

Pass Guaranteed 2026 Microsoft SC-401 Perfect Valid Exam Forum

What's more, part of that Lead2Passed SC-401 dumps now are free: https://drive.google.com/open?id=1fXJnQugsfkh49Es-J2Z6WCg_55AyAJY_

In order to help you more Lead2Passed the Microsoft SC-401 exam eliminate tension of the candidates on the Internet. SC-401 study materials including the official Microsoft SC-401 certification training courses, Microsoft SC-401 self-paced training guide, SC-401 exam Lead2Passed and practice, SC-401 Online Exam SC-401 study guide. SC-401 simulation training package designed by Lead2Passed can help you effortlessly pass the exam. Do not spend too much time and money, as long as you have Lead2Passed learning materials you will easily pass the exam.

Microsoft SC-401 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Implement Data Loss Prevention and Retention: This section evaluates Data Protection Officers on designing and managing data loss prevention (DLP) policies and retention strategies. It includes setting policies for data security, configuring Endpoint DLP, and managing retention labels and policies. Candidates must understand adaptive scopes, policy precedence, and data recovery within Microsoft 365.
Topic 2	<ul style="list-style-type: none"> Manage Risks, Alerts, and Activities: This section assesses Security Operations Analysts on insider risk management, monitoring alerts, and investigating security activities. It covers configuring risk policies, handling forensic evidence, and responding to alerts using Microsoft Purview and Defender tools. Candidates must also analyze audit logs and manage security workflows.
Topic 3	<ul style="list-style-type: none"> Protect Data Used by AI Services: This section evaluates AI Governance Specialists on securing data in AI-driven environments. It includes implementing controls for Microsoft Purview, configuring Data Security Posture Management (DSPM) for AI, and monitoring AI-related security risks to ensure compliance and protection.
Topic 4	<ul style="list-style-type: none"> Implement Information Protection: This section measures the skills of Information Security Analysts in classifying and protecting data. It covers identifying and managing sensitive information, creating and applying sensitivity labels, and implementing protection for Windows, file shares, and Exchange. Candidates must also configure document fingerprinting, trainable classifiers, and encryption strategies using Microsoft Purview.

Excellent SC-401 Valid Exam Forum & Leader in Certification Exams Materials & Practical Exam SC-401 Passing Score

I know that all your considerations are in order to finally pass the SC-401 exam. Our SC-401 study materials have helped many people pass the exam and is about to help you. The 99% pass rate of our SC-401 training prep is enough to make you feel at ease. Of course, we do everything we could do to ensure that you could think through it and that you also needed to pay a bit of your effort. And with our SC-401 Exam Questions, you will pass the exam for sure.

Microsoft Administering Information Security in Microsoft 365 Sample Questions (Q59-Q64):

NEW QUESTION # 59

HOTSPOT

You have a Microsoft 365 E5 subscription that contains the device configurations shown in the following table.

Each configuration uses either Google Chrome or Firefox as a default browser.

You need to implement Microsoft Purview and deploy the Microsoft Purview browser extension to the configurations.

To which configuration can each extension be deployed? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Microsoft Purview browser extensions for Endpoint DLP are supported on:

Windows 10/11 (Config1)

macOS (Config2)

Not supported on Android (Config3)

Since Microsoft Purview does not support browser extensions on Android, Config3 is excluded from both Google Chrome and Firefox.

NEW QUESTION # 60

You have a Microsoft J65 subscription linked to a Microsoft Entra tenant that contains a user named User1.

You need to grant User1 permission to search Microsoft 365 audit logs. The solution must use the principle of least privilege. Which role should you assign to User1?

- A. the Security Reader role in the Microsoft Entra admin center
- **B. the View Only Audit Logs role in the Exchange admin center**
- C. the Reviewer role in the Microsoft Purview portal
- D. the Compliance Management role in the Exchange admin center

Answer: B

Explanation:

Step 1 - Scenario

You need to grant User1 permission to search Microsoft 365 audit logs while following the principle of least privilege.

Step 2 - Roles that can search audit logs

Audit log search in Microsoft 365 is tied to Exchange Online role groups, because audit log data is stored in Exchange.

The following roles are relevant:

View-Only Audit Logs # Grants the ability to search and view audit logs, but not configure auditing or take other compliance actions. This is the least privilege role.

Audit Logs # Grants broader permissions, including turning auditing on/off.

Compliance Management # A broader role group that includes audit log search and many other compliance functions, violating least privilege.

Security Reader (Entra ID) # Grants read-only access to security features, but not audit logs.

Reviewer (Purview) # Used in eDiscovery, not audit logs.

Step 3 - Why "View-Only Audit Logs" is correct

According to Microsoft documentation:

"Users must be assigned the Audit Logs or View-Only Audit Logs role in Exchange Online to search the audit log. To minimize permissions, assign View-Only Audit Logs."

Reference: Permissions required to search the audit log

Step 4 - Elimination of other options

A). Security Reader role # Allows reading security-related info in Microsoft 365 Defender, not Purview audit logs.

- B). Compliance Management role # Includes more than just audit logs, not least privilege.
- C). View-Only Audit Logs role # Correct and least privilege.
- D). Reviewer role # For eDiscovery cases, not audit logs.

NEW QUESTION # 61

You have a Microsoft 365 E5 subscription that has a Microsoft Purview exact data match (EDM) classifier named EDM1. You plan to create the Microsoft Purview policies shown in the following table.

Which policies can use EDM1?

- A. Retention 1 only
- B. DLP1, Insider1, and Retention1
- C. DLP1 only
- D. DLP1 and Insider1 only
- E. Insider1 and Retention1 only

Answer: C

NEW QUESTION # 62

You have a Microsoft 365 subscription that contains the sensitive information types (SITs) shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

NEW QUESTION # 63

Hotspot Question

You have a Microsoft 365 E5 subscription that contains two users named User1 and User2.

You have a Microsoft SharePoint site named Site1. Site1 stores files that contain IP addresses as shown in the following table.

User1 is assigned the SharePoint admin role for Site1. User2 is a member of Site1.

You create the data loss prevention (DLP) policy shown in the following exhibit.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: Yes

Note: Key tasks of the SharePoint admin

Here are some of the key tasks users can do when they are assigned to the SharePoint admin role:

Create sites

Delete sites

Manage sharing settings at the organization level

Add and remove site admins

Manage site storage limits

Box 2: No

File1.txt contains 3 IP addresses.

Box 3: Yes

File2.docx contains only 1 IP address.
