

Exam Workday-Prism-Analytics PDF - Updated Workday-Prism-Analytics Dumps

Download Valid Workday Prism Analytics Exam Dumps For Best Preparation

Exam : **Workday Prism Analytics**

Title : Workday Pro Prism
Analytics Exam

<https://www.passcert.com/Workday-Prism-Analytics.html>

1 / 3

P.S. Free 2026 Workday Workday-Prism-Analytics dumps are available on Google Drive shared by ITCertMagic:
https://drive.google.com/open?id=1g_yNNK1xPoHoMNsXMFpo9I51jo26K8jm

Our Workday-Prism-Analytics prep torrent boosts the highest standards of technical accuracy and only use certificated subject matter and experts. We provide the latest and accurate Workday Pro Prism Analytics Exam exam torrent to the client and the questions and the answers we provide are based on the real exam. We can promise to you the passing rate is high and about 98%-100%. Our Workday-Prism-Analytics test braindumps also boosts high hit rate and can stimulate the exam to let you have a good preparation for the exam. Our Workday-Prism-Analytics prep torrent boost the timing function and the content is easy to be understood and has been simplified the important information. Our Workday-Prism-Analytics test braindumps convey more important information with less amount of answers and questions and thus make the learning relaxed and efficient. If you fail in the exam we will refund you immediately. All Workday Pro Prism Analytics Exam exam torrent does a lot of help for you to pass the exam easily and successfully.

Because the Workday Pro Prism Analytics Exam (Workday-Prism-Analytics) test has a restricted time constraint, time management must be exercised to get success. Only with enough practice one can answer real Workday Workday-Prism-Analytics Exam Questions in a given amount of time. It has created three formats to aid Workday Workday-Prism-Analytics applicants in practicing and organizing their time for this aim.

2026 Workday Workday-Prism-Analytics: Perfect Exam Workday Pro Prism Analytics Exam PDF

The Workday-Prism-Analytics exam questions that ITCertMagic provide with you is compiled by professionals elaborately and boosts varied versions: PDF version, Soft version and APP version, which aimed to help you pass the Workday-Prism-Analytics exam by the method which is convenient for you. Our Workday-Prism-Analytics training braindump is not only cheaper than other dumps but also more effective. The high pass rate of our Workday-Prism-Analytics study materials has been approved by thousands of candidates, they recognized our website as only study tool to pass Workday-Prism-Analytics exam

Workday Pro Prism Analytics Exam Sample Questions (Q38-Q43):

NEW QUESTION # 38

You want to configure access to a published Prism data source to use it in reporting and discovery boards. What action must you take?

- A. Edit the data source security and select a domain.
- B. Share the dataset with appropriate users.
- C. Schedule the recurring publish process.
- D. Share the imported Workday report to provide users with access to the published Prism data source.

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In Workday Prism Analytics, configuring access to a published Prism data source for use in reporting and discovery boards requires managing its security settings. According to the official Workday Prism Analytics study path documents, the necessary action is to edit the data source security and select a domain (option A).

After a dataset is published as a Prism data source, access is controlled through security domains. By editing the data source security and assigning it to an appropriate security domain (e.g., a domain that grants access to specific user groups like report writers or analysts), you ensure that authorized users can access the data source for reporting and discovery boards. This aligns with Workday's configurable security framework, ensuring that only users with the appropriate permissions can view or use the data source.

The other options are incorrect:

* B. Share the dataset with appropriate users: Sharing the dataset itself does not grant access to the published Prism data source; access to the data source is controlled through its security settings, not the dataset's sharing settings.

* C. Share the imported Workday report to provide users with access to the published Prism data source:

Sharing an imported Workday report does not affect access to the Prism data source; the data source's security must be configured directly.

* D. Schedule the recurring publish process: Scheduling a recurring publish process ensures the data source is updated regularly, but it does not configure access for reporting or discovery boards.

