

# Reliable C-S4PM-2504 Test Preparation | New C-S4PM-2504 Practice Materials

2026 Latest PassReview C-S4PM-2504 PDF Dumps and C-S4PM-2504 Exam Engine Free Share:  
[https://drive.google.com/open?id=1Y9Wm0l5W0DhymlIDCa\\_jwAixjmXmRWwY](https://drive.google.com/open?id=1Y9Wm0l5W0DhymlIDCa_jwAixjmXmRWwY)

Great concentrative progress has been made by our company, who aims at further cooperation with our candidates in the way of using our C-S4PM-2504 exam engine as their study tool. Owing to the devotion of our professional research team and responsible working staff, our C-S4PM-2504 training materials have received wide recognition and now, with more people joining in the C-S4PM-2504 Exam army, we has become the top-raking training materials provider in the international market. we believe our C-S4PM-2504 practice materials can give you a timely and effective helping for you to pass the exam.

## SAP C-S4PM-2504 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Project Management</li><li>Organizational Change Management (OCM): This section of the exam measures the skills of Project Managers and covers the key principles of managing SAP cloud implementation projects, including team coordination, stakeholder communication, and change management. It evaluates the ability to lead project activities, manage expectations, and handle resistance during digital transformation. Emphasis is placed on aligning organizational goals with implementation strategies to ensure effective user adoption and project success.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>SAP Activate Methodology: This section of the exam measures skills of Business Process Architects and covers the structure and practical application of SAP Activate. It includes understanding the phases of the methodology: Discover, Prepare, Explore, Realize, Deploy, and Run, and the use of supporting tools such as SAP Roadmap Viewer and SAP Best Practices. Candidates are expected to demonstrate the ability to apply this methodology to streamline cloud implementation processes and ensure agile delivery.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>SAP S</li><li>4HANA Cloud Public Edition Implementation: This section of the exam measures the skills of Implementation Consultants and covers the foundational aspects of deploying SAP S</li><li>4HANA Cloud Public Edition in a business environment. It focuses on understanding system architecture, scope definition, and the technical and functional setup required for a successful implementation. The candidate is expected to have a strong grasp of how to execute the necessary configuration and adoption tasks that align with customer-specific requirements.</li></ul>

New C-S4PM-2504 Practice Materials & C-S4PM-2504 Exam Questions

We have dedicated staff to update all the content of C-S4PM-2504 exam questions every day. So you don't need to worry about that you buy the materials so early that you can't learn the last updated content. And even if you failed to pass the exam for the first time, as long as you decide to continue to use SAP Certified Associate - Managing SAP S/4HANA Cloud Public Edition Projects torrent prep, we will also provide you with the benefits of free updates within one year and a half discount more than one year. C-S4PM-2504 Test Guide use a very easy-to-understand language.

## **SAP Certified Associate - Managing SAP S/4HANA Cloud Public Edition Projects Sample Questions (Q72-Q77):**

### **NEW QUESTION # 72**

You have created a project-specific deliverable that is not part of the SAP Activate roadmap in SAP Cloud ALM. What must you create to manage all tasks that are related to that deliverable? Note: There are 2 correct answers to this question.

- A. A custom task
- B. A custom release
- C. A custom deliverable
- D. A custom team

**Answer: A,C**

Explanation:

SAP Cloud ALM is the primary tool for managing implementation tasks and deliverables for SAP S/4HANA Cloud Public Edition projects. When a project-specific deliverable is created outside the standard SAP Activate roadmap, additional elements must be defined in SAP Cloud ALM to manage related tasks effectively.

\* Option A: A custom teamIncorrect. A custom team refers to a group of project members assigned to tasks, but it is not directly related to managing tasks for a specific deliverable. The SAP Cloud ALM Documentation states, "Teams in SAP Cloud ALM are used to assign resources to tasks, not to define or manage deliverables."

\* Option B: A custom taskCorrect. Custom tasks are created to define specific activities related to a deliverable. The SAP Cloud ALM Implementation Guide explains, "For project-specific deliverables, custom tasks must be created in SAP Cloud ALM to outline the activities required to complete the deliverable, ensuring traceability and progress tracking."

\* Option C: A custom releaseIncorrect. A custom release is used to manage deployment cycles, not tasks for a specific deliverable. The SAP Cloud ALM Documentation notes, "Releases in SAP Cloud ALM are for planning and executing deployments, not for managing deliverable-specific tasks."

