## PK0-005 Buch, PK0-005 Antworten

Mit der Lernhilfe zur CompTIA PK0-005 Zertifizierungsprüfung von It-Pruefung können Sie die CompTIA PK0-005 Zertifizierungsprüfung ganz mühlos bestehen. Die von uns entworfenen Schulungsinstrumente werden Ihnen helfen, die Prüfung einmalig zu bestehen. Sie können unsere Demo zur CompTIA PK0-005 Zertifizierungsprüfung in It-Pruefung als Probe kostenlos

herunterladen und die CompTIA PK0-005 Prüfung ganz einfach bestehen. Wenn Sie noch zögern, benutzen Sie doch unsere Probeversion. Sie werden sich über ihre gute Wirkung wundern. Schicken Sie doch It-Pruefung in den Warenkorb. Wenn Sie es verpassen, würden Sie lebenslang bereuen.

## CompTIA Project+ Certification Exam PK0-005 Prüfungsfragen mit Lösungen (Q329-Q334):

### 329. Frage

A project team selected a random sample of patient accounts for testing the deliverable. The data was masked since it contained patient names. Which of the following describes this type of data?

- A. Personally identifiable information
- B. Security clearance
- C. Confidential information
- D. Protected health information

**Antwort: A**

Begründung:

Personally identifiable information (PII) is any data that can be used to identify, contact, or locate a specific individual, either alone or combined with other sources. PII includes information such as name, address, phone number, email address, social security number, etc. Patient names are examples of PII, and therefore the data that contains them should be masked or anonymized to protect the privacy and security of the patients.

Confidential information, protected health information, and security clearance are not types of data, but rather categories or levels of data sensitivity that may require different degrees of protection or access control.

### 330. Frage

A key stakeholder recommends to a senior developer that a new feature be added. The new feature is not part of the current requirement documentation. Which of the following is MOST likely happening?

- A. Scope creep
- B. Project change
- C. Decision-making
- D. Collecting requirements

**Antwort: A**

Begründung:

Explanation

Scope creep is most likely happening when a key stakeholder recommends to a senior developer that a new feature be added that is not part of the current requirement documentation. Scope creep is a term that refers to the uncontrolled expansion or change of a project's scope beyond its original boundaries or objectives. Scope creep can happen due to various reasons, such as changing customer demands, unclear or incomplete requirements, poor communication, lack of change control, or stakeholder interference. Scope creep can have negative impacts on a project, such as delays, cost overruns, quality issues, or reduced customer satisfaction<sup>12</sup>

### 331. Frage

An IT intern was assigned to set up workstations as part of a project. The IT intern was very careful to do the task well and initially referred to notes while performing the task. By the end of the two-week rotation, the IT intern no longer needed the notes and completed more set-ups in less time. Which of the following MOST likely represents the observed relationship in this scenario?

- A)
- B)
- C)
- D)

- A. Option A

- B. Option D
- **C. Option C**
- D. Option B

**Antwort: C**

Begründung:  
Explanation

Option C shows a graph that most likely represents the observed relationship in this scenario. The graph shows a learning curve, which is a graphical representation of the relationship between a learner's performance on a task and the number of attempts or time required to complete the task. The learning curve theory proposes that a learner's efficiency in a task improves over time the more the learner performs the task. In this case, the IT intern was able to complete more set-ups in less time as they gained more experience and proficiency over the two-week rotation<sup>12</sup>

### 332. Frage

While managing a project, a PM is assigned to work on a second project. The second project becomes more complex and monopolizes the PM's time. The PM learns that a similarly time-consuming project was executed previously in the organization. Which of the following actions should the PM take?

- A. Perform a root cause analysis.
- B. Organize a stakeholder meeting
- C. Escalate the issue to the CCB
- **D. Contact the PMO for assistance.**

**Antwort: D**

Begründung:  
Explanation

The project manager should contact the project management office (PMO) for assistance after learning that a similarly time-consuming project was executed previously in the organization. A PMO is a department or group within an organization that provides centralized guidance, governance, standards, best practices, resources, and oversight for project management activities. A PMO can help the project manager by providing access to historical data, lessons learned, templates, tools, methodologies, and expertise from previous projects that can be useful for planning and executing the current project.

### 333. Frage

An organization was fined due to an audit finding that revealed a third-party vendor was able to see secured project information in a recently implemented system. Which of the following was the cause of this situation?

- A. Sensitive data was incorrectly classified during the audit process.
- **B. The system is lacking proper access controls.**
- C. The ticket system provided access by default without any approval.
- D. The project manager did not perform proper project planning.

**Antwort: B**

Begründung:

The system is lacking proper access controls if a third-party vendor was able to see secured project information in a recently implemented system that resulted in a fine for the organization. Access controls are security mechanisms that regulate who or what can view, use, or modify data or resources in a system or network. Access controls typically involve authentication and authorization processes that verify the identity and permissions of users or devices before granting them access. Access controls can help to protect data confidentiality, integrity, and availability and prevent unauthorized access, misuse, or theft<sup>12</sup>

### 334. Frage

.....

Wir sind uns darüber klar, dass die IT-Brache ein neuartiges Industriegewesen ist. Sie ist auch eine der Ketten, die die Wirtschaft vorantreiben. Deswegen spielt sie eine gewichtige Rolle und man soll sie nicht ignorieren. Unsere Schulungsunterlagen zur CompTIA
