## VMware 3V0-32.23 Unparalleled Valid Dumps Questions

Our worldwide after sale staffs will provide the most considerate after-sale service for you in twenty four hours a day, seven days a week, that is to say, no matter you are or whenever it is, as long as you have any question about our 3V0-32.23 exam torrent or about the exam or even about the related certification, you can feel free to contact our after sale service staffs who will always waiting for you on the internet. Wherever you are in the world we will provide you with the most useful and effectively 3V0-32.23 Guide Torrent in this website, which will help you to pass the exam as well as getting the related certification with a great ease.

VMware 3V0-32.23 exam tests your knowledge of various VMware technologies, including vRealize Automation, vRealize Orchestrator, vRealize Operations Manager, and vRealize Log Insight. These technologies are used to automate the management and deployment of virtual infrastructures and applications in a cloud environment. 3V0-32.23 exam also covers topics such as designing and implementing cloud computing architectures, managing cloud services and resources, and integrating with other cloud platforms.

VMware 3V0-32.23 Exam is a rigorous and challenging certification, and passing it requires dedication, hard work, and extensive

preparation. However, achieving this certification can provide numerous benefits, including increased job opportunities, higher salaries, and greater recognition in the industry. Moreover, this certification can help IT professionals stay up-to-date with the latest cloud management and automation trends and technologies.

## VMware Cloud Management and Automation Advanced Design Sample Questions (Q61-Q66):

### NEW QUESTION # 61

The architect for a software defined data center (SDDC) project is implementing a vRealize Automation solution. The company has multiple locations but wants management to be centralized in its main offices. Each of the cities needs to have its own roles to ensure resources, create blueprints and perform daily functions.

Which design recommendation would meet the requirements of this scenario?

- A. Create a tenant for each of the cities and create a single business group for all of the cities.
- B. Create a single tenant for all of the cities and separate the users from the various cities using entitlements.
- C. Create a single business group and separate the users from the various cities using entitlements.
- D. Create a business group for each of the cities and create a single tenant for all of the cities.

**Answer: A**

### NEW QUESTION # 62

What is the primary focus of a Cloud Management logical design?

- A. Outlining the user interface and interaction design.
- B. Designing the overall architecture and integration of cloud management tools.
- C. Determining the connections between different virtual machines.
- D. Defining the physical hardware requirements.

**Answer: B**

### NEW QUESTION # 63

A company's vRealize Automation infrastructure is using replicated storage as well as local storage.

All production virtual machine deployments should be placed into the "Production" folder so that it is on replicated storage. For the company's development environment, all deployments should be placed in the "Development" VM folder so that it is on non-replicated storage.

Which setting should be configured for the production blueprint?

- A. VMware.VirtualCenter= Development
- B. VMware.VirtualCenter.Folder= Development
- C. VMware.VirtualCenter.Folder= Production
- D. VMware.VirtualCenter= Production

**Answer: B**

### NEW QUESTION # 64

An architect is designing a VMware Cloud Management solution for a vSphere-based private cloud with the following requirements: The costs should be visible for all deployments.

A one-time charge must be added only to deployments in the Finance project.

Which two design decisions should the architect include? (Choose two.)

- A. Create a new pricing card for the Cloud Zone used by the Finance project.
- B. Integrate VMware Aria Operations with VMware Aria Automation.
- C. Integrate VMware Aria Automation with VMware Aria Costs powered by CloudHealth.
- D. Create a default pricing card for all unassigned projects.
- E. Create a dedicated pricing card for the Finance project.

**Answer: B,E**
