300-620 Latest Exam Guide - Vce 300-620 Format

One of the advantages of our 300-620 study material is that it has various versions. There are includes PDF, APP and Practice exam software. Every version has their feature. 300-620 PDF can download as a document in your smart devices and lug it along with you, it makes your 300-620 prepare more convenient. 300-620 App is unlimited use of equipment, support for any electronic device, but also support offline use, while the Practice exam software creates is like an actual test environment for your 300-620 Certification Exam. The software also sets up time and mock examination functions. You can set a timer for simulation tests to help you complete our 300-620 Practice in an effective time, which will help you adjust the speed and vigilance in real exams.

Cisco Implementing Cisco Application Centric Infrastructure Sample Questions (Q314-Q319):

NEW QUESTION # 314

What must be enabled in the bridge domain to have the endpoint table learn the IP addresses of endpoints?

- A. subnet scope
- B. L2 unknown unicast: flood
- C. GARP based detection
- D. unicast routing

Answer: D

Explanation:

Reference:

NEW QUESTION # 315

Which two statements regarding ACI Multi-Site are true? (Choose two.)

- A. ACI Multi-Site is a solution that supports a dedicated APIC cluster per site.
- **B. The Multi-Site orchestrator must be directly attached to one ACI leaf.**
- C. Routers in the Inter-Site network must run OSPF, DHCP relay, and MP-BGP.
- D. ACI Multi-Site is a solution that allows one APIC cluster to manage multiple ACI sites.
- **E. The Inter-Site network routers should run OSPF to establish peering with the spines.**

