To achieve this objective ValidVCE has hired a team of experienced and qualified CompTIA XK0-005 Exam trainers. They work together and put all their expertise to maintain the top standard of XK0-005 practice test all the time.

## CompTIA Linux+ Certification Exam Sample Questions (Q689-Q694):

### NEW QUESTION # 689

The security team has identified a web service that is running with elevated privileges. A Linux administrator is working to change the systemd service file to meet security compliance standards. Given the following output:

Which of the following remediation steps will prevent the web service from running as a privileged user?

- A. Updating the Environment File line in the [Service] section to /home/web/service/config

- B. Changing the multi-user.target in the [Install] section to basic.target
- C. Removing the ExecStarWusr/sbin/webserver -D SOPTIONS from the service file
- D. Adding the User-webserver to the [Service] section of the service file

**Answer: C**

#### NEW QUESTION # 690

Which of the following is the template for the grub.cfg file?

- A. /etc/sysct1.conf
- B. /boot/efi
- C. /etc/default/grub
- D. /etc/grub2.cfg

**Answer: C**

Explanation:

grub.cfg is generated automatically from the content of the /etc/default/grub file and the /etc/grub.d directory. You should modify or add to those files to configure GRUB 2. After making changes, you must explicitly rebuild the grub.cfg file by typing the update-grub command.

#### NEW QUESTION # 691

Which of the following data structures is written in JSON?

- A. ☐
- B. ☐
- C. ☒
- D. ☐

**Answer: C**

Explanation:

Option C is the only data structure that is written in JSON format. JSON stands for JavaScript Object Notation, and it is a lightweight and human-readable data interchange format. JSON uses curly braces to enclose objects, which consist of key-value pairs separated by commas. JSON uses square brackets to enclose arrays, which consist of values separated by commas. JSON supports six data types: strings, numbers, booleans, null, objects, and arrays. Option C follows these rules and syntax of JSON, while the other options do not. Option A is written in XML format, which uses tags to enclose elements and attributes. Option B is written in YAML format, which uses indentation and colons to define key-value pairs. Option D is written in INI format, which uses sections and equal signs to define key-value pairs. #### NEW QUESTION # 692

A systems administrator wants to delete app.conf from a Git repository. Which of the following commands will delete the file?

- A. git commit app.conf
- B. git checkout app.conf
- C. git rm app.conf
- D. git tag app.conf

**Answer: C**

Explanation:

Explanation

To delete a file from a Git repository, the administrator can use the command git rm app.conf (D). This will remove the file "app.conf" from the working directory and stage it for deletion from the repository. The administrator can then commit the change with git commit -m "Delete app.conf" to finalize the deletion. The other commands will not delete the file, but either tag, commit, or checkout the file.
