The SC-400 exam preparation calls for a strong preparation and precise Microsoft SC-400 practice material.

Microsoft Information Protection Administrator Sample Questions (Q264-

Q269):

NEW QUESTION # 264

You have a Microsoft 365 E5 subscription that contains the users shown in the following table.

☐ The subscription contains the information barrier segments shown in the following table.

☐ The subscription contains the Microsoft SharePoint Online sites shown in the following table.

☐ For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 265

You have a Microsoft 365 tenant that uses records management.

You use a retention label to mark legal files stored in a Microsoft SharePoint Online document library as regulatory records.

What can you do to the legal files?

- A. Edit the properties of the files.
- B. Rename the files.
- C. Copy the content of the files.
- D. Change the retention label of the files.

Answer: C

Explanation:

When content is declared a regulatory record, restrictions are placed on the items in terms of what actions are allowed or blocked.

Most actions are blocked except:

- Copy
- Open/Read
- Move within container

Note: Containers include SharePoint document libraries, OneDrive accounts, and Exchange mailboxes.

Note:

There are several versions of this question in the exam. The question has two possible correct answers:

1. Move the files to a different folder within the document library.
2. Copy the content of the files.

Other incorrect answer options you may see on the exam include the following:

1. Change the retention label of the files.
2. Rename the files.

NEW QUESTION # 266

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are configuring a file policy in Microsoft Cloud App Security.

You need to configure the policy to apply to all files. Alerts must be sent to every file owner who is affected by the policy. The policy must scan for credit card numbers, and alerts must be sent to the Microsoft Teams site of the affected department.

Solution: You use the Built-in DLP inspection method and send alerts as email.

Does this meet the goal?

- A. No
- B. Yes

Answer: A

Explanation:

Explanation

Alerts must be sent to the Microsoft Teams site of the affected department. A Microsoft Power Automate playbook should be used.

NEW QUESTION # 267

You have a Microsoft 365 E5 subscription.

Your company has two departments named department1 and department2.

You configure an information barrier (IB) policy that prevents communication between the users in department1 and department2.

You discover that a user named User1 in department1 can still communicate with the users in department2. You validate that the policy works properly for all other users.

You need to ensure that User1 cannot communicate with the department2 users.

What should you modify?

- A. the IB segments
- **B. the user account attributes of User1**
- C. the group assignments of User1
- D. the IB policy

Answer: B

Explanation:

NEW QUESTION # 268

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 tenant and 500 computers that run Windows 10. The computers are onboarded to the Microsoft 365 compliance center.

You discover that a third-party application named Tailspin_scanner.exe accessed protected sensitive information on multiple computers. Tailspin_scanner.exe is installed locally on the computers.

You need to block Tailspin_scanner.exe from accessing sensitive documents without preventing the application from accessing other documents.

Solution: From the Microsoft 365 Endpoint data loss prevention (Endpoint DLP) settings, you add the application to the unallowed apps list.

Does this meet the goal?

- **A. Yes**
- B. No

Answer: A

Explanation:

Unallowed apps is a list of applications that you create which will not be allowed to access a DLP protected file.
