

# Pass Guaranteed 2026 Unparalleled Google Chrome-Enterprise-Administrator: Professional Chrome Enterprise Administrator Certification Exam Hottest Certification

2026 Latest DumpsTorrent Chrome-Enterprise-Administrator PDF Dumps and Chrome-Enterprise-Administrator Exam Engine Free Share: [https://drive.google.com/open?id=1yEKEpIiaV\\_cpJcS3NblPb9GPrQKNq1fT](https://drive.google.com/open?id=1yEKEpIiaV_cpJcS3NblPb9GPrQKNq1fT)

If you just free download the demos of our Chrome-Enterprise-Administrator exam questions, then you will find that every detail of our Chrome-Enterprise-Administrator study braindumps is perfect. Not only the content of the Chrome-Enterprise-Administrator learning guide is the latest and accurate, but also the displays can cater to all needs of the candidates. It is all due to the efforts of the professionals. These professionals have full understanding of the candidates’ problems and requirements hence our Chrome-Enterprise-Administrator training engine can cater to your needs beyond your expectations.

## Google Chrome-Enterprise-Administrator Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Chrome Updates: This section of the exam measures skills of a Chrome IT Policy Analyst and addresses the various update methods available for Chrome. It includes selecting the right update strategy for different business and security needs, managing compliance across platforms, and adapting update methods based on environmental changes or risks.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Analyze Chrome Data: This section of the exam measures skills of a Chrome Data Analyst and focuses on using the Google Admin console to view, analyze, and troubleshoot browser data. It includes reviewing reports, diagnosing browser or update issues, investigating performance problems, and identifying security risks based on log events and Chrome activity.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Manage Chrome Enterprise in the Cloud: This section of the exam measures skills of a Cloud Systems Administrator and focuses on preparing and configuring environments for Chrome cloud management. Candidates must demonstrate how to verify domains, use admin roles, configure organizational structures, deploy enrollment tokens, enable reporting, and maintain Chrome using the Google Admin console.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Chrome Enterprise Management Fundamentals: This section of the exam measures skills of a Chrome Device Administrator and covers the foundational elements of managing Chrome in an enterprise. It includes understanding how policies are applied and resolved, differentiating managed browsers from profiles, and describing how policies work. It also covers Chrome’s built-in security features, how extensions are used and deployed, and how the release cycle and channels are managed.</li> </ul>

Topic 5	<ul style="list-style-type: none"> <li>• <b>Chrome Extensions:</b> This section of the exam measures skills of an Endpoint Security Manager and involves managing Chrome extension policies. It includes designing extension management strategies, handling extension exemptions, creating approval workflows, and assessing extensions for their risk and compliance with business continuity requirements.</li> </ul>

## **Valid Chrome-Enterprise-Administrator Exam Cost, Valid Exam Chrome-Enterprise-Administrator Registration**

DumpsTorrent releases a new high pass-rate Chrome-Enterprise-Administrator valid exam preparation recently. If you are still puzzled by your test you can set your heart at rest to purchase our valid exam materials which will assist you to clear exam easily. We can guarantee purchasing Google Chrome-Enterprise-Administrator Valid Exam Preparation will be the best passing methods and it always help you pass exam at first attempt. Now it is really an opportunity. Stop waiting and hesitate again!

## **Google Professional Chrome Enterprise Administrator Certification Exam Sample Questions (Q38-Q43):**

### **NEW QUESTION # 38**

Chrome Browser Cloud Management has been successfully implemented at a company for the past year. Recently, the engineering team has received feedback from the security team that Chrome browsers are not meeting patching Service Level Agreements (SLAs). In the Insight report, the engineering team sees that 30% of their companies' browsers are pending updates.

Which browser policy could the engineering team implement to ensure better compliance with the security team's patching requirement?

- A. Chrome browser updates
- **B. Auto-update check period**
- C. Google updater policy precedence
- D. Relaunch notification

**Answer: B**

Explanation:

To ensure timely patching, the engineering team should adjust the "Auto-update check period" policy. By shortening this period, Chrome browsers will check for updates more frequently, increasing the likelihood of applying security patches sooner and improving compliance with patching SLAs. "Chrome browser updates" is a general category, "Relaunch notification" affects when users are prompted to restart, and "Google updater policy precedence" deals with the order of policy application, not the frequency of checks.

