### Salesforce Health Cloud Accredited Professional Sample Questions (Q43-Q48):

#### NEW QUESTION # 43

An insurance organization wants to be able to track specialties and sub-specialties related to practitioner to use in provider search. Which would they store these relationships? (Choose three).

- A. Healthcare provider Taxonomy
- B. Care specialty
- C. Care provider facility specialty
- D. Care Taxonomy
- E. Healthcare provider specialty

**Answer: A,B,C**

Explanation:

Reference and details below.

□

#### NEW QUESTION # 44

Prior to go-live for Bloomington Caregivers, a consultant loads the future system users into Salesforce.

Which two permission set licenses should the consultant assign to the users to give them access to Health Cloud?

Choose 2 answers

- A. Health Cloud Standard permission set license
- B. Health Cloud Platform permission set license
- C. Health Cloud Foundation permission set license
- D. Health Cloud permission set license

**Answer: C,D**

Explanation:

When preparing for the go-live of Bloomington Caregivers, it's essential to ensure that system users have the appropriate permissions to access Health Cloud functionalities. Salesforce utilizes permission set licenses to grant users access to specific features beyond their standard user licenses. In this context, two critical permission set licenses should be assigned:

\* Health Cloud Permission Set License:

\* Purpose: This license provides users with access to features delivered in the Health Cloud managed package. It enables functionalities that are integral to Health Cloud but not included in the core Salesforce platform.

Reference: According to Salesforce documentation, "To use Health Cloud users need the Health Cloud permission set license and the Health Cloud Platform permission set license." Salesforce Developers Health Cloud Foundation Permission Set License:

Purpose: This license grants users access to additional Health Cloud platform capabilities, including the Provider Management data model. It's essential for users who require comprehensive access to foundational Health Cloud features.

Reference: Salesforce notes that the Health Cloud Foundation permission set "assigns read access to additional Health Cloud

platform capabilities, including the Provider Network Management data model." Salesforce Developers It's important to note that while the Health Cloud Platform Permission Set License is also crucial for accessing Health Cloud features built directly on the Salesforce platform, it is not listed as an option in the provided question. Therefore, among the given choices, options A and C are the most appropriate to assign to users to ensure they have the necessary access to Health Cloud functionalities.

For a comprehensive understanding and step-by-step guidance on assigning these permission set licenses, please refer to Salesforce's official documentation:

Assign Health Cloud Permission Sets and Permission Set Licenses:

Salesforce Developers

This resource provides detailed instructions on how to view and assign the necessary permission sets and licenses to users, ensuring they have the appropriate access required for their roles within Health Cloud.

#### NEW QUESTION # 45

What is the latest FHIR model aligned to Health Cloud?

- A. V1
- B. V3
- C. V5
- D. V4

**Answer: D**

#### NEW QUESTION # 46

During a design session, the client asks for best practices around when to use DataRaptors vs. Integration Procedures. For which scenario should a consultant advise the client to use a single DataRaptor?

- A. The task requires both a read and write of SObject data.
- B. The action must perform a SendMail task and check for any errors.
- C. The dataset required needs to read two SObjects with a clearly defined relationship.
- D. The dataset requires connecting to an external data source, such as CSV or REST API.

**Answer: C**

Explanation:

DataRaptors are best for extracting, transforming, and loading Salesforce data, especially when handling data from related SObjects.

Single DataRaptor for related SObjects:

Extract:

"Use a DataRaptor Extract when you need to read Salesforce data, such as retrieving fields from multiple related SObjects in a single read." (Source: Omnistudio Standard Guide - DataRaptors) Why not B, C, or D?

SendMail tasks, complex multi-step logic, or external data connections are handled by Integration Procedures, not DataRaptors.

#### NEW QUESTION # 47

Which two preference must a salesforce administrator enable to begin using Intelligent Sales for Medical Devices? (Choose two)

- A. Visit Inventory Management
- B. Lightning Flows
- C. Lightning App builder
- D. Action Plans
- E. Intelligent Sales

**Answer: A,E**

Explanation:

Reference and details below.
