Salesforce Certified Administrator Sample Questions (Q87-Q92):

NEW QUESTION # 87

Support agent at Cloud Kicks are spending too much time finding resources to solve cases. The agents need a more efficient way to find documentation and similar cases from the Case page layout. How should an administrator meet this requirement?

- A. Create a custom object to capture popular case resolutions.
- **B. Configure Knowledge with articles and data categories.**
- C. Direct users to Global Search to look for similar cases.
- D. Use an interview flow to capture Case details.

Answer: B

Explanation:

Explanation

Knowledge is a feature that can be used to meet this requirement. Knowledge allows users to create, manage, and share articles that provide information and solutions for common issues or questions. Data categories can be used to organize articles into different topics and make them easier to find and access. Users can view related articles from the Case page layout based on the data category of the case. References:

NEW QUESTION # 88

Cloud Kicks (CK) has new administrator who is asked to put together a memo detailing salesforce uses to budget for upcoming license purchases.

Where Should the administrator go to find out what type of licenses CK Has purchased and how many are available.

- **A. User Licenses Related List in Company information.**
- B. Usage based entitlement related list in company information.
- C. User Management settings in setup.
- D. Search for licenses types in setup.

Answer: A

Explanation:

Explanation

The User Licenses related list in Company Information shows the types of licenses that have been purchased for an org and how many are available or used. It also shows the expiration date of each license type if applicable. This information can help administrators plan for license purchases and manage user access.

Searching for license types in setup does not show how many licenses have been purchased or how many are available or used.

User Management settings in setup does not show license information either, but rather settings related to user login, session, identity, etc. Usage-based entitlement related list in company information shows information about usage-based licenses such as API requests or sandboxes, but not user licenses.

NEW QUESTION # 89

A sales rep has left the company and an administrator has been asked to re-assign all their accounts and opportunities to a new sales rep and keep the teams as is.

Which tool should an administrator use to accomplish this?

- A. Data loader.io
- B. Data Loader
- **C. Mass Transfer Tool**
- D. Data Import Wizard

Answer: C

NEW QUESTION # 90

Northern Trail outfitters has hired interns to enter Leads into Salesforce and has requested a way to identify these new records from existing Leads.

What approach should an administrator take to meet this requirement?

- A. Define a record type and assign it to the interns.
- B. Update the active Lead Assignment Rules.
- C. Set up Web-to-Lead form the interns use.
- D. Create a separate Lead Lightning App.

Answer: A

Explanation:

Explanation

To identify new leads entered by interns from existing leads, the administrator should define a record type and assign it to the interns. This will allow them to select a different record type when creating leads, and distinguish them from other leads based on record type. Setting up Web-to-Lead form will not work if the interns are entering leads manually in Salesforce. Creating a separate Lead Lightning App or updating the active Lead Assignment Rules will not affect lead identification. NEW QUESTION # 91

Which tool should an administrator use to review recent configuration changes made in their org?

- A. Debug logs
- B. Setup Audit Trail
- C. Field History Tracking
- D. Critical Updates

Answer: B

NEW QUESTION # 92
