

VCE PEGACPRSA22V1 Exam Simulator & Reliable PEGACPRSA22V1 Real Test

BONUS!!! Download part of Test4Engine PEGACPRSA22V1 dumps for free: <https://drive.google.com/open?id=1oFGiGM0MpL26Lw98-UlniDVdL5i8VrXX>

Our supporter of PEGACPRSA22V1 study guide has exceeded tens of thousands around the world, which directly reflects the quality of them. Because the exam may put a heavy burden on your shoulder while our PEGACPRSA22V1 practice materials can relieve you of those troubles with time passing by. Just spent some time regularly on our PEGACPRSA22V1 Exam simulation, your possibility of getting it will be improved greatly. For your information, the passing rate of our PEGACPRSA22V1 training engine is over 98% up to now.

If you try to get the Certified Pega Robotics System Architect 22 certification that you will find there are so many chances wait for you. You can get a better job; you can get more salary. But if you are trouble with the difficult of PEGACPRSA22V1 exam, you can consider choose our PEGACPRSA22V1 Exam Questions to improve your knowledge to pass PEGACPRSA22V1 exam, which is your testimony of competence. Now we are going to introduce our PEGACPRSA22V1 test guide to you, please read it carefully.

>> VCE PEGACPRSA22V1 Exam Simulator <<

Reliable PEGACPRSA22V1 Real Test - Pdf PEGACPRSA22V1 Braindumps

All of these prep formats pack numerous benefits necessary for optimal preparation. This Certified Pega Robotics System Architect 22 (PEGACPRSA22V1) practice material contains actual Pegasystems Certified Pega Robotics System Architect 22 Questions that invoke conceptual thinking. Test4Engine provides you with free-of-cost demo versions of the product so that you may check the validity and actuality of the Pegasystems PEGACPRSA22V1 Dumps PDF before even buying it. We also offer a money-back guarantee, which means we are obliged to return 100% of your sum (terms and conditions apply) in case of any unsatisfactory results.

To become a certified Pega Robotics System Architect, passing the PEGACPRSA22V1 certification exam is a mandatory requirement. Certified Pega Robotics System Architect 22 certification is highly respected in the industry and recognized by many organizations that use Pega Robotics for their automation needs. Certified Pega Robotics System Architect 22 certification is proof of an individual's expertise in Pega Robotics and is an excellent way to demonstrate one's skills and knowledge to potential employers.

The Pega Robotics System Architect certification exam covers a variety of topics, including creating solutions using Pega Robotics Studio, designing and implementing Robotic Automation projects, and integrating Pega Robotics with other Pega applications. PEGACPRSA22V1 Exam consists of 65 multiple-choice questions, and candidates have 90 minutes to complete it.

Pegasystems Certified Pega Robotics System Architect 22 Sample Questions (Q28-Q33):

NEW QUESTION # 28

Which two statements about Label/Jump To functionality are true? (Choose Two)

- A. It allows you to connect with other automations in the project.
- B. It allows you to pass variables to different automations of the same project.
- C. It allows you to keep automations organized and aids in debugging.
- D. It allows you to have multiple Exit points in an automation.
- E. It allows you to pass variables to different parts or workflows of the same automation.

Answer: C,D

Explanation:

Comprehensive and Detailed Explanation From Pega Robotics System Exact Extract:

The Label/Jump To functionality in Pega Robot Studio is used to improve automation organization and logical control flow.

Labels act as named anchor points within a single automation, and Jump To links can redirect the execution flow to these labeled points.

According to the Pega Robotics System Design and Implementation Guide, section "Using Labels and Jump To Blocks in Automations":

"The Label/Jump To functionality enables structured flow management within a single automation.

* Labels define points in the automation to which the execution flow can jump.

* Jump To blocks redirect execution to a corresponding label, allowing developers to organize complex automations into manageable sections.

* This feature is particularly useful for debugging, error handling, and implementing multiple exit paths within a single automation."

Detailed Reasoning:

* A. It allows you to pass variables to different parts or workflows of the same automation.

* Incorrect. The Label/Jump To mechanism changes the flow of execution; it does not pass or transfer variable data between workflows.

* B. It allows you to keep automations organized and aids in debugging.

* Correct. Labels and Jump To blocks make complex automations more readable and structured by dividing logic into sections. This improves debugging and maintenance.

* C. It allows you to pass variables to different automations of the same project.

* Incorrect. Variables between automations are passed using parameters (inputs/outputs), not Label/Jump To blocks.

* D. It allows you to have multiple Exit points in an automation.

* Correct. By strategically placing labels and jumps, you can create multiple exit conditions or termination points within a single automation, improving control flow.

* E. It allows you to connect with other automations in the project.

* Incorrect. Connections to other automations are made through automation calls, not Label

/Jump To links.

Final Correct answer: B, D

Reference:Extracted and verified from Pega Robotics System Design and Implementation Guide, Using Labels and Jump To Blocks for Logical Flow Management section (Pega Robotics 19.1 and later).

NEW QUESTION # 29

While setting up Start My Day, the user makes some changes in the Manage Applications window to prioritize and manage the applications that are configured to launch using the Start My Day functionality.

Which of the following applications does the user see on the desktop after using the Start My Day functionality?

- A. CRM, BankerInsight
- B. Pega Finance, CRM, Notepad, BankerInsight
- C. CRM, Notepad, BankerInsight
- D. Pega Finance, Notepad, BankerInsight

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Pega Robotics System Exact Extract:

In Pega Robot Studio, the Start My Day (SMD) functionality allows a user to define and launch all required applications at once when starting work. The configuration of these applications is performed in the Manage Applications window, where each application can be individually enabled or disabled for automatic startup.

