Our Field-Service-Consultant test study material contains valid top questions and detailed exam answers.

## Salesforce Certified Field Service Consultant Sample Questions (Q48-Q53):

### NEW QUESTION # 48

Geolocation tracking is enabled for Universal Containers's Technicians but should only apply to full-time employees. How can geolocation tracking for contractors be disabled?

- A. Uncheck the Geocoding field on the Contractor's profile.
- **B. Add the Exclude Technician from Geolocation Tracking permission to a permission set and assign it to contractors.**
- C. A Uncheck the Collect Service Resource Geolocation History field in Field Service Mobile Settings.
- D. Set the Geolocation Update Frequency field to zero for contractors.

**Answer: B**

Explanation:

The Exclude Technician from Geolocation Tracking permission allows disabling geolocation tracking for specific service resources by assigning them a permission set with this permission. Setting the Geolocation Update Frequency field to zero for contractors would not disable geolocation tracking, but would make it update less frequently. Unchecking the Geocoding field on the Contractor's profile or the Collect Service Resource Geolocation History field in Field Service Mobile Settings would not affect geolocation tracking, as these are not related settings. References: [https://help.salesforce.com/s/articleView?id=sf.fs\\_geolocation\\_tracking\\_permissions.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.fs_geolocation_tracking_permissions.htm&type=5)[https://help.salesforce.com/s/articleView?id=sf.fs\\_geolocation\\_tracking\\_settings.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.fs_geolocation_tracking_settings.htm&type=5)

### NEW QUESTION # 49

Optimization for the Midwest territory is set to automatically run each night for the next three days. The Dispatcher has noticed that the optimizer is leaving many Service Appointments unscheduled and has asked the Consultant to troubleshoot the issue. The Consultant notices that the Optimization Run Time per Service Appointment is set to Low in the Field Service Settings. Which two conditions would make the Consultant consider setting the optimizer to High? Choose 2? answers

- A. The Scheduling Policy Used field is blank.
- **B. The scheduling policy is producing too many candidates that qualify for each Service Appointment.**
- C. Most service appointments have the same priority.
- **D. The Calculate travel and breaks Field Service Setting is disabled for the Service Resource Availability work rule.**

**Answer: B,D**

Explanation:

Explanation

These two conditions would make the optimizer run slower and leave many Service Appointments unscheduled, as it would have to evaluate too many possible scenarios and combinations.
