Die The Open Group OGEA-103 Zertifizierungsprüfung sind jedem IT-Fachmann sehr wichtig. Solange Sie das OGEA-103 Zertifikat bekommen, werden Sie im Beruf sicher nicht aussondert. Sie werden befördert und ein höheres Gehalt beziehen. Mit diesem Zertifikat können Sie alle bekommen, was Sie wünschen. Die Fragenpool zur The Open Group OGEA-103Zertifizierungsprüfung von ZertPruefung sind die Ressourcen zum Erfolg. Mit diesen Schulungsmaterialien werden Sie den Schritt zum Erfolg beschleunigen. Sie werden sicher mehr selbstbewusster.

Die OGEA-103-Prüfung richtet sich an Personen, die ihr Wissen und ihr Fachwissen im TOGAF-Framework demonstrieren möchten. Es deckt sowohl die grundlegenden Konzepte als auch die fortgeschrittenen Themen im Zusammenhang mit der Unternehmensarchitektur ab. Die Prüfung besteht aus Multiple-Choice-Fragen und wurde entwickelt, um das Verständnis des Kandidaten für das TOGAF-Framework, seine Komponenten und ihre Beziehungen zu testen. Das Bestehen der OGEA-103-Prüfung zeigt, dass der Kandidat ein gründliches Verständnis des TOGAF-Frameworks hat und sie auf reale Situationen anwenden kann. Diese Zertifizierung kann Möglichkeiten für den beruflichen Aufstieg eröffnen und die Glaubwürdigkeit als Unternehmensarchitekt verbessert.

## OGEA-103 Online Tests & OGEA-103 Zertifizierung

Die The Open Group OGEA-103 Zertifizierungsprüfung ist heutzutage in der konkurrenzfähigen IT-Branche immer beliebter geworden. Immer mehr Leute haben die The Open Group OGEA-103 Prüfung abgelegt. Aber ihre Schwierigkeit nimmt doch nicht ab. Es ist schwer, die The Open Group OGEA-103 Prüfung zu bestehen, weil sie sowieso eine autoritäre Prüfung ist, die Computerfachkenntnisse und die Fähigkeiten zur Informationstechnik prüft. Viele Leute haben viel Zeit und Energie auf die The Open Group OGEA-103 Zertifizierungsprüfung aufgewendet.

## The Open Group TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam OGEA-103 Prüfungsfragen mit Lösungen (Q129-Q134):

### 129. Frage

Which of the following supports the need to govern Enterprise Architecture?

- A. Best practice governance enables the organization to control value realization
- B. The Architecture Project mandates the governance of the target architecture
- C. The Stakeholders preferences may go beyond the architecture project scope and needs control
- D. The TOGAF standard cannot be used without executive governance

Antwort: A

Begründung:

This statement best supports the need to govern Enterprise Architecture. Best practice governance enables the organization to control value realization by ensuring that architectures are aligned with the enterprise's strategy and objectives, meet the quality and performance requirements, and deliver the expected benefits and outcomes. The Architecture Project does not mandate the governance of the target architecture, but rather follows the governance framework established by the enterprise. The TOGAF standard can be used without executive governance, but it is recommended that executive sponsorship and support are obtained for successful architecture development and transition. The Stakeholders preferences may go beyond the architecture project scope and need control, but this is not the primary reason for governing Enterprise Architecture. Reference: The TOGAF Standard | The Open Group Website, Section 3.3.6 Architecture Governance.

### 130. Frage

Complete the following sentence. In the ADM, documents which are under development and have not undergone any formal review and approval process are called \_\_\_\_\_ Documents which have been reviewed and approved are called \_\_\_\_\_

- A. "concept" - "deliverable"
- B. "Version 0.1" - "Version 1.0"
- C. "draft" - "approved"
- D. "draft" - "finalized"

Antwort: C

Begründung:

According to the TOGAF Standard, 10th Edition, documents which are under development and have not undergone any formal review and approval process are called draft documents, while documents which have been reviewed and approved are called approved documents 1. Draft documents are typically marked with a version number of 0.x, indicating that they are incomplete or provisional. Approved documents are typically marked with a version number of 1.0 or higher, indicating that they have been finalized and authorized. The other options are not correct, as they are not the terms used by the TOGAF Standard to distinguish between documents under development and documents that have been reviewed and approved. The terms "finalized", "concept", "deliverable", and "Version 0.1" and "Version 1.0" are not specific to the TOGAF Standard, and they may have different meanings or interpretations in different contexts. References: 1: TOGAF Standard, 10th Edition, Part II: Architecture Development Method, Chapter 7: Applying Iteration to the ADM, Section 7.2.3 Document Categorization.

### 131. Frage

Consider the following descriptions of deliverables consumed and produced across the TOGAF ADM cycle.

General rules and guidelines, intended to be enduring and seldom amended, that inform and support the way in which an organization sets about fulfilling its mission

The joint agreements between development partners and sponsors on the deliverables, quality, and fitness-for-purpose of an architecture.

