

Wonderful CDCP Learning Questions: Certified Data Centre Professional (CDCP) are form the latest Exam Brain Dumps - ActualtestPDF

P.S. Free 2026 EXIN CDCP dumps are available on Google Drive shared by ActualtestPDF: <https://drive.google.com/open?id=1djPM07J-KckDVmZ6RodFW-0qLakYzAha>

If you want to pass the exam quickly, our CDCP practice engine is your best choice. We know that many users do not have a large amount of time to learn. In response to this, we have scientifically set the content of the CDCP exam questions. On one hand, we have collected the most important keypoints which will definitely show up in the real exam to the content of the CDCP learning guide. On the other hand, we have simplified the content and make it better to be understood by all of the customers.

EXIN CDCP Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Power Infrastructure: It focuses ATS and STS systems, redundancy levels and techniques, static and dynamic UPS systems, battery types, thermo-graphics, and renewable energy factor (REF).
Topic 2	<ul style="list-style-type: none"> Equipment Racks: It discusses power rail strip options, security considerations, and rack standards, properties and selection criteria.
Topic 3	<ul style="list-style-type: none"> Physical Security and Safety: Sub-topics are about physical security considerations and physical safety considerations.
Topic 4	<ul style="list-style-type: none"> Auxiliary Systems: The topic covers water leak detection systems, data centre monitoring requirements, EMS, BMS and DCIM.
Topic 5	<ul style="list-style-type: none"> Water Supply: This topic is all about water supply techniques and application areas.
Topic 6	<ul style="list-style-type: none"> Light: This topic covers light fixture types and placement, emergency lighting, and emergency Power Supply (EPS).
Topic 7	<ul style="list-style-type: none"> Fire Safety Protection: This topic gives an understanding of standards for fire suppression, detection systems, total flooding fire suppression techniques, and handheld extinguishers. Additionally, it covers Signage and safety.
Topic 8	<ul style="list-style-type: none"> Electro Magnetic Fields: The topic deals with effects of EMF on human health and equipment (H)EMP, standards, and EMF shielding solutions.

Topic 9	<ul style="list-style-type: none"> • Raised Floor • Suspended Ceiling: The topic discusses applicable standards, signal reference grid, and disability act and regulations.
Topic 10	<ul style="list-style-type: none"> • Designing a Scalable Network Infrastructure: It covers ANSI • TIA-942 cabling hierarchy, network redundancy, structured Cabling System, and planning considerations.

CDCP study materials - EXIN CDCP dumps VCE

Many clients worry that after they bought our CDCP exam simulation they might find the exam questions are outdated and waste their time, money and energy. There are no needs to worry about that situation because our CDCP study materials boost high-quality and it is proved by the high passing rate and hit rate. And we keep updating our CDCP learning quiz all the time. We provide the best CDCP practice guide and hope our sincere service will satisfy all the clients.

EXIN Certified Data Centre Professional (CDCP) Sample Questions (Q30-Q35):

NEW QUESTION # 30

Which one of the following is an Objective of Data Center Fire Protection?

- A. Representation
- B. Information
- C. Depression
- **D. Suppression**

Answer: D

Explanation:

The objective of data center fire protection is to suppress or extinguish a fire before it can cause significant damage to the equipment, personnel, or business continuity. Fire suppression systems are designed to reduce the heat, oxygen, or fuel elements of the fire triangle, and to limit the spread of fire and smoke. Fire suppression systems can be classified into two types: water-based and gas-based. Water-based systems include sprinklers, mist, and water spray systems, which use water as the extinguishing agent. Gas-based systems include inert gas, halocarbon, and clean agent systems, which use gases or chemicals as the extinguishing agent. The choice of fire suppression system depends on several factors, such as the fire risk, the type of fuel, the environmental impact, the reliability, the cost, and the compatibility with the data center equipment and operations.

NEW QUESTION # 31

How many monitoring points should be used in Temperature Measurement?

- A. 0
- B. 1
- **C. 2**
- D. 3

Answer: C

Explanation:

According to the EPI Data Centre Professional (CDCP) Reference Materials, the recommended number of monitoring points for temperature measurement in a data centre is 3 per rack: one at the top, one at the middle, and one at the bottom. This is to ensure that the temperature distribution within the rack is uniform and within the acceptable range for the equipment. The temperature sensors should be placed at the front of the rack, where the air enters the equipment, and not at the back, where the hot air exits.

NEW QUESTION # 32

Which one of the following is a factor that can affect Availability and Reliability?

- A. Inadequate Cooling
- B. Attenuation
- C. Radio Active Waves
- D. Employee Salaries

Answer: A

Explanation:

Availability and reliability are two important aspects of data centre performance that measure how often the system is operational and how dependable it is. According to the EPI Data Centre Framework, availability is the percentage of time that a system or component is in an operable state, while reliability is the probability that a system or component will perform its required function under given conditions for a specified period of time. Both availability and reliability can be affected by various factors, such as design, maintenance, human error, power supply, security, etc. One of the factors that can have a significant impact on both availability and reliability is cooling. Cooling is essential for maintaining the optimal temperature and humidity levels for the IT equipment and preventing overheating, which can cause failures, downtime, and reduced lifespan.

Inadequate cooling can result from insufficient capacity, poor airflow management, faulty components, or environmental conditions. Inadequate cooling can reduce the availability and reliability of the data centre by increasing the risk of thermal stress, hot spots, performance degradation, and equipment damage. Therefore, cooling is a critical factor that can affect availability and reliability in a data centre.

NEW QUESTION # 33

New server equipment is arriving at your data centre, where should it be tested?

- A. In the Holding area
- B. In the Computer! Server room
- C. In the Staging room
- D. In the Media storage area

Answer: C

Explanation:

New equipment should be unpacked, tested, and configured in a dedicated staging room before being moved to the live data hall to prevent contamination and disruptions.

NEW QUESTION # 34

Which one of the following is a Natural Disaster?

- A. Human Error
- B. Blackouts
- C. Grid Failure
- D. Hurricanes

Answer: D

Explanation:

According to the CDCP® Preparation Guide, a natural disaster is a catastrophic event that is caused by natural forces and has a significant impact on human lives, property, and environment. Hurricanes are examples of natural disasters, as they are powerful storms that form over warm ocean waters and produce strong winds, heavy rain, storm surges, and flooding. Grid failure, blackouts, and human error are not natural disasters, but rather man-made or technological disasters that result from failures or errors in human systems or activities.

NEW QUESTION # 35

.....

A good CDCP certification must be supported by a good CDCP exam practice, which will greatly improve your learning ability and effectiveness. Our study materials have the advantage of short time, high speed and high pass rate. You only take 20 to 30 hours to practice our CDCP Guide materials and then you can take the exam. If you use our study materials, you can get the CDCP certification by spending very little time and energy reviewing and preparing.
