

SAP Certified Associate - Managing SAP S/4HANA Cloud Public Edition Projects Actual Test Guide Boosts the Function to Simulate the Exam - Itcertking

P.S. Free 2026 SAP C-S4PM-2504 dumps are available on Google Drive shared by Itcertking: <https://drive.google.com/open?id=1pq43z-fK4sSqOU5RMaOD7Qxv8hsTUFwn>

Printing these C-S4PM-2504 valid questions and reading them in a handy paper format is another feature offered by Itcertking SAP C-S4PM-2504 PDF for test applicants who prefer more conventional reading experience. These incredible features of SAP C-S4PM-2504 PDF Questions help applicants practice for the C-S4PM-2504 exam wherever and whenever they want, according to their timetables.

SAP C-S4PM-2504 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Project Management• Organizational Change Management (OCM): This section of the exam measures the skills of Project Managers and covers the key principles of managing SAP cloud implementation projects, including team coordination, stakeholder communication, and change management. It evaluates the ability to lead project activities, manage expectations, and handle resistance during digital transformation. Emphasis is placed on aligning organizational goals with implementation strategies to ensure effective user adoption and project success.
Topic 2	<ul style="list-style-type: none">• SAP S• 4HANA Cloud Public Edition Implementation: This section of the exam measures the skills of Implementation Consultants and covers the foundational aspects of deploying SAP S• 4HANA Cloud Public Edition in a business environment. It focuses on understanding system architecture, scope definition, and the technical and functional setup required for a successful implementation. The candidate is expected to have a strong grasp of how to execute the necessary configuration and adoption tasks that align with customer-specific requirements.
Topic 3	<ul style="list-style-type: none">• SAP Activate Methodology: This section of the exam measures skills of Business Process Architects and covers the structure and practical application of SAP Activate. It includes understanding the phases of the methodology: Discover, Prepare, Explore, Realize, Deploy, and Run, and the use of supporting tools such as SAP Roadmap Viewer and SAP Best Practices. Candidates are expected to demonstrate the ability to apply this methodology to streamline cloud implementation processes and ensure agile delivery.

C-S4PM-2504 Latest Study Plan & Test C-S4PM-2504 Vce Free

In the era of information, everything around us is changing all the time, so do the C-S4PM-2504 exam. But you don't need to worry it. We take our candidates' future into consideration and pay attention to the development of our C-S4PM-2504 study training materials constantly. Free renewal is provided for you for one year after purchase, so the C-S4PM-2504 Latest Questions won't be outdated. The latest C-S4PM-2504 latest questions will be sent to you email, so please check then, and just feel free to contact with us if you have any problem. Our reliable C-S4PM-2504 exam material will help pass the exam smoothly.

SAP Certified Associate - Managing SAP S/4HANA Cloud Public Edition Projects Sample Questions (Q52-Q57):

NEW QUESTION # 52

Which activities can you complete in the Maintain Business Roles SAP Fiori app?

Note: There are 2 correct answers to this question.

- A. Maintain restrictions
- B. Assign PFCG profiles to a business role
- C. Maintain technical catalogs
- D. Assign business catalogs to a business role

Answer: A,D

NEW QUESTION # 53

When conducting an upgrade of an SAP S/4HANA Cloud, public edition three system landscape, in which phase are the Business Roles updated?

- A. Realize
- B. Explore
- C. Discover
- D. Deploy

Answer: A

Explanation:

Upgrades in SAP S/4HANA Cloud Public Edition's three-system landscape (Sandbox, Test, Production) involve updating configurations, including Business Roles, to align with new features and maintain security.

The phase where these updates occur is critical for ensuring system readiness.

* Option A: DiscoverIncorrect. The Discover phase is for planning and assessing upgrades, not updating configurations like Business Roles. TheSAP S/4HANA Cloud Upgrade Guidestates, "The Discover phase focuses on evaluating upgrade impacts, not updating configurations such as Business Roles."

* Option B: ExploreIncorrect. The Explore phase validates new features and processes, but Business Role updates are performed later. TheSAP Activate Methodology Guidenotes, "Explore phase activities include reviewing new functionality, with Business Role updates occurring in the Realize phase."