### **NEW QUESTION # 39**

Company A uses an extension that is critical to business operations. The company currently pins the version of the extension. They received an updated version of the extension that delivers new functionality. The Chrome administrator notices that the new version now requests all available permissions, while the previous version only requested four permissions. Which action should the Chrome administrator recommend to address this security issue?

- **A. Block the extension until a new version is available that requires fewer permissions**
- B. Customize permissions for the extension to match the permissions of the previous version
- C. Use the extension's blocked hosts list to block access to risky websites
- D. Continue using version pinning until the company contacts the developer for more information on the code change

**Answer: A**

Explanation:

A significant increase in requested permissions in a new version of a critical extension poses a security risk. The most prudent action is to block the updated extension until the administrator can verify the necessity of the new permissions or

until a less permissive version is released. Version pinning (option D) only delays the issue and doesn't address the potential risk in the new version. Blocking specific hosts (option A) doesn't limit the extension's overall capabilities. Customizing permissions (option C) is generally not possible for Chrome extensions managed through the Google Admin console.

#### NEW QUESTION # 40

An organization experiences a recent surge in account takeovers and suspicious activity. Upon investigation, a security team discovers that employees are falling victim to infostealer malware specifically designed to target Chrome browser cookies. This malware is spreading through phishing emails and compromised websites, and it is capable of stealing session cookies, login credentials, and other sensitive information stored in the browser. Which measure can an administrator implement using Chrome Enterprise Core to mitigate the risks posed by cookie theft?

- A. Invalidate user's session cookies and tokens by resetting the sign-in cookies from the Google Admin console
- B. Disallow Chrome Sync and Require Incognito mode
- C. **Require Enhanced Safe Browsing and enable Application Bound Encryption**
- D. Block the use of third-party cookies

**Answer: C**

Explanation:

To combat cookie theft from infostealer malware, requiring "Enhanced Safe Browsing" provides proactive protection against malicious websites and downloads that might distribute such malware. Enabling "Application Bound Encryption" adds an extra layer of security to cookies and other sensitive data stored by Chrome, making them harder for malware to use even if stolen. Blocking third-party cookies (option A) can improve privacy but doesn't directly prevent malware from stealing first-party session cookies. Invalidating existing cookies (option C) is a reactive measure and doesn't prevent future theft. Disallowing Chrome Sync and requiring Incognito mode (option D) changes user behavior but doesn't inherently protect against malware on the local machine.

#### NEW QUESTION # 41

How often do extensions update?"

- A. Extensions update immediately whenever the developer publishes a new version to the Chrome Web Store, regardless of whether Chrome is running
- B. When Chrome is not running, the update occurs within the first few minutes of OS loading and then again every few hours when a new version is available in the Chrome Web Store, even when Chrome is not running
- C. Extensions only update when the user manually initiates the update process from the Chrome Web Store's extension management page
- D. **When Chrome is running, the update occurs within the first few minutes of launching Chrome and then again every few hours. Updates occur when users sign into the Chrome Web Store**

**Answer: D**

Explanation:

Chrome checks for extension updates periodically when the browser is running. This check typically happens within the first few minutes of launching Chrome and then again every few hours. While updates are triggered by developers publishing to the Chrome Web Store, the actual update on the user's browser happens when Chrome is active and performs these periodic checks. Option A is incorrect as extensions generally don't update when Chrome is not running. Option C describes a manual update process, which is not the default behavior. Option D is incorrect because the update on the user's end is dependent on Chrome being active and checking for updates.

#### NEW QUESTION # 42

Users in the organization report that browsers force a restart after a new update has been downloaded, which interrupts their work day. What could an engineer do to improve the experience while maintaining security?

- A. Change Chrome browser updates to only occur when a user checks
- B. Add a quiet period to the Relaunch notification
- C. Set the auto update check policy to occur during core work hours
- D. **Create a relaunch window in Relaunch notification**
