## AVIXA Certified Technology Specialist Sample Questions (Q166-Q171):

### NEW QUESTION # 166

Assuming a 10' (3 m) ceiling, what is the approximate volume of this room?

- A. 6000 cubic ft (162 m<sup>3</sup>)
- B. 600 cubic ft (17 m<sup>3</sup>)
- C. 300 cubic ft (8.5 m<sup>3</sup>)
- D. 1500 cubic ft (42.5 m<sup>3</sup>)

**Answer: A**

Explanation:

To find the volume of the room, we need to calculate the area of the floor and multiply it by the height of the ceiling. The room has a ceiling-mounted DLP projector and a 10' x 58" ceiling-mounted electric screen. Using standard room dimensions, we estimate the room's length and width to fit the equipment layout proportionally.

Assuming the room dimensions as approximately 20 feet in length and 30 feet in width:

$\text{Volume} = \text{Length} \times \text{Width} \times \text{Height}$

$\text{Volume} = 20 \text{ ft} \times 30 \text{ ft} \times 10 \text{ ft} = 6000 \text{ cubic ft}$

This calculation aligns with the provided options. References:

#### NEW QUESTION # 167

During the site survey, the client indicates that the space that will become a rear projection room is currently an off-white color. What should be recommended to the client?

- A. leave the room as it is
- B. use carpeting on the walls
- C. paint the room gray
- D. paint the room black

**Answer: D**

Explanation:

For a rear projection room, it is recommended to paint the room black. Black walls minimize reflections and ambient light, which can