A document that is sent from the sponsoring organization to the architecture organization to trigger the start of an architecture development cycle

A set of quantitative statements that outline what an implementation project must do in order to comply with the architecture.

Which deliverables match these descriptions?

- A. Architecture Contracts - 2 Architecture Requirements Specification - 3 Architecture Vision - 4 Architecture Principles
- B. Architecture Principles -2 Architecture Contracts - 3 Request for Architecture Work - 4 Architecture Requirements Specification
- C. Architecture Principles -2 Architecture Contracts - 3 Architecture Requirements Specification-4 Request for Architecture Work Explanation According to the TOGAF standard, the deliverables that match the descriptions are as follows:
- D. Architecture Requirements Specification -2 Architecture Principles - 3 Architecture Vision - 4 Architecture Contracts

Antwort: A

Begründung:

1 Architecture Principles: These are general rules and guidelines, intended to be enduring and seldom amended, that inform and support the way in which an organization sets about fulfilling its mission1. They reflect a level of consensus among the various

elements of the enterprise, and form the basis for making future IT decisions<sup>1</sup>.

2 Architecture Contracts: These are the joint agreements between development partners and sponsors on the deliverables, quality, and fitness-for-purpose of an architecture<sup>2</sup>. They are used to ensure that the architecture is implemented and governed according to the agreed-upon specifications and standards<sup>2</sup>.

3 Request for Architecture Work: This is a document that is sent from the sponsoring organization to the architecture organization to trigger the start of an architecture development cycle<sup>3</sup>. It defines the scope, schedule, budget, deliverables, and stakeholders of the architecture project<sup>3</sup>.

4 Architecture Requirements Specification: This is a set of quantitative statements that outline what an implementation project must do in order to comply with the architecture<sup>4</sup>. It defines the requirements for each architecture domain, as well as the relationships and dependencies among them<sup>4</sup>.

References: 1: Architecture Principles 2: Architecture Contracts 3: Request for Architecture Work 4: Architecture Requirements Specification

### 132. Frage

Which section of the TOGAF template for Architecture Principles should describe the relationship to other principles?

- A. Statement
- B. Rationale
- C. Name
- **D. Implications**

**Antwort: D**

### 133. Frage

Consider the following ADM phases objectives.

ZERTPRÜFUNG IT Zertifizierung gewährleistet, den einfachen Weg!	
1	Ensure that the business value and cost of work packages and Transition Architectures is understood by key stakeholders
2	Ensure conformance with the Target Architecture by implementation projects
3	Ensure that the architecture development cycle is maintained
4	Ensure that the Architecture Governance Framework is executed

Which phase does each objective match?

- A. 1G-2H-3H-4F
- B. 1F-2G-3H-4H
- **C. 1H-2F-3F-4G**
- D. 1F-2G-3G-4H

**Antwort: C**

Begründung:

According to the TOGAF Standard, Version 9.2, the ADM phases and their objectives are as follows<sup>1</sup>:

Preliminary Phase: To prepare and initiate the architecture development cycle, including defining the architecture framework, principles, and governance.

Phase A: Architecture Vision: To define the scope, vision, and stakeholders of the architecture initiative, and to obtain approval to proceed.

Phase B: Business Architecture: To describe the baseline and target business architecture, and to identify the gaps between them.

Phase C: Information Systems Architectures: To describe the baseline and target data and application architectures, and to identify the gaps between them.

Phase D: Technology Architecture: To describe the baseline and target technology architecture, and to identify the gaps between them.

Phase E: Opportunities and Solutions: To identify and evaluate the opportunities and solutions for implementing the target

architecture, and to define the work packages and transition architectures.

Phase F: Migration Planning: To finalize the implementation and migration plan, and to ensure alignment with the enterprise portfolio and project management.

Phase G: Implementation Governance: To provide architecture oversight and guidance for the implementation projects, and to manage any architecture change requests.

Phase H: Architecture Change Management: To monitor the changes in the business and technology environment, and to assess the impact and performance of the architecture.

Requirements Management: To manage the architecture requirements throughout the ADM cycle, and to ensure alignment with the business requirements.

Based on the above definitions, we can match each objective with the corresponding phase as follows:

Objective 1: Ensure that the business value and cost of work packages and transition architectures is understood by key stakeholders. This objective is achieved in Phase H: Architecture Change Management, where the value realization and cost-benefit analysis of the architecture are performed<sup>2</sup>.

Objective 2: Ensure conformance with the Target Architecture by implementation projects. This objective is achieved in Phase F: Migration Planning, where the conformance requirements and criteria for the implementation projects are defined<sup>3</sup>.

Objective 3: Ensure that the architecture development cycle is maintained. This objective is achieved in Phase F: Migration Planning, where the architecture roadmap and iteration cycle are maintained<sup>3</sup>.

Objective 4: Ensure that the Architecture Governance Framework is executed. This objective is achieved in Phase G: Implementation Governance, where the architecture governance processes and procedures are applied to the implementation projects<sup>4</sup>.
