Salesforce Revenue Cloud Consultant Accredited Professional 認定 Revenue-Cloud-Consultant-Accredited-Professional 試験問題 (Q28-Q33):

質問 # 28

A revenue cloud consultant learns salesforce is deploying a new release during the course of the implementation. which two actions should be taken to make sure the implementation is tested against the new release before it deploys to production?

- A. review status salesforce.com to determine refresh cutoff dates for the new release
- B. The platform ensures that all sandboxes are upgraded all the same time so wait for the upgrade
- C. submit ticket to support when you want your sandbox updated
- D. Determine whether your sandbox is on a preview or non-preview instance

正解: A、D

解説:

Review Salesforce Status: The status.salesforce.com website provides real-time information about the status of Salesforce services, including maintenance windows and release schedules. By checking this site, you can find out when the new release will be available for sandboxes. This information will help you plan your testing activities.

Submit a Sandbox Refresh Request: If your sandbox is not automatically upgraded to the new release, you can request a sandbox refresh through Salesforce Support. This process will update your sandbox to the latest release, allowing you to test your implementation against the most current features and functionality.

質問 # 31

Which topic of discussion comes first in a salesforce CPQ Scoping Session?

- A. Order Management
- B. Products and Bundles
- C. Quote Document and e-signature
- D. Business Process Mapping

正解: D

解説:

In a Salesforce CPQ Scoping Session, the first topic of discussion is typically Business Process Mapping. This involves understanding the current business processes and identifying areas where Salesforce CPQ can provide improvements. It's an essential step in the scoping process as it helps to define the project's scope and identify potential challenges early on. The other topics like Quote Document and e-signature, Order Management, and Products and Bundles are also important but they usually come after the business processes have been mapped and understood.
