## C-S4PM2-2507 Learning Materials & C-S4PM2-2507 Study Guide & C-S4PM2-2507 Test Braindumps

It is well known that certificates are not versatile, but without a C-S4PM2-2507 certification you are a little inferior to the same

competitors in many ways. Compared with the people who have the same experience, you will have the different result and treatment if you have a C-S4PM2-2507 Certification. Without doubt, you will get a higher salary if you have a C-S4PM2-2507 certification or you can enter into a bigger company. And our C-S4PM2-2507 exam materials can make your dream come true.

## SAP Certified Associate - Managing SAP S/4HANA Cloud Private Edition Projects Sample Questions (Q21-Q26):

### NEW QUESTION # 21

Which of the following components does SAP recommend you include in a post-go-live review? Note: There are 3 correct answers to this question.

- A. Risk log review
- B. Issue resolution log
- C. Budget analysis
- D. User feedback
- E. Performance metrics

Answer: B,D,E

### NEW QUESTION # 22

Which of the following are prerequisites for using the "RISE with SAP system transition workbench"? Note: There are 2 correct answers to this question.

- A. The SAP Host Agent has been correctly configured.
- B. All custom ABAP code have been removed from the system.
- C. The user received permission to access the operating system of the target system.
- D. A migration server has been provisioned.

Answer: A,D

Explanation:

Step 1 - Understanding the question

This question relates to the RISE with SAP System Transition Workbench, a tool designed to support system conversions and migrations to SAP S/4HANA Cloud, Private Edition.

It helps automate and monitor the transition process, providing visibility and control during system migration.

Step 2 - Evaluate each option

Option A: A migration server has been provisioned.

This is correct.

Before using the System Transition Workbench, a migration server must be provisioned to serve as the technical environment where migration and transition activities are executed.

This server handles data transfer, configuration, and monitoring tasks during the transition.

Option B: The user received permission to access the operating system of the target system.

This is incorrect.

RISE with SAP environments are managed cloud environments, and users (including consultants) do not receive operating system-level access.

All activities are performed using SAP-provided tools and interfaces, not through direct OS access.

Option C: The SAP Host Agent has been correctly configured.

This is correct.

The SAP Host Agent is required for the System Transition Workbench to communicate with the systems involved in the migration.

It must be properly configured to enable the workbench to read system information, manage services, and perform health checks.

Option D: All custom ABAP code have been removed from the system.

This is incorrect.

Custom ABAP code is not required to be removed before using the workbench. Instead, it should be analyzed and remediated using the Custom Code Migration app or ABAP Test Cockpit (ATC), but its existence does not block the use of the workbench.

### NEW QUESTION # 23

What is the purpose of the "RISE with SAP system transition workbench"?

- A. To provide access to SAP support resources and documentation.
- **B. To provide a single point of entry for migrating systems to the RISE with SAP environment.**
- C. To offer a marketplace for purchasing SAP software licenses.
- D. To manage and monitor SAP systems running on-premises.

**Answer: B**

#### NEW QUESTION # 24

Where can an implementation consultant find configuration information for each level in the configuration hierarchy?

- A. In the SAP SignaviProcess Manager
- **B. In the SAP Help Portal**
- C. In the SAP Fiori apps reference library
- D. In the SAP GUI

**Answer: B**

Explanation:

Step 1 - Understanding the question

The question asks where implementation consultants can find configuration information for each level in the configuration hierarchy in SAP S/4HANA Cloud, Private Edition.

Step 2 - Explanation

The SAP Help Portal provides structured documentation on:

- \* Configuration hierarchy levels (e.g., scope items, business areas, processes, activities).
- \* Configuration guides, setup instructions, and links to SAP Best Practices Explorer content.
- \* End-to-end setup details for each module and scenario.

The SAP Help Portal organizes information by hierarchy and is the official source for all configuration documentation.

Step 3 - Evaluate options

Option A: In the SAP Fiori apps reference library

Incorrect - It lists app-specific information (installation, roles, etc.), not configuration hierarchies.

Option B: In the SAP Signavio Process Manager

Incorrect - Signavio focuses on process modeling and design, not configuration documentation.

Option C: In the SAP Help Portal

Correct - Configuration hierarchy and detailed setup documentation are available here.

Option D: In the SAP GUI

Incorrect - Configuration activities happen in the GUI, but documentation of configuration hierarchies does not reside there.

#### NEW QUESTION # 25

Which type of testing should be done after a release upgrade has been implemented?

- A. User acceptance tests
- B. String tests
- C. Integration tests
- **D. Regression tests**

**Answer: D**

#### NEW QUESTION # 26

.....

You will stand at a higher starting point than others if you buy our C-S4PM2-2507 exam braindumps. Why are C-S4PM2-2507 practice questions worth your choice? I hope you can spend a little time reading the following content on the website, I will tell you some of the advantages of our C-S4PM2-2507 Study Materials. Firstly, our pass rate for C-S4PM2-2507 training guide is unmatched high as 98% to 100%. Secondly, we have been in this career for years and became a famous brand.