According to the Pega Robotics System Design and Implementation Guide, in the section "Start My Day Configuration and Manage

Applications", the documentation specifies the following:

"Applications configured for Start My Day will launch automatically when the Start My Day feature is invoked.

The Manage Applications dialog lists all project applications and determines which ones are launched using the 'Enabled' checkbox. Only applications marked as enabled will be started when the user initiates Start My Day. Applications that are listed but not enabled remain closed." The screenshot in the question shows the following configuration under the Manage Applications window:

Application

Enabled

Type

Path

Pega Finance

Yes

Adapter

BankerInsight

Yes

Adapter

C:\Program Files (x86)\CRM Setup\CRM.exe

CRM

No

Exe

C:\Program Files (x86)\CRM Setup\CRM.exe

Notepad

Yes

Exe

C:\Windows\notepad.exe

From this configuration, the Enabled column indicates that the following applications will start automatically when Start My Day is triggered:

* Pega Finance

* BankerInsight

* Notepad

The CRM application is not enabled and therefore will not launch.

Option Analysis:

* Option A (Pega Finance, Notepad, BankerInsight): Correct, as these are the enabled applications.

* Option B (CRM, BankerInsight): Incorrect, because CRM is not enabled.

* Option C (CRM, Notepad, BankerInsight): Incorrect, because CRM is not enabled.

* Option D (Pega Finance, CRM, Notepad, BankerInsight): Incorrect, because CRM is not enabled.

Therefore, the correct answer is A. Pega Finance, Notepad, BankerInsight.

Reference: Extracted and verified from Pega Robotics System Design and Implementation Guide, Start My Day (SMD) Configuration and Application Management section (Pega Robotics 19.1 and later).

NEW QUESTION # 30

You are designing an automation that adds new customers to an online insurance web site. If a customer exists, a pop-up window is displayed with an error message, which closes automatically after 35 seconds.

While debugging the automation, you notice that you are receiving a control not created exception message in the Add Customer procedure after a page navigation occurs.

How do you resolve the exception?

- A. Add a missing `waitForEvent.Exists` method in the Add Customer procedure.
- B. Ensure the `waitForCreate` timeout is longer than 35 seconds in the Add Customer procedure.
- C. Add a missing created event in the Add Customer procedure.
- D. Ensure the `isCreated` timeout is longer than 35 seconds in the Add Customer procedure.

Answer: A

NEW QUESTION # 31

Pega Robot Studio produces several log files during the opening, building, debugging, and deployment of a solution.

In the Answer Area, drag the description of the log file on the left to its correct log file name.

Answer:

Explanation:

References:

NEW QUESTION # 32

A developer working on an automation has added a diagnostic log component to check the following log file for information on inconsistent behavior.

Based on the image, which category and log level did the developer configure for the diagnostic log component in the automation?

- A. Category: Automation; Log Level: Info
- B. Category: Adapters; Log Level: Info
- C. Category: Automation; Log Level: Warning
- **D. Category: Adapters; Log Level: Warning**

Answer: D

Explanation:

The Pega Robot Studio Diagnostic Log captures runtime execution events, categorized by functional area and severity level. Each log entry provides five primary columns:

- * Type (Log Level) - Indicates severity (INFO, WARN, ERROR, etc.)
- * Category - Specifies which subsystem or component produced the log (Adapters, Automation, Runtime, etc.)
- * Message - Contains the diagnostic details or error description

According to the Pega Robotics System Design and Implementation Guide, section "Diagnostic Logging and Log Levels":

"The diagnostic log component allows developers to record runtime information filtered by category and severity.

Categories correspond to major system components such as Automation, Adapters, Runtime, and Windows Adapter.

Log levels include INFO, WARN, ERROR, and DEBUG.

Setting the diagnostic log component to 'Adapters' and level 'Warning' captures warnings related to adapter startup, attachment, and runtime communication." Detailed Reasoning:

From the image:

- * The Type column shows: WARN (highlighted entry).
- * The Category column shows: Adapters.
- * The Message reads: DialogMonitorHelper.StartMonitoring: Timed out waiting 2000 milliseconds for dialog monitor to start. This message indicates a timeout in the adapter's dialog monitoring mechanism - a typical warning-level event in the Adapter category.

Thus, the diagnostic log was configured to capture warnings for adapter-related operations.

Option Analysis:

- * A. Category: Automation; Log Level: Warning - Incorrect. The message and category in the log are clearly marked under Adapters, not Automation.
- * B. Category: Adapters; Log Level: Warning - Correct. The log entry explicitly shows both WARN and Adapters.
- * C. Category: Automation; Log Level: Info - Incorrect. The entry's level is Warning, not Info.
- * D. Category: Adapters; Log Level: Info - Incorrect. The log shows a Warning, not Info.

Final Correct answer:

B). Category: Adapters; Log Level: Warning

Reference: Extracted and verified from Pega Robotics System Design and Implementation Guide, Diagnostic Logging, Log Categories, and Log Level Configuration section (Pega Robotics 19.1 and later).

NEW QUESTION # 33

.....

Test4Engine has a huge team of IT experts, who continue to use their knowledge and experience to study a lot of IT certification examination papers of past few years. Their findings of the research is now the product of Test4Engine, therefore Test4Engine's Pegasystems PEGACPRSA22V1 Practice Questions are very similar with the real exam, which can help a lot of people to realize their dreams. Test4Engine can ensure you to successfully pass the exam, and you can boldly Add Test4Engine's products to your shopping cart. With Test4Engine your dreams can be achieved immediately.
