The pass rate is 98% for C_SEC_2405 exam materials, you can pass you exam by using C_SEC_2405 exam materials, otherwise we will give you refund. In addition, C_SEC_2405 learning materials have both quality and the quantity, and they will be enough for you to pass the exam. You can obtain the download link and password for C_SEC_2405 Exam Braindumps within ten minutes, so that you can begin your preparation as early as possible. We have online and offline service, and if you have any questions for C_SEC_2405 exam materials, you can consult us, and we will give you reply as soon as possible.

SAP Certified Associate - Security Administrator Sample Questions (Q41-Q46):

NEW QUESTION # 41
Which of the following are SAP Fiori Launchpad functionalities? Note: There are 2 correct answers to this question.

- A. SAP GUI
- B. Spaces
- C. Web Dynpro
- D. User Actions Menu

Answer: B,D

Explanation:
* Context:SAP Fiori Launchpad provides a unified and customizable user interface for accessing Fiori applications.
* Solution Descriptions:
* A. Spaces:Allow the structuring of content in a user-friendly manner.
* D. User Actions Menu:Enables user-specific actions such as changing passwords or managing settings.
SAP Security References:
* SAP Fiori Launchpad Configuration Guide
* SAP Help Portal for Fiori Launchpad Features

NEW QUESTION # 42
Which of the following are SAP Fiori Launchpad functionalities? Note: There are 2 correct answers to this question.

- A. SAP GUI
- B. Spaces
- C. Web Dynpro
- D. User Actions Menu

Answer: B,D

NEW QUESTION # 43
What must you do before you can use transaction PFCG? Note: There are 2 correct answers to this question.

- A. Set the system profile parameter auth/no_check_in_some_cases to N.
- B. Set the system profile parameter auth/no_check_in_some_cases to Y.
- C. Fill tables USOBT and USOBX with the SAP-delivered authorization default values.
- D. Fill tables USOBT_C and USOBX_C with the SAP-delivered authorization default values.

Answer: B,C

Explanation:
Before using transaction PFCG (Role Maintenance) in SAP systems, two prerequisites must be met. First, tables USOBT (Authorization Object Defaults) and USOBX (Check Indicators) must be filled with SAP- delivered authorization default values, which provide the standard authorization objects and check indicators for transactions. These tables, maintained via transaction

SU25, ensure that PFCG can propose appropriate authorizations when building roles. Second, the system profile parameter auth/no_check_in_some_cases must be set to Y, enabling the system to bypass authorization checks for certain transactions, which is necessary for PFCG to function correctly during role creation and maintenance. Setting this parameter to N would enforce stricter checks, potentially restricting PFCG functionality. Tables USOBT_C and USOBX_C are customer- specific and not required for initial PFCG setup, as they store customized values rather than SAP defaults.

These steps ensure that PFCG operates effectively, supporting secure and efficient role management in SAP environments.

NEW QUESTION # 44
Your developer has created a new custom transaction for your SAP S/4HANA on-premise system and has provided you a list of the authorizations needed to execute the new ABAP program."What must you do to ensure that each required authorization is automatically created every time this new custom transaction is added to a PFCG role?

- A. Maintain each authorization object in transaction SU24 and set the Default Status to "Yes".
- B. Maintain each authorization in transaction SU24 and set the Default Status to "Yes".
- C. Maintain each authorization object in transaction SU22 and set the Default Status to "Yes".
- D. Maintain each authorization in transaction SU22 and set the Check Indicator value to "Check".

Answer: A

Explanation:
* Context:Transaction SU24 is used to maintain the link between transactions and authorization objects, ensuring automated role generation.
* Solution Explanation:
* By setting theDefault Status to "Yes"in SU24, the system automatically includes required authorizations when the custom transaction is added to a role in PFCG.
SAP Security References:
* SAP SU24 Maintenance Guide
* SAP Custom Transaction Authorization Guidelines

NEW QUESTION # 45
Which of the following user types are excluded from some general password-related rules, such as password validity or initial password? Note: There are 2 correct answers to this question.

- A. Communication
- B. Dialog
- C. System
- D. Service

Answer: C,D

Explanation:
In SAP S/4HANA, Service and System user types are excluded from some general password-related rules, such as password validity periods or initial password requirements. Service Users, often used for web-based access or anonymous logons, do not require frequent password changes or initial password setups, as their access is typically managed via certificates or system configurations, reducing administrative overhead.

System Users, designed for background processes like batch jobs, also bypass these rules, as they are not intended for human interaction and often use system-generated or fixed credentials for automated tasks.

Dialog Users, used for interactive human access, are subject to strict password policies, including validity and initial password requirements, to ensure security. Communication Users, used for machine-to-machine interactions, may have specific authentication mechanisms but are generally subject to password policies unless otherwise configured. Excluding Service and System Users from these rules supports operational efficiency while maintaining security, as their non-interactive nature reduces the need for frequent password management.

NEW QUESTION # 46
......

By overcoming your mistakes before the actual SAP C_SEC_2405 exam, you can avoid making those same errors during the SAP

Certified Associate - Security Administrator (C_SEC_2405) real test. With customizable C_SEC_2405 practice tests, you can adjust the duration and quantity of C_SEC_2405 Practice Questions. This self-assessment C_SEC_2405 exam display your marks, helping you improve your performance while tracking your progress.
