the stock of assets, fulfill asset requests, or relocate assets¹. According to the ServiceNow Product Documentation on Transfer Order Line Tasks², transfer order line tasks are records that define the actions that need to be performed for each transfer order line². A transfer order line is a record that defines the quantity and model of the assets that are being transferred¹.

The main purposes of transfer order line tasks are²:

To help track service levels and the time frame needed to complete a transfer order: Transfer order line tasks have a due date and a state that indicate the progress and completion of the transfer order line. They also have a priority and an assignment group that determine the urgency and the responsibility of the transfer order line. These fields help users to monitor and manage the service levels and the time frame needed to complete a transfer order.

To move transfer order lines from one stage to another: Transfer order line tasks have a type that defines the action that needs to be performed for the transfer order line, such as pick, pack, ship, or receive. As transfer order line tasks are completed, the transfer order line moves from one stage to another, such as requested, in transit, or received. These stages reflect the status and location of the assets that are being transferred.