* Option C: RealizeCorrect. Business Roles are updated in the Realize phase to incorporate new app access or restrictions introduced by the upgrade. TheSAP S/4HANA Cloud Security Guideexplains, "During the Realize phase of an SAP S/4HANA Cloud Public Edition upgrade, Business Roles are updated using the Maintain Business Roles app to reflect new features and ensure proper access control."

* Option D: DeployIncorrect. The Deploy phase focuses on go-live and cutover, not configuration updates. TheSAP S/4HANA Cloud Upgrade Guideclarifies, "Deploy phase activities include final testing and system activation, with Business Role updates completed in the Realize phase." Extract from Official Documentation:

* SAP S/4HANA Cloud Security Guide(SAP Help Portal,<https://help.sap.com>): "Business Roles are updated in the Realize phase of an SAP S/4HANA Cloud Public Edition upgradeto incorporate new Fiori apps and access requirements, using the Maintain Business Roles app."

* SAP S/4HANA Cloud Upgrade Guide(SAP Community,<https://community.sap.com>): "In the Realize phase, configuration tasks such as updating Business Roles are performed to align with the new release, ensuring security and functionality are maintained."

Additional Context:

Updating Business Roles in the Realize phase ensures that user access aligns with new features introduced in the semi-annual upgrades, maintaining security and usability. This process, managed through the SAP Fiori Launchpad, is critical for a seamless transition to the upgraded system, aligning with SAP's cloud security model.

:

SAP Help Portal: SAP S/4HANA Cloud Security Guide (<https://help.sap.com>).

SAP Community: SAP S/4HANA Cloud Upgrade Guide (<https://community.sap.com>).

SAP S/4HANA Cloud Study Guide: Details upgrade phases.
SAP Activate Methodology: Outlines configuration updates.

NEW QUESTION # 54

In the SAP Activate prepare phase, the cloud project is set up and officially launched. Which change management activities are usually started in this phase? Note: There are 3 correct answers to this question.

- A. Develop an initial change plan for the cloud project
- B. Conduct a detailed change impact analysis
- C. Identify the key stakeholders and conduct a stakeholder analysis
- D. Facilitate the role mapping process
- E. Develop and align the change network strategy

Answer: A,C,E

Explanation:

The Prepare phase of the SAP Activate methodology is the initial stage of the SAP S/4HANA Cloud Public Edition implementation, where the project is set up, and foundational change management activities are initiated to ensure a smooth transition.

* Option A: Identify the key stakeholders and conduct a stakeholder analysisCorrect. Stakeholder identification and analysis are critical early activities to understand who will be impacted and their roles in the project. TheSAP Activate Methodology Guidestates, "In the Prepare phase, change management begins with identifying key stakeholders and conducting a stakeholder analysis to assess their influence and needs."

* Option B: Conduct a detailed change impact analysisIncorrect. A detailed change impact analysis typically occurs in the Explore phase, once requirements and gaps are identified during Fit-to-Standard workshops. TheSAP OCM Guidenotes, "Change impact analysis is performed in the Explore phase to evaluate the specific impacts of the solution on business processes and users."

* Option C: Develop an initial change plan for the cloud projectCorrect. An initial change plan is created in the Prepare phase to outline the change management approach and activities. TheSAP S/4HANA Cloud OCM Guideexplains, "The Prepare phase includes developing an initial change plan to define the scope, objectives, and activities for organizational change management."

* Option D: Develop and align the change network strategyCorrect. The change network strategy establishes a network of change agents to support adoption. TheSAP Activate Methodology Guide confirms, "In the Prepare phase, the change network strategy is developed to align change agents and champions who will drive the project's success."

* Option E: Facilitate the role mapping processIncorrect. Role mapping, which aligns SAP business roles to employees, typically occurs inthe Explore or Realize phases when business processes are validated. TheSAP S/4HANA Cloud Study Guideclarifies, "Role mapping is conducted post-Prepare phase, once process requirements are clear." Extract from Official Documentation:

* SAP Activate Methodology Guide(SAP Community,<https://community.sap.com>): "The Prepare phase initiates change management by identifying stakeholders, conducting stakeholder analysis, developing an initial change plan, and aligning the change network strategy to support the project."

