## **CBCI Relevant Answers, Test CBCI Preparation**

Our Actual4Labs's CBCI test training materials can test your knowledge, when you prepare for CBCI test; and can also evaluate

your performance at the appointed time. Our CBCI exam training materials is the result of Actual4Labs's experienced IT experts with constant exploration, practice and research for many years. Its authority is undeniable. If you have any concerns, you can first try CBCI PDF VCE free demo and answers, and then make a decision whether to choose our CBCI dumps or not.

## BCI CBCI Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Implementation: This section covers putting the designed continuity strategies into action, including creating and deploying incident response and business continuity plans, structuring effective response teams, and ensuring operational readiness.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Introduction: This section lays the groundwork for newcomers to business continuity by clarifying what business continuity is, why it matters in organizational resilience, and how its fundamental practices interconnect under the Good Practice Guidelines (GPG) framework.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Validation: This final module emphasizes testing and verifying the effectiveness of implemented plans through exercises and reviews—ensuring that what was designed and implemented actually performs as intended under real-world conditions.</li> </ul>

## BCI Certificate of the Business Continuity Institute (CBCI) Sample Questions (Q16-Q21):

### NEW QUESTION # 16

The purpose of an external audit of the Business Continuity Management System (BCMS) is to:

- A. Provide independent assurance on a set of Business Continuity processes and controls
- B. Confirm that the organization is fully prepared to respond to incidents
- C. Make recommendations on alternative ways of meeting recovery time objectives (RTOs)
- D. Assess the performance of the members of top management team in relation to Business Continuity

### Answer: A

Explanation:

External audits provide independent verification that the BCMS complies with relevant standards, policies, and regulatory requirements. The CBCI 7.0 course clarifies that audits assess the design, implementation, and effectiveness of Business Continuity processes and controls to assure stakeholders that the system functions as intended. The audit does not specifically test operational readiness or management performance but focuses on conformance and control integrity, enabling informed decision-making about system improvements.

Reference: CBCI 7.0 Study Guide, Module 6: Audit and Review, pages 135-138.

### NEW QUESTION # 17

Which of the following parameters would NOT be considered by a resource or activity owner when evaluating and selecting solutions to meet an agreed strategy?

- A. The advantages and disadvantages of the proposed solution
- B. The estimated costs to prepare, implement, operate and maintain the solution
- C. The implementation time required
- D. The type of exercises to be conducted to validate the strategies and solutions

### Answer: D

Explanation:

When selecting solutions, resource or activity owners focus on factors such as advantages, disadvantages, costs, and implementation timelines, which directly affect feasibility and operational impact. The CBCI 7.0 course clarifies that while validation exercises are important for testing solutions, the choice and evaluation of solutions themselves typically do not consider the type of exercises planned for later validation phases.

Exercise planning is a separate activity handled by the validation team, not the solution selectors.

Reference:CBCI 7.0 Study Guide, Module 5: Solutions Design, pages 95-97.

### NEW QUESTION # 18

As part of the process to develop a Business Continuity policy, it is important to ensure that:

- A. The policy is communicated widely within the organization
- B. All personnel who are provided with a copy of the policy are required to confirm that they will treat its contents as confidential
- C. Access to the policy is restricted to top management and department heads
- D. Communications specialists take control of the distribution of the policy and the management of any future revisions

#### Answer: A

Explanation:

The CBCI 7.0 course emphasizes that wide communication of the Business Continuity policy is vital to ensure that all personnel understand the organization's commitment to continuity and their roles within the BCMS. Transparency fosters engagement and accountability, encouraging personnel to embrace continuity practices. Restricting access limits awareness and can hinder implementation. While confidentiality might apply to sensitive procedures, the policy itself should be broadly accessible. Communication specialists may support distribution but ownership of policy dissemination and updates remains a governance responsibility to ensure consistency and reach.

Reference:CBCI 7.0 Study Guide, Module 1: Policy and Communication, pages 16-19.

### NEW QUESTION # 19

Establishing governance arrangements for a Business Continuity Management System (BCMS) is essential in order to:

- A. Enable the Business Continuity professional to establish their authority and issue instructions on the actions that need to be taken
- B. Ensure that there is ongoing commitment across all organizational functions and levels
- C. Commission research into approaches taken by organizations
- D. Develop a project risk register and carry out appropriate risk assessments in the workplace

#### Answer: B

Explanation:

The CBCI 7.0 course stresses that governance arrangements are key to securing ongoing commitment and support across all levels and functions within an organization. Effective governance structures facilitate leadership involvement, resource allocation, decision-making, and accountability, which are crucial for embedding Business Continuity. While project risk registers and research are valuable tools, and authority is necessary, governance's primary function is to maintain organization-wide engagement and alignment, ensuring the BCMS is sustained and evolves with business needs.

Reference:CBCI 7.0 Study Guide, Module 1: Governance, pages 22-25.

### NEW QUESTION # 20

Within the context of risk assessment, the identification of solutions is influenced by a variety of business relevant considerations, including:

- A. Timely production of quality assurance audit trails
- B. Ensuring that communication protocols are observed
- C. Compliance with regulatory requirements
- D. Delivering performance targets

#### Answer: C

Explanation:

The CBCI 7.0 course highlights that compliance with regulatory requirements is a critical consideration when identifying risk treatment solutions. Regulatory frameworks often impose mandatory controls or guidelines that shape the selection and design of Business Continuity solutions to ensure legal adherence and avoid penalties. While performance targets, audit trails, and communication protocols are important operational elements, they are subordinate to regulatory compliance, which acts as a baseline constraint and influence on continuity planning. Effective risk solutions balance operational effectiveness with mandatory compliance, supporting

sustainable and defensible Business Continuity strategies.