\* Option D: A custom deliverableCorrect. A custom deliverable must be defined in SAP Cloud ALM to represent the project-specific deliverable, and tasks are then associated with it. The SAP Cloud ALM Implementation Guide confirms, "To manage a project-specific deliverable outside the SAP Activate roadmap, a custom deliverable is created in SAP Cloud ALM, with custom tasks linked to it to manage all related activities." Extract from Official Documentation:

\* SAP Cloud ALM Implementation Guide (SAP Help Portal, <https://help.sap.com>): "For deliverables not part of the standard SAP Activate roadmap, a custom deliverable must be created in SAP Cloud ALM."

Custom tasks are then defined and linked to the deliverable to manage all associated activities, ensuring alignment with project objectives."

\* SAP Cloud ALM Documentation (SAP Community, <https://community.sap.com>): "Custom deliverables and tasks in SAP Cloud ALM allow project teams to extend the SAP Activate roadmap, providing flexibility to manage project-specific requirements while maintaining structured task management." Additional Context:

SAP Cloud ALM's flexibility allows project teams to incorporate custom deliverables and tasks, ensuring that unique project requirements are managed within the same platform used for standard roadmap activities. This approach maintains visibility and governance over all project tasks, aligning with SAP's cloud-first project management strategy.

SAP S/4HANA Cloud Study Guide: Explains SAP Cloud ALM usage.

### **NEW QUESTION # 73**

You are implementing SAP S/4HANA Cloud, public edition for your customer. How do you activate the pre- configuration?

- A. SAP Contact Center
- B. Via the Central Business Configuration System
- C. Via the SAP Business Technology Platform

- D. Via the SAP Cloud ALM

**Answer: B**

Explanation:

Activating pre-configuration in SAP S/4HANA Cloud Public Edition involves applying predefined settings, such as SAP Best Practices, to streamline the implementation process. This is managed through a specific configuration tool.

\* Option A: Via the SAP Cloud ALM Incorrect. SAP Cloud ALM is used for project and test management, not for activating pre-configuration. The SAP Cloud ALM Documentation states, "SAP Cloud ALM supports project management and testing, not the activation of pre-configuration, which is handled by configuration tools."

\* Option B: Via the SAP Business Technology Platform Incorrect. SAP BTP is for development and integration, not configuration activation. The SAP BTP Documentation notes, "SAP BTP supports custom extensions, not the activation of pre-configured settings for SAP S/4HANA Cloud."

\* Option C: SAP Contact Center Incorrect. The SAP Contact Center is for support and service, not configuration tasks. The SAP S/4HANA Cloud Study Guide clarifies, "The SAP Contact Center provides customer support, not configuration activation capabilities."

\* Option D: Via the Central Business Configuration System Correct. The Central Business Configuration (CBC) system is used to activate pre-configured settings, such as SAP Best Practices, for SAP S/4HANA Cloud Public Edition. The SAP Central Business Configuration Guide explains, "The Central Business Configuration system is used to activate pre-configuration, including SAP Best Practices, for SAP S/4HANA Cloud Public Edition, enabling rapid setup of the solution." Extract from Official Documentation:

\* SAP Central Business Configuration Guide (SAP Help Portal, <https://help.sap.com>): "In SAP S/4HANA Cloud Public Edition, the Central Business Configuration system is the tool for activating pre-configured settings, such as SAP Best Practices, to streamline the implementation process."

\* SAP S/4HANA Cloud Implementation Guide (SAP Community, <https://community.sap.com>): "Pre-configuration activation, including the application of SAP Best Practices, is performed via the Central Business Configuration system, ensuring a standardized and efficient setup." Additional Context:

The CBC system is a key component of SAP S/4HANA Cloud Public Edition's configuration process, allowing customers to activate pre-configured settings quickly, aligning with the cloud's standardized approach. This reduces implementation time and ensures consistency with SAP Best Practices.

SAP Help Portal: SAP Central Business Configuration Guide (<https://help.sap.com>).

SAP Community: SAP S/4HANA Cloud Implementation Guide (<https://community.sap.com>).

SAP S/4HANA Cloud Study Guide: Details configuration tools.

SAP Activate Methodology: Outlines configuration activation.

