

Official Nutanix NCP-EUC Study Guide - Flexible NCP-EUC Testing Engine

BONUS!!! Download part of Easy4Engine NCP-EUC dumps for free: https://drive.google.com/open?id=1Bbmy_7Uh6ngNq6U-DNbWIH429jhfl9ug

To be out of the ordinary and seek an ideal life, we must master an extra skill to get high scores and win the match in the workplace. Contemporarily, social competitions stimulate development of modern science, technology and business, which revolutionizes our society's recognition to NCP-EUC Exam and affect the quality of people's life. Our NCP-EUC exam question can help make your dream come true. What's more, you can have a visit of our website that provides you more detailed information about the NCP-EUC guide torrent.

Constantly updated multiple mock exams with a great number of questions that will help you in better self-assessment. Memorize all your previous Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam (NCP-EUC) exam questions attempts and display all the changes in your results at the end of each Nutanix NCP-EUC Practice Exam attempt. Users will be able to customize the Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam (NCP-EUC) practice test software by time or question types. Supported on all Windows-based PCs.

>> **Official Nutanix NCP-EUC Study Guide** <<

Complete Study Guide your ultimate companion for NCP-EUC Prep

Our NCP-EUC guide questions are compiled and approved elaborately by experienced professionals and experts. The download and tryout of our NCP-EUC torrent question before the purchase are free and we provide free update and the discounts to the old client. Our customer service personnel are working on the whole day and can solve your doubts and questions at any time. Our online purchase procedures are safe and carry no viruses so you can download, install and use our NCP-EUC Guide Torrent safely.

The NCP-EUC certification exam is a challenging exam that requires a strong understanding of Nutanix VDI solutions. NCP-EUC exam is designed to test the candidate's skills and knowledge on Nutanix VDI solutions, including how to configure and manage Nutanix VDI solutions, how to troubleshoot VDI issues, and how to optimize VDI performance. Candidates who pass the NCP-EUC Certification Exam will have a deep understanding of Nutanix VDI solutions and will be able to provide expert advice to their customers on the design and implementation of Nutanix VDI solutions.

Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam Sample Questions (Q154-Q159):

NEW QUESTION # 154

In a VMware Horizon environment running on Nutanix, an administrator has noticed that create, start, shut down, and delete operations are taking longer than expected, the environment is currently configured with one vCenter instance and has 10,000 virtual desktops. What is the recommended number of vCenter instances in this configuration?

- A. 0
- **B. 1**
- C. 2
- D. 3

Answer: B

Explanation:

vCenter can execute approximately 640 concurrent operations before incoming requests are queued, and can support up to 2,000 concurrent sessions¹. VMware Horizon 8 can support up to 120,000 active sessions in a Cloud Pod Architecture pod federation²³. Therefore, if the environment has 10,000 virtual desktops, one vCenter instance might not be enough to handle all the operations and sessions efficiently. The recommended number of vCenter instances in this configuration is B (2).

NEW QUESTION # 155

An administrator has been tasked with deploying different applications to different user groups in the environment, while minimizing storage impact. Some applications are web-based, while some require traditional installations. Which method would best meet the goals?

- A. Implement Nutanix Flow and an ID-based VDI Security Group.
- B. Share a common desktop image containing all applications.
- C. Deploy necessary applications via GPO when users login.
- **D. Use Citrix App Layering and deploy an ELM virtual appliance.**¹

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract of Nutanix End User Computing documents:

According to Citrix App Layering on Nutanix reference architectures:

* Minimizing Storage: Citrix App Layering allows an administrator to capture applications in separate virtual disks ("App Layers") that are stored once and then dynamically merged with a base OS layer to create layered images.² This avoids the storage bloat of installing every application into a single "Gold Image" or creating dozens of unique images for every department.

* ELM Role: The Enterprise Layer Manager (ELM) is the virtual appliance required to manage this layering environment.³ It orchestrates the creation of layers and the publishing of images.

* Targeting User Groups: By using Elastic Layering (a feature of App Layering), specific app layers can be delivered to users based on their Active Directory group membership at login, fulfilling the requirement to deploy "different applications to different user groups" without installing them permanently in the base image.

NEW QUESTION # 156

A company has decided to use Citrix Optimizer tool to prepare their gold image.

Which two actions does Optimizer take to improve the gold image creation process? (Choose two.)

- A. Optimizes storage capacity usage.
- B. Applies best practices for securing virtual desktops.
- **C. uses built-in templates to perform optimizations.**
- **D. Optimizes user environments for better performance**

Answer: C,D

Explanation:

The Citrix Optimizer tool is used to prepare Windows operating system images for use in a virtual desktop environment. Some of the actions that it takes to improve the gold image creation process include:

Optimizes user environments for better performance: The tool removes unnecessary or redundant services, features, and applications from the image, which can improve performance and reduce resource usage.

Uses built-in templates to perform optimizations: The tool comes with pre-configured templates that are optimized for specific environments, such as virtualdesktops or server workloads. These templates can be customized based on the specific needs of the organization.

NEW QUESTION # 157

An administrator needs to deploy virtual desktops to a Hyper-V Nutanix cluster with writable differencing disks. The administrator will use read only master image with clones that link back to the image.

Which native feature will the cluster use to complete this task?

- A. Compression
- **B. Shadow Clones**
- C. VM Flash Mode
- D. Oplog

Answer: B

Explanation:

The feature in Nutanix that would be used to complete the task of deploying virtual desktops to a Hyper-V Nutanix cluster with writable differencing disks using a read-only master image with clones that link back to the image is Shadow Clones. Shadow Clones allow for the creation of a snapshot or a clone of a VM that uses the original VM's disks as read-only, and only writes changes to a separate differencing disk. This is useful when deploying virtual desktops as it can reduce storage requirements and improve performance.

Nutanix shadow clones are a feature that enables distributed caching of virtual disks (vDisks) that are in a multi-reader scenario. This can improve performance and reduce network traffic for scenarios such as VDI or private clone boot storms¹

NEW QUESTION # 158

Users are being prompted to restart their non-persistent desktops in the middle of the day.

which setting in the gold image would cause this to occur?

- A. Java automatically checks for updates every 24 hours.
- B. The mandatory Windows profile is set to v4,
- C. The power profile turns the screen off after 10 minutes.
- **D. Windows Update policy is set to Automatic.**

Answer: D

Explanation:

non-persistent VDI machines are deleted when they are rebooted, logged off, or shut down. Therefore, Windows Update policy should be configured to prevent automatic updates that may trigger a restart on these machines¹.