Editing the data source security and selecting a domain is the critical step to enable access for reporting and discovery boards.

NEW QUESTION # 39

An HR analyst is tasked to create custom reports for their company's performance reviews. The analyst uses both Workday and Prism for data analysis. What Workday-calculated field functions would the analyst be able to build off of their Prism object?

- A. Lookup Related Value
- B. Extract Single Instance
- C. Lookup Field with Prompts
- D. Arithmetic Calculation

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In Workday Prism Analytics, when integrating with Workday reports, a Prism object (i.e., a published Prism data source) can be used as the basis for custom reports, and certain Workday-calculated field functions can be applied to it. According to the official Workday Prism Analytics study path documents, the Arithmetic Calculation function (option D) is a supported Workday-calculated

field function that can be built off a Prism object. This function allows the analyst to perform mathematical operations (e.g., addition, subtraction, multiplication) on numeric fields within the Prism data source, such as calculating a performance review score by combining multiple metrics. Since Prism data sources often contain pre-processed data, arithmetic calculations can be applied to enhance the data for reporting purposes.

The other options are not supported for Prism objects:

- * A. Extract Single Instance: This function is used to extract a single instance from a multi-instance field in Workday, but Prism objects typically contain single-instance fields after transformations (e.g., via an Explode stage), making this function inapplicable.
- * C. Lookup Related Value: This function retrieves related values from other Workday business objects, but Prism objects do not support direct lookups to Workday objects in this manner; such relationships must be pre-built in the Prism dataset.
- * D. Lookup Field with Prompts: This function involves interactive prompting, which is not supported for Prism objects in Workday reports, as Prism data sources are static snapshots of data.

The Arithmetic Calculation function provides the flexibility to perform numerical computations on Prism data, making it a suitable choice for enhancing performance review reports.

Supported Calculated Field Functions for Prism Data Sources

NEW QUESTION # 40

When joining datasets, what items must match?

- A. The field names for the Match Row fields.
- **B. The field types for the Match Row fields.**
- C. The level of detail in each dataset.
- D. The number of rows in each dataset.

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In Workday Prism Analytics, joining datasets requires that the fields used in the join condition (Match Row fields) are compatible to ensure accurate matching. According to the official Workday Prism Analytics study path documents, the field types for the Match Row fields must match (option A). For example, if the join condition is based on an Employee ID field, the field type (e.g., Text or Numeric) must be the same in both datasets. Mismatched field types (e.g., Text in one dataset and Numeric in another) can lead to join failures or incorrect results, as Prism cannot reliably compare values of different types. This often requires using a Manage Fields stage to align field types before the join.

The other options are incorrect:

* B. The number of rows in each dataset: The number of rows does not need to match; joins can handle datasets of different sizes, depending on the join type (e.g., Left Outer Join).

* C. The level of detail in each dataset: The level of detail (granularity) does not need to match; joins can combine datasets with different levels of detail as long as the Match Row fields are compatible.

* D. The field names for the Match Row fields: The field names do not need to be identical; the join condition maps fields between datasets, so different names can be used as long as the types and values are compatible.

Ensuring that the field types of the Match Row fields are the same is critical for a successful join operation in Prism Analytics.

NEW QUESTION # 41

While viewing your lineage, you realize you have forgotten to add a description to some of your derived datasets. From the lineage, you double-click on a dataset to view the dataset details. What is the next step to add the missing descriptions?

- A. Select the pencil icon next to the Import stage to update the description.
- B. Select the pencil icon next to the dataset name and Edit Transformations.
- **C. Select Related Actions next to the dataset name and Edit Transformations.**

- D. Select Add Field from the dataset details to create a description.

Answer: C

Explanation:

To add or update the description of a derived dataset in Workday Prism Analytics, you should access the Edit Dataset Transformations task. This can be done by selecting the Related Actions next to the dataset name and choosing Edit Transformations. This method allows you to modify various aspects of the dataset, including its description.

