Google Professional-Cloud-Database-Engineer Reliable Test Forum - Test Professional-Cloud-Database-Engineer Pattern

Our company really took a lot of thought in order to provide customers with better Professional-Cloud-Database-Engineer learning materials. First of all, in the setting of product content, we have hired the most professional team who analyzed a large amount of information and compiled the most reasonable Professional-Cloud-Database-Engineer Exam Questions. And you can find the most accurate on our Professional-Cloud-Database-Engineer study braindumps. Secondly, our services are 24/7 avaiable to help our customers solve all kinds of questions.

Google Cloud Certified - Professional Cloud Database Engineer Sample Questions (Q25-Q30):

NEW QUESTION # 25
Your organization is running a low-latency reporting application on Microsoft SQL Server. In addition to the database engine, you are using SQL Server Analysis Services (SSAS), SQL Server Reporting Services (SSRS), and SQL Server Integration Services

(SSIS) in your on-premises environment. You want to migrate your Microsoft SQL Server database instances to Google Cloud. You need to ensure minimal disruption to the existing architecture during migration. What should you do?

- A. Migrate to Compute Engine.
- B. Migrate to Google Kubernetes Engine (GKE).
- C. Migrate to Cloud SQL for SQL Server.
- D. Migrate to Cloud SQL for PostgreSQL.

Answer: A

Explanation:
https://cloud.google.com/sql/docs/sqlserver/features

NEW QUESTION # 26
You have a large Cloud SQL for PostgreSQL instance. The database instance is not mission-critical, and you want to minimize operational costs. What should you do to lower the cost of backups in this environment?

- A. Select a different region to store your backups.
- B. Set the automated backups to occur every other day to lower the frequency of backups.
- C. Change the storage tier of the automated backups from solid-state drive (SSD) to hard disk drive (HDD).
- D. Reduce the number of automated backups that are retained to two (2).

Answer: B

NEW QUESTION # 27
You are designing a highly available (HA) Cloud SQL for PostgreSQL instance that will be used by 100 databases. Each database contains 80 tables that were migrated from your on-premises environment to Google Cloud. The applications that use these databases are located in multiple regions in the US, and you need to ensure that read and write operations have low latency. What should you do?

- A. Deploy 4 Cloud SQL instances in the us-central1 region with HA enabled, and create read replicas in us-central1, us-east1, and us-west1.
- B. Deploy 2 Cloud SQL instances in the us-central1 region with HA enabled, and create read replicas in us-east1 and us-west1.
- C. Deploy 2 Cloud SQL instances in the us-central1 region, and create read replicas in us-east1 and us-west1.
- D. Deploy 4 Cloud SQL instances in the us-central1 region, and create read replicas in us-central1, us-east1 and us-west1.

Answer: B

Explanation:
https://cloud.google.com/sql/docs/mysql/quotas#table_limit

NEW QUESTION # 28
You work in the logistics department. Your data analysis team needs daily extracts from Cloud SQL for MySQL to train a machine learning model. The model will be used to optimize next-day routes. You need to export the data in CSV format. You want to follow Google-recommended practices. What should you do?

- A. Use Cloud Composer to orchestrate an export by calling the cloudsql.instances.export API.
- B. Use Cloud Scheduler to trigger a Cloud Function through Pub/Sub to call the cloudsql.instances.export API.
- C. Use Cloud Composer to execute a select * from table(s) query and export results.
- D. Use Cloud Scheduler to trigger a Cloud Function that will run a select * from table(s) query to call the cloudsql.instances.export API.

Answer: B

Explanation:
https://cloud.google.com/blog/topics/developers-practitioners/scheduling-cloud-sql-exports-using-cloud-functions-and-cloud-scheduler

NEW QUESTION # 29

Your organization is running a critical production database on a virtual machine (VM) on Compute Engine.
The VM has an ext4-formatted persistent disk for data files. The database will soon run out of storage space.
You need to implement a solution that avoids downtime. What should you do?

- A. In the Google Cloud Console, increase the size of the persistent disk, and use the resize2fs command to extend the disk.
- B. In the Google Cloud Console, increase the size of the persistent disk, and use the fdisk command to verify that the new space is ready to use
- C. In the Google Cloud Console, create a new persistent disk attached to the VM, and configure the database service to move the files to the new disk.
- D. In the Google Cloud Console, create a snapshot of the persistent disk, restore the snapshot to a new larger disk, unmount the old disk, mount the new disk, and restart the database service.

Answer: A

Explanation:
https://cloud.google.com/compute/docs/disks/resize-persistent-disk#resize_partitions

NEW QUESTION # 30

......

After years of hard work, our Professional-Cloud-Database-Engineer learning materials can take the leading position in the market. Our highly efficient operating system for learning materials has won the praise of many customers. If you are determined to purchase our Professional-Cloud-Database-Engineer learning materials, we can assure you that you can receive an email from our efficient system within 5 to 10 minutes after your payment, which means that you do not need to wait a long time to experience our learning materials. Then you can start learning our Professional-Cloud-Database-Engineer Learning Materials in preparation for the exam.

Professional-Cloud-Database-Engineer Reliable Test Forum: https://www.actualtests4sure.com/Professional-Cloud-Database-Engineer-test-questions.html

Actualtests4sure knows that Google Professional-Cloud-Database-Engineer exam dumps can confirm your success, Our customers have voluntarily introduced Professional-Cloud-Database-Engineer pass-sure torrent materials to people, Now, since you have clicked into this website, your need not to worry about that any longer, because our company can provide the best remedy for you-- our Google Professional-Cloud-Database-Engineer reliable questions and answers files, Google Reliable Professional-Cloud-Database-Engineer Test Preparation Therefore, we provide diversified products to meet our customers' demands.

Even if the numerous SharePoint templates and features provided in Visual Professional-Cloud-Database-Engineer Studio are not enough, with extensibility you can extend them or create your own features inside Visual Studio that will make you more productive.

Use Real Google Professional-Cloud-Database-Engineer Exam Questions And Achieve Brilliant Results

You can also integrate web content directly into your iPad app, Actualtests4sure knows that Google Professional-Cloud-Database-Engineer Exam Dumps can confirm your success, Our customers have voluntarily introduced Professional-Cloud-Database-Engineer pass-sure torrent materials to people.

Now, since you have clicked into this website, your need not to worry about that any longer, because our company can provide the best remedy for you--our Google Professional-Cloud-Database-Engineer reliable questions and answers files.

Therefore, we provide diversified products to meet our customers' demands, Now the Professional-Cloud-Database-Engineer Training Materials is really essential for you to achieve your dream, you can not afford to miss it.
