It is easy to get advancement by our B2C-Commerce-Architect study materials. On the cutting edge of this line for over ten years, we are trustworthy company you can really count on.

Salesforce Certified B2C Commerce Architect Sample Questions (Q10-Q15):

NEW QUESTION # 10
A new version of the Page Show controller is required for implementation of Page Deserter specific look. It requires implementation of a specific, cache period for Page Designer pages, which b not currently available in the base Storefront Reference Architecture (SFRA) cache.js module What two steps should the Architect instruct the developer to implement?
Choose 2 answers

- A. Create new Page,js controller in client's cartridge. Extend the code from base and prepend the new cache middleware function to Page-Show route.
- B. Create new Page.js controller in client s cartridge. Copy code from base and modify the Page-Show route to include the new cache middleware function.
- C. Create new ceche,js client's cartridge. Copy cache,js from app_storefront_base and add a function for the Page Designer caching.
- D. Create new cache,js in client's cartridge. Extend cache,js from app_storefront_baseand add a function for the Page Designer caching.

Answer: B,D

Explanation:
To implement a specific cache period for Page Designer pages in SFRA:
* Option A involves creating a new Page.js controller in the client's cartridge, where the existing Page- Show route can be modified to include a custom caching logic. This ensures that the specific caching requirements for Page Designer pages are met without altering the base functionality for other pages.
* Option D calls for extending the existing cache.js module in the client's cartridge to include a function specifically for Page Designer caching. This allows for reusing the existing caching logic while adding enhancements specific to the Page Designer pages, thus maintaining efficiency and clarity in the codebase.
Both options provide a clean, maintainable approach to customizing caching for specific requirements in SFRA, avoiding disruptions in other areas of the site functionality.

NEW QUESTION # 11
Northern Trail Outfitters (NTO) exported all the Account records from Salesforce and used a data transformation tool to clean up values in the phone field using a standardized format. The export file has more than 2 million records. During previous data loads for similar updates on the Account object, NTO did not experience any issues with row lock.
Which feature of Data Loader should be used to load this data back into Salesforce faster?

- A. Bulk API Serial Mode
- B. SOAP API
- C. Bulk API
- D. REST API

Answer: C

NEW QUESTION # 12
Our company is planning an integration with a 3rd party provider to get information about product rating. As an architect you're in charge of the Interface Specification Document so, you requested all needed information to the rating provider.
A few days later you receive an email with the desired information:
URL: http://ratingservice.com/rating/{productID}
User: ratingprovider
Pass: r$afF2!_dA
Select 2 correct answers you should do as an architect after receiving this information:

- A. Use dw.net.HTTPClient to open connection and setProtocol('secure')
- B. Contact service provider and ask to for a URL over HTTPS protocol
- C. Use service Framework and verify service mode is live.
- D. Use service Framework and select service type HTTPS to make connection secure.

Answer: B,C

NEW QUESTION # 13
The Architect has been presented with a requirement from the business to implement a new LINK cartridge.
The current site is built on the Storefront Reference Architecture, and the LINK cartridge is certified for Pipelines and Controllers.
On review, the Architect notes that the Jobs are all created in Pipelines.
How should the Architect implement that cartridge to make sure the required jobs runs property?

- A. The job Pipelines must be updated to work as custom job steps.
- B. The job Pipelines must be removed and recreated with scripts.
- C. The Job Pipelines must be updated to use SiteGenesis Controllers.
- D. The job Pipelines must be updated to useSFRA Controllers.

Answer: A

Explanation:
For integrating a LINK cartridge that is certified for pipelines and controllers into a system using the Storefront Reference Architecture (SFRA), which primarily uses scripts instead of the older pipeline technology, the architect should update the job

pipelines to work as custom job steps. This approach allows the existing LINK cartridge functionalities to be maintained while making them compatible with the SFRA framework. Custom job steps enable more flexibility and the ability to leverage the full capabilities of SFRA, ensuring that the jobs run correctly within the newer architecture.

NEW QUESTION # 14

The Architect has been presented with a requirement from the business to implement a new LINK cartridge.
The current site is built on the Storefront Reference Architecture, and the LINK cartridge is certified for Pipelines and Controllers.
On review, the Architect notes that the Jobs are all created in Pipelines.
How should the Architect implement that cartridge to make sure the required jobs runs property?

- A. The job Pipelines must be removed and recreated with scripts.
- B. The Job Pipelines must be updated to use SiteGenesis Controllers.
- C. The job Pipelines must be updated to use SFRA Controllers.
- D. The job Pipelines must be updated to work as custom job steps.

Answer: A

NEW QUESTION # 15

......
