- A. Procurement
- B. Human Capital Management
- C. Travel
- D. Sales

**Answer: A,D,E**

Explanation:

The SAP Business Network is a digital platform that enables customers to streamline and digitalize cross-company business processes by connecting buyers, suppliers, and other stakeholders in real time. It builds on specific solutions that focus on key areas of collaboration and integration across organizations. Let's analyze each option to determine the correct answers.

Explanation of Each Option:

A. Contingent Workforce

\* Correct : The SAP Business Network includes capabilities for managing contingent workforces , which involve external workers

such as freelancers, contractors, and temporary staff. This solution helps organizations streamline workforce procurement and management processes, ensuring compliance and efficiency.

\* Reference : According to SAP documentation, the SAP Business Network supports contingent workforce management as part of its broader ecosystem for cross-company collaboration.

#### D. Procurement

\* Correct : Procurement is one of the core solutions integrated into the SAP Business Network. It enables organizations to collaborate with suppliers, manage purchase orders, invoices, and deliveries, and optimize sourcing processes. The network facilitates end-to-end procurement workflows across company boundaries.

\* Reference : SAP emphasizes that procurement is a foundational component of the SAP Business Network, enabling seamless supplier collaboration and supply chain visibility.