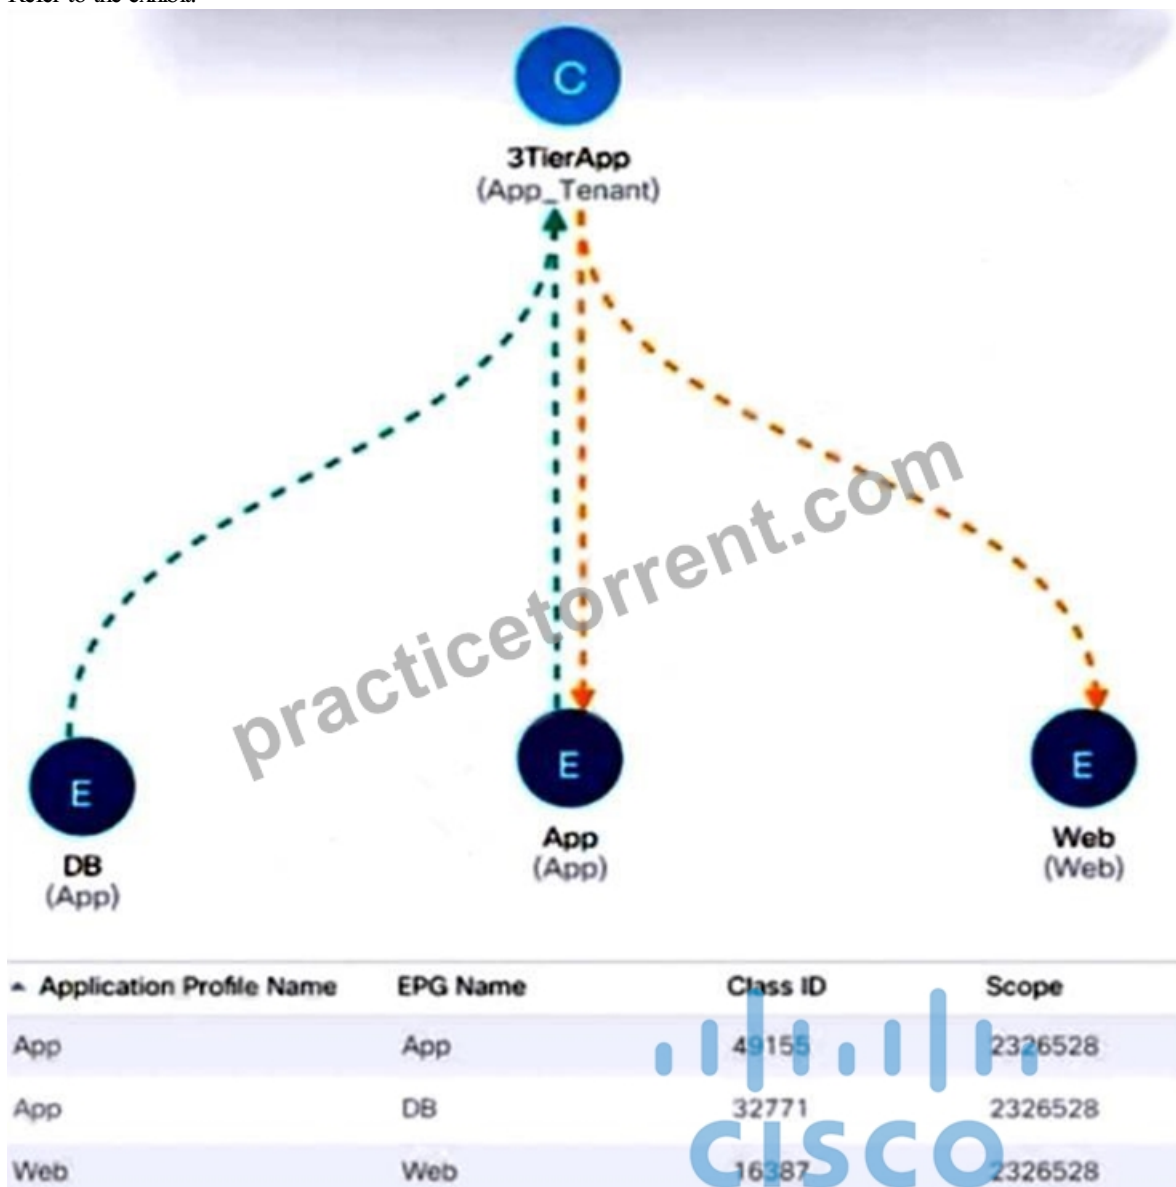

Answer: B,E

Explanation:

Section: ACI Anywhere

NEW QUESTION # 316

Refer to the exhibit.

Refer to the exhibit. New e-commerce software is deployed on Cisco ACI fabric. The environment must meet these requirements:
The overall number of contracts must be reduced by reusing the existing contracts within a VRF when possible.
The e-commerce software must communicate only with software EPGs that are part of the same ANP.

The e-commerce software must be prevented from communicating with applications in different ANPs.
Which scope must be selected to meet these requirements?

- A. Global
- **B. Application Profile**
- C. Endpoint Group
- D. Tenant

Answer: B

Explanation:

To meet the requirements for the new e-commerce software deployed on the Cisco ACI fabric, the scope of the contracts should be set to "Application Profile". This scope ensures that the contracts are applied within the same Application Network Profile (ANP), allowing the e-commerce software to communicate only with software Endpoint Groups (EPGs) that are part of the same ANP. It also prevents communication with applications in different ANPs, thus maintaining the necessary isolation and reducing the overall number of contracts by reusing existing ones within a VRF.

NEW QUESTION # 317

Refer to the exhibit.

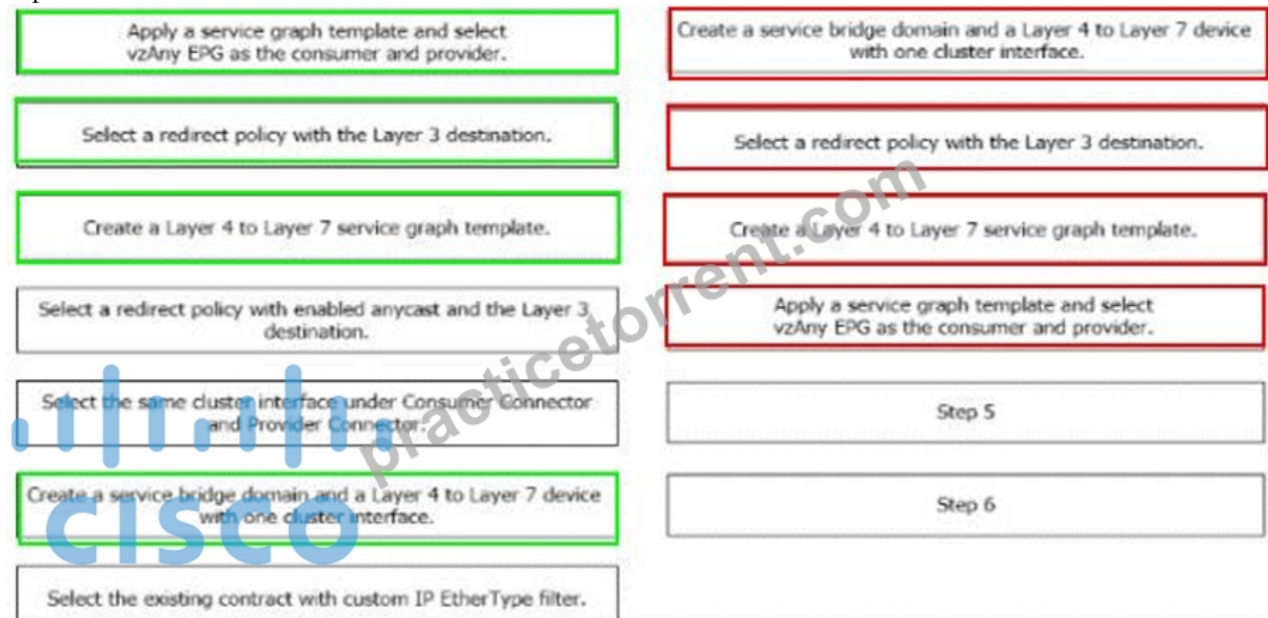

A Cisco ACI fabric is newly deployed, and the security team requires more visibility of all inter-EPG traffic flows. All traffic in a VRF must be forwarded to an existing firewall pair. During failover, the standby firewall must continue to use the same IP and MAC as the primary firewall. Drag and drop the steps from the left Into the Implementation order on the right to configure the service graph that meets the requirements. (Not all steps are used.)

Answer:

NEW QUESTION # 318

An engineer is in the process of discovering a new Cisco ACI fabric consisting of two spines and four leaf switches. The discovery of leaf 1 has just been completed. Which two nodes are expected to be discovered next? (Choose two.)

- A. spine 2
- B. leaf 3
- C. leaf 2
- D. leaf 4
- E. spine 1

Answer: A,E