This process is outlined in the Workday Prism Analytics User Guide, which states:

"If you have permission to edit a dataset, you can access the Edit Dataset Transformations task using these methods:

- * Right-click the dataset name on the Data Catalog report and select Edit Transformations.
- * Select Edit Transformations from the Quick Actions on the View Dataset Details report.
- * Access the Edit Dataset task and select the dataset name that you want to edit." Once in the Edit Dataset Transformations task, you can update the dataset's description by clicking on the configuration icon (often represented as a gear or pencil icon) and editing the description field.

NEW QUESTION # 42

You want to delete a Prism data source, but you are unable to complete the dataset unpublish. You have deleted the Report Writer reports. What else must you delete, if present?

- A. Upstream tables
- B. Published rows
- C. Upstream datasets
- **D. Discovery board visualizations**

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In Workday Prism Analytics, unpublishing a dataset to delete a Prism data source requires removing all dependencies that reference the data source. According to the official Workday Prism Analytics study path documents, if you have already deleted Report Writer reports but are still unable to unpublish the dataset, you must also delete any discovery board visualizations that reference the Prism data source (option C). Discovery boards in Workday allow users to create visualizations based on Prism data sources, and these visualizations create a dependency on the data source. If such visualizations exist, the system prevents the dataset from being unpublished until they are removed, ensuring that no downstream dependencies are broken.

The other options are incorrect:

- * A. Upstream tables: Upstream tables are the source of data for the dataset, but they are not dependencies of the published data source and do not need to be deleted to unpublish the dataset.
- * B. Published rows: Published rows are part of the data source itself and are removed when the dataset is unpublished; they are not a separate dependency to delete.
- * D. Upstream datasets: Upstream datasets may feed into the dataset being unpublished, but they are not dependencies of the published data source and do not prevent unpublishing.

Deleting discovery board visualizations ensures all dependencies are cleared, allowing the dataset to be unpublished and the Prism data source to be deleted.

NEW QUESTION # 43

.....

We are professional in this career to help all our worthy customers to obtain the Workday-Prism-Analytics certification for years. You can get prepared with our Workday-Prism-Analytics exam materials only for 20 to 30 hours before you go to attend your exam. we can claim that you will achieve guaranteed success with our Workday-Prism-Analytics Study Guide for that our high pass rate is unmatched 98% to 100%. And all the warm feedback from our clients proved our strength, you can totally rely on us with our Workday-Prism-Analytics practice quiz!

Updated Workday-Prism-Analytics Dumps: <https://www.itcertmagic.com/Workday/real-Workday-Prism-Analytics-exam-prep-dumps.html>

You can go for the free demos of the Workday-Prism-Analytics learning braindumps and make sure that the quality of our Workday-Prism-Analytics exam questions and answers which can serve you the best, Workday Exam Workday-Prism-Analytics PDF You can download our free demos and get to know synoptic outline before buying, Our Workday-Prism-Analytics exam dumps are required because people want to get succeed in IT field by clearing the certification exam, Workday Exam Workday-Prism-Analytics PDF Mac, Windows, iOS, Android, and Linux support it.

Starting and Closing a Universal or Modern UI App, Coverage includes: Workday-Prism-Analytics The core concepts of closed loop lifecycle planning and transitioning to lifecycle management for the first time.

You can go for the free demos of the Workday-Prism-Analytics learning braindumps and make sure that the quality of our Workday-Prism-Analytics exam questions and answers which can serve you the best.

Workday-Prism-Analytics - High-quality Exam Workday Pro Prism Analytics Exam PDF

You can download our free demos and get to know synoptic outline before buying, Our Workday-Prism-Analytics exam dumps are required because people want to get succeed in IT field by clearing the certification exam.

Mac, Windows, iOS, Android, and Linux support it, Our Workday Workday-Prism-Analytics exam dumps and answers have been verified by Workday certified professionals in the area.
