

Free PDF Quiz Fantastic H12-521_V1.0 - HCIP-Intelligent Vision V1.0 Exam Sample

PassCollection help you to find real Huawei H12-521_V1.0 exam preparation process in a real environment. If you are a beginner, and if you want to improve your professional skills, PassCollection Huawei H12-521_V1.0 exam braindumps will help you to achieve your desire step by step. If you have any questions about the exam, PassCollection the Huawei H12-521_V1.0 will help you to solve them. Within a year, we provide free updates. Please pay more attention to our website.

Huawei H12-521_V1.0 Exam is a challenging exam that requires candidates to have a deep understanding of the latest technologies and trends in the field of intelligent vision. H12-521_V1.0 exam is designed to test the candidate's knowledge and skills in areas such as image processing, video analytics, and machine learning. H12-521_V1.0 Exam also tests the candidate's ability to design, implement, and manage intelligent vision solutions.

Prepare for Your Huawei H12-521_V1.0 Exam with Confidence Using

If candidates want to obtain certifications candidates should notice studying methods. If you do not want to purchase our Huawei H12-521_V1.0 new exam bootcamp materials and just want to study yourself, willpower is the most important. Passing so many exams is really not easy. Reasonable studying methods and relative work experience make you half the work with double the results. H12-521_V1.0 New Exam Bootcamp materials will be a shortcut for you.

Huawei HCIP-Intelligent Vision V1.0 Sample Questions (Q26-Q31):

NEW QUESTION # 26

The GB/T28181 protocol supports active registration, using digital digest-based challenge-response security technology for registration, and authentication should be performed during registration.

- A. True
- B. False

Answer: A

NEW QUESTION # 27

To enable an IVS3800 to provide the intelligent target or vehicle analysis function, which of the following hardware must be configured?

- A. AI accelerator card
- B. NVMe card

- C. T4 GPU
- D. SAS disk

Answer: A

Explanation:

The correct answer is A because the IVS3800 requires dedicated AI accelerator hardware to perform intelligent target analysis and vehicle analysis workloads. These functions rely on inference acceleration, not simply on general-purpose storage hardware. The training content directly links IVS3800 intelligent analysis capability to accelerator-card deployment by stating "Insert a maximum of six Ascend accelerator cards in slots 1 to 6" and then listing service capacities such as "Vehicle analysis ... 360 channels in video mode" and "Object classification ... 360 channels" for the accelerator-enabled configuration. This clearly shows that intelligent analysis capability is enabled by the AI accelerator card.

The other options do not satisfy this requirement. NVMe cards and SAS disks are storage components used for data access, caching, or storage expansion, but they do not provide the AI computing capability needed for intelligent analysis. T4 GPU is not the hardware specified in the material for IVS3800 intelligent target or vehicle analysis. Huawei identifies the Ascend AI accelerator card as the required component. Therefore, A is the correct answer.

NEW QUESTION # 28

Which of the following descriptions about the layered decoupling mechanism of SDC OS are correct? (Multiple choice)

- A. The purpose is to make the software structured and easy to develop, maintain and manage
- B. Based on the public software service layer, provide northbound interface centralized access and security authentication capabilities
- C. Realize software and hardware decoupling based on the basic hardware service layer
- D. Built-in smart applications and algorithm solutions, support the integration of built-in smart applications and third-party algorithms

Answer: A,B,C,D

NEW QUESTION # 29

On the CS POM Portal resource monitoring interface, you can view the running status of nodes and containers.

- A. True
- B. False

Answer: A

NEW QUESTION # 30

Which of the following statements about the IVS3800 are correct?

- A. A system containing only management nodes is allowed.
- B. A management node refers to a server that contains the CSPOM container.
- C. Management nodes can be deployed only in cluster mode.
- D. A service node refers to a server that does not contain the CSPOM container.

Answer: B,C,D

NEW QUESTION # 31

.....

Every one, please pay attention to PassCollection platform. Huawei H12-521_V1.0 exam training is completely designed for the H12-521_V1.0 examination with the high-quality and best accuracy. The questions of the H12-521_V1.0 almost mirror the actual test and cover all most the main contents. Besides, the cost of the H12-521_V1.0 Exam PDF is reasonable and affordable. With the help of the Huawei H12-521_V1.0 study material, your study will be efficiency. 100% pass is a little case for you.