* SAP S/4HANA Cloud OCM Guide(SAP Help Portal,<https://help.sap.com>): "Key change management activities in the Prepare phase include stakeholder analysis, initial change plan development, and change network strategy alignment to ensure a strong foundation for adoption." Additional Context:

The Prepare phase sets the tone for change management by establishing governance and engaging stakeholders early, ensuring alignment with the project's goals. These activities are foundational to mitigating resistance and fostering adoption in later phases.

:

SAP Help Portal: SAP S/4HANA Cloud OCM Guide (<https://help.sap.com>).

SAP Community: SAP Activate Methodology Guide (<https://community.sap.com>).

SAP S/4HANA Cloud Study Guide: Details Prepare phase activities.

SAP OCM Best Practices: Outlines early change management tasks.

NEW QUESTION # 55

What does the Side-by-Side extensibility option mean?

- A. SAP S/4HANA extensions are context-aware and focused on tight integration.
- B. There are two SAP S/4HANA instances: one for standard code and another for custom developments.
- C. Extend SAP S/4HANA using APIs published on SAP Business Accelerator Hub.
- D. Extending SAP S/4HANA using SAP ABAP Development Workbench.

Answer: C

NEW QUESTION # 56

Which of the following steps are part of the fit-to-standard process? Note: There are 2 correct answers to this question.

- A. Review Best Practices process flow
- B. Enable customers on standard business processes
- C. Design to-be business process models
- D. Document integration requirements

Answer: A,B

Explanation:

The Fit-to-Standard process is a cornerstone of the Explore phase in the SAP Activate methodology for SAP S/4HANA Cloud Public Edition implementations. It focuses on validating customer requirements against SAP Best Practices to minimize customizations and align with the cloud mindset.

* Option A: Enable customers on standard business processes Correct. Enabling customers on standard business processes involves demonstrating and training them on SAP Best Practices during Fit-to-Standard workshops to ensure understanding and adoption. The SAP S/4HANA Cloud Implementation Guide states, "The Fit-to-Standard process includes enabling customers on standard business processes by showcasing SAP Best Practices in the Starter system, fostering alignment with cloud standards."

* Option B: Design to-be business process models Incorrect. Designing to-be process models occurs in the Realize phase when addressing gaps identified during Fit-to-Standard. The SAP Activate Methodology Guide clarifies, "To-be process models are designed in the Realize phase to address delta requirements, while Fit-to-Standard focuses on validating standard processes."

* Option C: Review Best Practices process flow Correct. Reviewing SAP Best Practices process flows, often using BPMN diagrams, is a key step in Fit-to-Standard workshops to compare customer requirements with standard processes. The SAP S/4HANA Cloud Implementation Guide explains, "Fit-to-Standard involves reviewing Best Practices process flows to validate their fit against customer needs, using tools like SAP Signavio Process Navigator."

* Option D: Document integration requirements Incorrect. While integration requirements may be identified during Fit-to-Standard, documenting them is a separate activity, typically handled in SAP Cloud ALM post-workshop. The SAP S/4HANA Cloud Study Guide notes, "Integration requirements are captured and documented after Fit-to-Standard workshops, not as a core step of the process." Extract from Official Documentation:

* SAP S/4HANA Cloud Implementation Guide (SAP Help Portal, <https://help.sap.com>): "The Fit-to-Standard process in the Explore phase includes reviewing SAP Best Practices process flows and enabling customers on standard business processes to ensure alignment with the SAP S/4HANA Cloud solution."

* SAP Activate Methodology Guide (SAP Community, <https://community.sap.com>): "Fit-to-Standard workshops focus on reviewing Best Practices process flows and enabling customers on standard processes, using the Starter system to validate requirements and minimize customizations." Additional Context:

The Fit-to-Standard process embodies the cloud mindset by prioritizing standard SAP Best Practices, reducing the need for customizations. By reviewing process flows and enabling customers, the process ensures stakeholders understand and commit to the standard solution, setting a solid foundation for the Realize phase.

This approach accelerates implementation and aligns with SAP's continuous innovation cycles.

:

SAP Help Portal: SAP S/4HANA Cloud Implementation Guide (<https://help.sap.com>).

SAP Community: SAP Activate Methodology Guide (<https://community.sap.com>).

SAP S/4HANA Cloud Study Guide: Details Fit-to-Standard steps.

SAP Signavio Documentation: Outlines process flow usage.
