Itcertkey 1Y0-204 Desktop Practice Exams

The versions of our product include the PDF version, PC version, APP online version. Each version's using method and functions are different and the client can choose the most convenient version to learn our 1Y0-204 exam materials. For example, the PDF version is convenient for you to download and print our 1Y0-204 test questions and is suitable for browsing learning. If you use the PDF version you can print our 1Y0-204 test torrent on the papers and it is convenient for you to take notes. You can learn our 1Y0-204 Test Questions at any time and place. The APP online version is used and designed based on the web browser. Any equipment can be used if only they boost the browser. It boosts the functions to stimulate the exam, provide the time-limited exam and correct the mistakes online. There are no limits for the equipment and the amount of the using persons to learn our 1Y0-204 exam materials. You can decide which version to choose according to your practical situation.

Citrix Virtual Apps and Desktops 7 Administration Sample Questions (Q121-Q126):

NEW QUESTION # 121
When users log on to Citrix Receiver, they are NOT able to see their line-of-business application by default and are frequently calling the help desk to locate the application.
Which phrase can a Citrix Administrator add to the application properties, so that line-of-business application is added to Favorites

and users cannot remove the application from Favorites?

- A. "KEYWORDS: Prefer"
- B. "KEYWORDS: Featured"
- C. "KEYWORDS: Auto"
- D. "KEYWORDS: Mandatory"

Answer: D

NEW QUESTION # 122
When the Local Host Cache (LHC) is enabled, during a Site database outage _____ will reference _____ to broker new sessions. (Choose the correct option to complete the sentence.)

- A. the principal Delivery Controller, its local database
- B. all Delivery Controllers; their local XML file
- C. all Delivery Controllers; their local database
- D. the principal Delivery Controller, its local XML file

Answer: A

Explanation:
According to the Local Host Cache documentation, when the Site database is inaccessible for 90 seconds, the principal broker (Citrix Broker Service) on a Delivery Controller switches to the Local Host Cache mode and uses its local database to broker new sessions. The other Delivery Controllers in the Site do not broker any sessions during the outage. Therefore, option A is the correct answer.

NEW QUESTION # 123
Scenario: A Citrix Administrator created an SSL virtual server using only the following commands:
The SSL virtual server is currently in a DOWN state.
What could be the reason the SSL virtual server is in a down state?

- A. The virtual server SSL port is NOT set to port 443.
- B. The SSL services are NOT on the 10.102.29.X network.
- C. The SSL Certificate is NOT bound to the virtual server.
- D. SSLv3 is disabled.

Answer: C

Explanation:
Without a bound SSL certificate, the SSL virtual server cannot establish secure connections and will be in a DOWN state.
* According to the Citrix documentation, "To enable SSL offloading for a virtual server, you must bind an SSL certificate to the virtual server."
* The image you sent shows the configuration commands for setting up an SSL virtual server and services. However, there is no command to bind an SSL certificate to the virtual server.
* Therefore, the correct answer is D. The SSL Certificate is NOT bound to the virtual server.
https://docs.citrix.com/en-us/citrix-adc/13/ssl/ssl-offload-howto.html

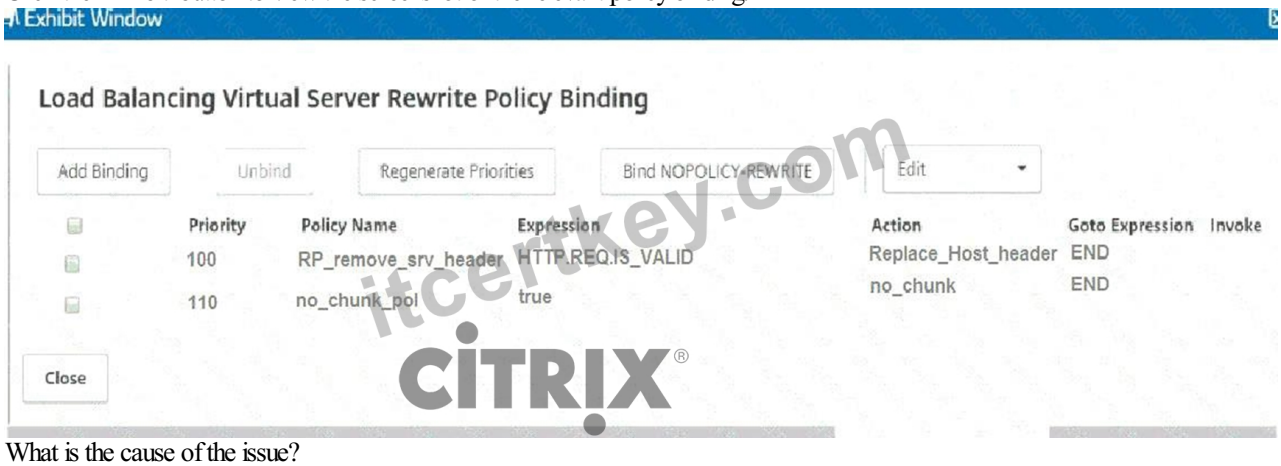
NEW QUESTION # 124
Scenario: A Citrix Administrator needs to configure persistence on a Global Server Load Balancing (GSLB) virtual server to which a service is bound, so that the service continues to serve requests from the client event after it is disabled manually, accepting new requests or connections only to honor persistence. After a configured period of time, no new requests or connections are directed to the service and all of the existing connections are closed.
Which parameter can the administrator configure while disabling the service to achieve this requirement?

- A. Persistence Time-Out
- B. Request Threshold
- C. Wait Time
- D. Persistence Threshold

Answer: A

Explanation:
According to the Citrix documentation1, persistence time-out is the parameter that determines how long the service continues to serve requests from the client after it is disabled manually. The service accepts new requests or connections only to honor persistence. After the persistence time-out expires, no new requests or connections are directed to the service and all of the existing connections are closed. This parameter is available only when the service is disabled gracefully. The default value is 2 minutes. The other options are not related to the scenario described in the question.

NEW QUESTION # 125
A Citrix Administrator complains that between the two rewrite policies bound to the vserver, only one policy, whichever has lower priority, works. The other policy is never used.
Click the 'Exhibit' button to view the screenshot of the relevant policy binding.



itcertkey.com

What is the cause of the issue?

- A. The Policy expression of the no_chunk_pol is 'true' and 'NOT HTTP.REQ.IS_VALID'.
- B. GotoExpression value for Policy RP_remove_srv_header is configured as 'END'.
- C. The Invoke label is NOT configured.
- D. The Priority of the no_chunk_pol is a higher numeric value than 100.

Answer: A

Explanation:
The issue is caused by the policy expression of the no_chunk_pol being 'true' and 'NOT HTTP.REQ.
IS_VALID'. This means that the policy will always be true and thus, always be invoked, preventing the other policy from being used.
This is explained in the Citrix Virtual Apps and Desktops 7 Deployment and Administration (CWS-215) course, under the section "Load Balancing Virtual Server Rewrite Policy Binding".

NEW QUESTION # 126
.....

A lot of applicants have studied from Citrix 1Y0-204 practice material. They have rated it positively because they have cracked Citrix Virtual Apps and Desktops 7 Administration (1Y0-204) certification on their first try. Itcertkey guarantees its customers that they can pass the Citrix Virtual Apps and Desktops 7 Administration (1Y0-204) test on the first attempt.
