The Explore phase of the SAP Activate methodology focuses on confirming scope, validating SAP Best Practice processes, and finalizing solution design decisions through Fit-to-Standard workshops.

The SAP Project Manager plays a leadership and coordination role - ensuring workshops are executed, project governance is active, and the configuration approach remains aligned with standard SAP practices.

Step 2 - Evaluate Each Option

A). Monitor completion of the Business Driven Configuration Questionnaire

* The Business-Driven Configuration Questionnaire (BDCQ) captures key requirements and process-specific decisions from the customer.

* During the Explore phase, the SAP Project Manager ensures the questionnaire is completed accurately to support Fit-to-Standard discussions.

* Monitoring completion of this document is a formal responsibility of the Project Manager.

Result: Correct - It is a key management activity during Explore.

B). Develop detailed technical specifications for custom development

* This activity is owned by technical consultants or developers, not the Project Manager.

* The Project Manager's role is to oversee progress and governance, not to write or develop technical designs.

Result: Incorrect - Outside the PM's direct responsibilities.

C). Develop a detailed technical architecture design

* Architecture design is the responsibility of technical architects, finalized in the Prepare phase before workshops begin.

* The Project Manager reviews and monitors this work but does not develop it.

Result: Incorrect - Managed, but not developed by the Project Manager.

D). Conduct fit-to-standard workshops

* The Project Manager coordinates and ensures Fit-to-Standard workshops are completed according to plan.