**NEW QUESTION # 74**

Which of the following steps are part of the fit-to-standard process? Note: There are 2 correct answers to this question.

- A. Document integration requirements
- B. Design to-be business process models
- C. Review Best Practices process flow
- D. Enable customers on standard business processes

**Answer: C,D**

Explanation:

The Fit-to-Standard process is a cornerstone of the Explore phase in the SAP Activate methodology for SAP S/4HANA Cloud Public Edition implementations. It focuses on validating customer requirements against SAP Best Practices to minimize customizations and align with the cloud mindset.

\* Option A: Enable customers on standard business processes Correct. Enabling customers on standard business processes involves demonstrating and training them on SAP Best Practices during Fit-to-Standard workshops to ensure understanding and adoption. The SAP S/4HANA Cloud Implementation Guide states, "The Fit-to-Standard process includes enabling customers on standard business processes by showcasing SAP Best Practices in the Starter system, fostering alignment with cloud standards."

\* Option B: Design to-be business process models Incorrect. Designing to-be process models occurs in the Realize phase when addressing gaps identified during Fit-to-Standard. The SAP Activate Methodology Guide clarifies, "To-be process models are designed in the Realize phase to address delta requirements, while Fit-to-Standard focuses on validating standard processes."

\* Option C: Review Best Practices process flow Correct. Reviewing SAP Best Practices process flows, often using BPMN diagrams, is a key step in Fit-to-Standard workshops to compare customer requirements with standard processes. The SAP S/4HANA Cloud Implementation Guide explains, "Fit-to-Standard involves reviewing Best Practices process flows to validate their fit against customer needs, using tools like SAP Signavio Process Navigator."

\* Option D: Document integration requirements Incorrect. While integration requirements may be identified during Fit-to-Standard, documenting them is a separate activity, typically handled in SAP Cloud ALM post-workshop. The SAP S/4HANA Cloud Study Guidenotes, "Integration requirements are captured and documented after Fit-to-Standard workshops, not as a core step of the process." Extract from Official Documentation:

\* SAP S/4HANA Cloud Implementation Guide (SAP Help Portal, <https://help.sap.com>): "The Fit-to-Standard process in the Explore phase includes reviewing SAP Best Practices process flows and enabling customers on standard business processes to ensure alignment with the SAP S/4HANA Cloud solution."

\* SAP Activate Methodology Guide (SAP Community, <https://community.sap.com>): "Fit-to-Standard workshops focus on reviewing Best Practices process flows and enabling customers on standard processes, using the Starter system to validate requirements and minimize customizations." Additional Context:

The Fit-to-Standard process embodies the cloud mindset by prioritizing standard SAP Best Practices, reducing the need for customizations. By reviewing process flows and enabling customers, the process ensures stakeholders understand and commit to the standard solution, setting a solid foundation for the Realize phase.

This approach accelerates implementation and aligns with SAP's continuous innovation cycles.

SAP Community: SAP Activate Methodology Guide (<https://community.sap.com>).

SAP S/4HANA Cloud Study Guide: Details Fit-to-Standard steps.

SAP Signavio Documentation: Outlines process flow usage.

## NEW QUESTION # 75

Through which applications can you launch the Cloud Integration Automation Service (CIAS)? Note: There are 2 correct answers to this question.

- A. SAP Business Accelerator Hub
- B. SAP for Me
- C. SAP Cloud ALM
- D. SAP Signavio Process Navigator

**Answer: B,C**

## NEW QUESTION # 76

In the SAP Activate run phase the new system is monitored, maintained, and optimized to ensure it runs smoothly and efficiently. Which change management activity can only be realized in the run phase of the cloud implementation?

- A. Development of the user adoption strategy
- B. Measurement of actual user adoption metrics
- C. Conduction of a pulse check
- D. Mapping of SAP roles to employees

**Answer: B**

## NEW QUESTION # 77

.....

We all well know the status of SAP certification C-S4PM-2504 exams in the IT area is a pivotal position, but the key question is to be able to get SAP C-S4PM-2504 certification is not very simple. We know very clearly about the lack of high-quality and high accuracy exam materials online. Exam practice questions and answers PassReview provide for all people to participate in the IT industry certification exam supply all the necessary information. Besides, it can all the time provide what you want. Buying all our information can guarantee you to pass your first SAP Certification C-S4PM-2504 Exam.
