

# Fortinet FCSS\_SDW\_AR-7.6 Dumps Obtain Exam Results Simply 2026

There are lots of benefits of obtaining a certificate, it can help you enter a better company, have a high position in the company, improve your wages etc. Our FCSS\_SDW\_AR-7.6 test materials will help you get the certificate successfully. We have a channel to obtain the latest information about the exam, and we ensure you that you can get the latest information about the FCSS\_SDW\_AR-7.6 Exam Dumps timely. Furthermore, you can get the download link and password for FCSS\_SDW\_AR-7.6 test materials within ten minutes after purchasing.

Our company was built in 2008 since all our education experts have more than ten years' experience in FCSS\_SDW\_AR-7.6 guide torrent. The most important characters we pay attention to are our quality and pass rate. We devote ourselves to improve passing rate constantly and service satisfaction degree of our FCSS\_SDW\_AR-7.6 training guide. And now you can find the data provided from our loyal customers that our pass rate of FCSS\_SDW\_AR-7.6 learning guide is more than 98%. You will successfully pass your FCSS\_SDW\_AR-7.6 exam for sure.

## Valid FCSS\_SDW\_AR-7.6 Test Cram | FCSS\_SDW\_AR-7.6 Exam Dumps Provider

More and more people look forward to getting the FCSS\_SDW\_AR-7.6 certification by taking an exam. However, the exam is very difficult for a lot of people. Especially if you do not choose the correct study materials and find a suitable way, it will be more difficult for you to pass the exam and get the FCSS\_SDW\_AR-7.6 related certification. If you want to get the related certification in an efficient method, please choose the FCSS\_SDW\_AR-7.6 Study Materials from our company. We can guarantee that the study materials from our company will help you pass the exam and get the certification in a relaxed and efficient method.

## Fortinet FCSS - SD-WAN 7.6 Architect Sample Questions (Q46-Q51):

### NEW QUESTION # 46

When a customer delegates the installation and management of its SD-WAN infrastructure to an MSSP, the MSSP usually keeps the hub within its infrastructure for ease of management and to share costly resources.

In which two situations will the MSSP install the hub in customer premises? (Choose two.)

- A. The customer expects a large amount of VoIP traffic.
- B. The majority of the branch traffic is directed to a corporate data center.
- C. The administrator expects a large volume of traffic between the branches.
- D. The customer requires SIA with centralized breakout.

**Answer: B,D**

Explanation:

Placing the hub at the customer premises enables direct access and centralizes breakout or connectivity close to critical corporate resources, meeting these requirements. High-volume, high-profile traffic scenarios like SIA or central data center uplink benefit from a local hub for efficiency and control.

#### **NEW QUESTION # 47**

You have a FortiGate configuration with three user-defined SD-WAN zones and two members in each of these zones. One SD-WAN member is no longer in use in health-check and SD-WAN rules. You want to delete it.

What happens if you delete the SD-WAN member from the FortiGate GUI?

- A. FortiGate accepts the deletion and places the member in the default SD-WAN zone.
- B. FortiGate displays an error message. You must use the CLI to delete an SD-WAN member.
- C. FortiGate accepts the deletion and removes routes as required.
- D. FortiGate displays an error message. SD-WAN zones must contain at least two members

**Answer: C**

Explanation:

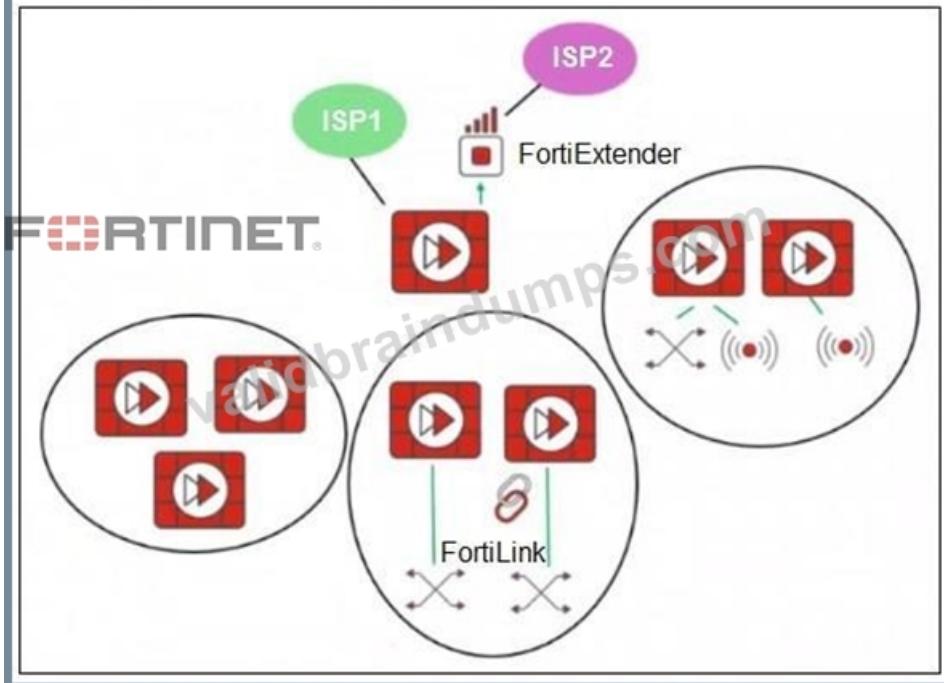

In FortiOS, you can remove an SD-WAN member from the GUI as long as it is not in use in any health-checks, SD-WAN rules, or policies.

When you delete it, FortiGate will automatically clean up related routes (static or dynamic SD-WAN routes referencing that member).

#### **NEW QUESTION # 48**

Refer to the exhibit. You want to configure SD-WAN on a network as shown in the exhibit. The network contains many FortiGate devices. Some are used as NGFW, and some are installed with extensions such as FortiSwitch, FortiAP or FortiExtender. What should you consider when planning your deployment?

## SD-WAN Network Topology

- A. You can build an SD-WAN topology that includes all devices. The hubs must be devices without extensions.
- B. You must use FortiManager to manage your SD-WAN topology.
- C. You can build an SD-WAN topology that includes all devices. The hubs can be FortiGate devices with FortiExtender.
- D. You must build multiple SD-WAN topologies. Each topology must contain only one type of extension.

**Answer: A**

Explanation:

You can include FortiGates with extensions (FortiSwitch/FortiAP/FortiExtender) as spokes in one SD-WAN topology, but the hubs should be clean FortiGate devices without extensions enabled.

Extensions like FortiLink or FortiExtender add roles/services that can conflict with hub duties (overlay termination, route distribution, scale/HA) and aren't supported/recommended on hubs.

No need to split into multiple topologies or require FortiManager just for that.

## NEW QUESTION # 49

Refer to the exhibit that shows event logs on FortiGate. Based on the output shown in the exhibit, what can you say about the tunnels on this device?

```

6: date=2024-12-18 time=15:15:06 eventtime=1734563705745090691 tz= "-0800" logid=

```

- A. There is one shortcut tunnel built from master tunnel VPN4.
- B. The master tunnel HU82-VPN3 cannot accept ADVPN shortcuts.
- C. The VPN tunnel HUB1-VPN1\_0 is a shortcut tunnel.
- D. The device steers voice traffic through the VPN tunnel HUB1-VPN3.

**Answer: C**

Explanation:

The "advpnsc" log field indicates whether a VPN event is based on an ADVPN shortcut. A value of "1" indicates the tunnel is an ADVVPN shortcut, and "0" indicates it is not.

In the event logs, the log entry with "vpntunnel="HUB1-VPN1\_0"" shows "advpnsc=1", which signifies that HUB1-VPN1\_0 is a shortcut tunnel.

<https://docs.fortinet.com/document/fortigate/7.2.0/new-features/661245/add-log-field-to-identify-advpn-shortcuts-in-vpn-logs>

#### NEW QUESTION # 50

Which two statements correctly describe what happens when traffic matches the implicit SD-WAN rule? (Choose two.)

- A. FortiGate flags the session with may\_dirtyand\_vwl\_default.
- B. Traffic does not match any of the entries in the policy route table.
- C. The session information output displays no SD-WAN service id.
- D. Traffic is load balanced using the algorithm set for the v4-ecmp-modesetting.

- E. The traffic is distributed, regardless of weight, through all available static routes.

**Answer: B,C**

Explanation:

When traffic matches the implicit SD-WAN rule, no specific SD-WAN service is applied, so the session information output does not show an SD-WAN service ID.

The implicit SD-WAN rule is considered only when no matching entry is found in the policy route table.

## NEW QUESTION # 51

.....

ValidBraindumps have made customizable FCSS - SD-WAN 7.6 Architect (FCSS\_SDW\_AR-7.6) practice tests so that users can take unlimited tests and improve FCSS - SD-WAN 7.6 Architect (FCSS\_SDW\_AR-7.6) exam preparation day by day. These Fortinet FCSS\_SDW\_AR-7.6 practice tests are based on the real examination scenario so the students can feel the pressure and learn to deal with it. The customers can access the result of their previous given FCSS - SD-WAN 7.6 Architect (FCSS\_SDW\_AR-7.6) exam history and try not to make any excessive mistakes in the future.