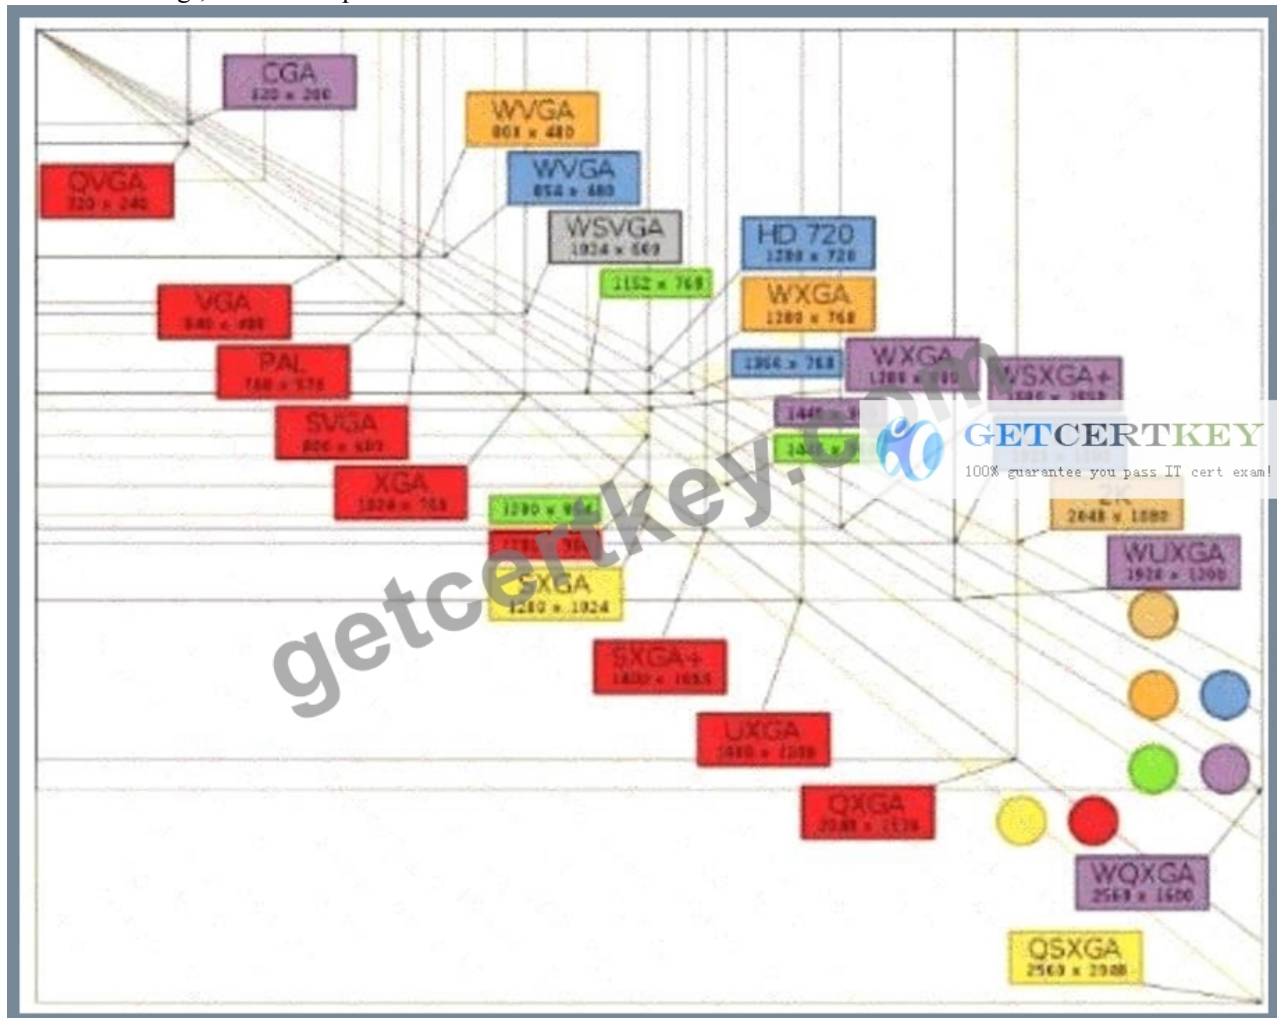

negatively impact the quality of the projected image. By reducing these reflections, the contrast and clarity of the projection are improved, providing a better viewing experience. While gray is also a common choice for minimizing light reflections, black is more effective for creating the optimal environment for projection purposes.

### NEW QUESTION # 168

Based on this image, what is the aspect ratio for WUXGA?

- A. 1.78:1
- B. 2.35:1
- C. 1.6:1
- D. 1.85:1

**Answer: C**

Explanation:

WUXGA stands for Wide Ultra Extended Graphics Array and has a resolution of 1920 x 1200 pixels. To determine the aspect ratio, we divide the width by the height:

$\text{Aspect Ratio} = \frac{1920}{1200} = 1.6:1$  Therefore, the aspect ratio for WUXGA is 1.6:1. This aspect ratio is common for widescreen monitors and provides a wider display format compared to traditional 4:3 screens, enhancing the viewing experience for multimedia content.

### NEW QUESTION # 169

Which of the following terms is defined as a lamp that produces light by heating a filament in a sealed glass housing?

- **A. Incandescent Lamp**
- B. CFL Lamp
- C. LED Lamp
- D. Fluorescent Lamp

**Answer: A**

Explanation:

Incandescent lamps generate light by heating a filament inside a glass enclosure. This process is different from fluorescent, CFL, and LED lamps, which rely on gas discharge or semiconductor technology rather than a heated filament.

#### **NEW QUESTION # 170**

During project delivery and after completion, it is important to ensure correct management of control system code so that

- **A. the most up-to-date version of code is available for upload when required.**
- B. programming costs will be within project budget.
- C. sub-contract programmers submit uncompiled code as per their contract of employment.
- D. other contractors are unable to reuse or edit code.

**Answer: A**

Explanation:

Proper management of control system code during and after project delivery is crucial to ensure that the most current version of the code is always available. This allows for quick and accurate updates, troubleshooting, and maintenance when needed. Ensuring that the latest version of the code is well-documented and accessible helps maintain the integrity of the system and supports efficient operations and future modifications. This practice reduces the risk of running outdated or incorrect code, which can lead to system malfunctions and increased costs.
