Salesforce Certified Nonprofit Cloud Consultant Exam Sample Questions (Q60-Q65):

NEW QUESTION # 60

An employee has been terminated at a nonprofit. The nonprofit's system admin immediately disabled the former employee as a Salesforce user but is concerned the employee may have exported exposed login credentials to multiple external systems before departing.

Which feature should the consultant recommend to protect this data in the future?

- A. Named Credentials
- B. Individual Object
- C. Organization-wide Defaults
- **D. Shield Platform Encryption**

Answer: D

NEW QUESTION # 61

A nonprofit needs more insight into why some corporate sponsorships are closing and why others are lost.

They want to evaluate information including pipeline value, number of opportunities, Pardot score, win/lost percentage, stage value, and a table of opportunities. The system admin wants to deploy a solution quickly.

Which solution should a consultant recommend?

- A. Salesforce Reports
- **B. B28 Marketing Analytics**
- C. NPSP Advanced Mapping
- D. Insights Platform Data Integrity

Answer: B

Explanation:

To quickly deploy a solution that provides insights into corporate sponsorships, including pipeline value, number of opportunities, Pardot score, win/loss percentage, stage value, and a table of opportunities, the consultant should recommend B28 Marketing Analytics. Here's why:

* B28 Marketing Analytics:

* This analytics solution is designed to provide deep insights into marketing performance, including detailed views of pipeline metrics and opportunity analysis.

* It integrates with Salesforce and Pardot, offering out-of-the-box dashboards and reports that can be quickly deployed.

* The tool enables the nonprofit to gain actionable insights into why certain sponsorships are closing or being lost, facilitating data-driven decision-making.

NEW QUESTION # 62

A consultant is working on a data migration to NPSP that includes tens of millions of records across many objects. The migration needs to take place over a weekend to minimize system downtime.

What should the consultant recommend?

- A. NPSP DataImport
- B. SOAP API
- C. Data Import Wizard
- **D. Bulk API**

Answer: D

NEW QUESTION # 63

A nonprofit conducts background checks on all prospective volunteers. Only the volunteer manager and executive director should be able to access the fields related to background checks on the Contact object.

How should the consultant configure the security settings?

- A. Create a Sharing Rule that grants the volunteer manager and executive director access to the background check fields.
- **B. Create a Permission Set that grants access to those fields and assign it to the volunteer manager and executive director.**

- C. Create a Role for the volunteer manager under the executive director's Role and grant read, write access to those fields in the volunteer manager's role.
- D. Assign the volunteer manager and executive director to a Public Group and grant the Public Group access to those fields.

Answer: B

Explanation:

To restrict access to fields related to background checks on the Contact object so that only the volunteer manager and executive director can access them, the consultant should:

* Create a Permission Set:

* A permission set is a collection of settings and permissions that gives users access to various tools and functions.

* Creating a permission set that includes access to the specific fields related to background checks allows for precise control over who can view and edit these fields.

* Grant Field-Level Security:

* Within the permission set, set field-level security to ensure only the specified users can view and edit the background check fields.

* This ensures that sensitive information is only accessible to authorized personnel.

* Assign the Permission Set:

* Assign the permission set to the volunteer manager and executive director.

* This approach provides flexibility and security, ensuring that only the designated users have the necessary access without altering the overall role hierarchy or creating unnecessary sharing rules.

Salesforce documentation on Permission Sets: [Permission Sets](#)

These solutions ensure efficient and secure handling of data and permissions within the Salesforce Nonprofit Cloud.

NEW QUESTION # 64

A nonprofit admin needs to import lists of Contacts into Salesforce Campaigns regularly from CSV files using the NPSP Data Import tool.

What should the consultant consider when setting up this process for the nonprofit?

Choose 2 answers

- A. NPSP Data Import Dry Run will validate Campaign Member Status.
- B. Respect Duplicate Matching Rules' should be checked in NPSP Settings.
- C. Existing Campaigns are matched by exact Name.
- D. NPSP Data Import will automatically create the Campaign Member with the default Member Status.

Answer: C,D

Explanation:

When setting up the process for importing lists of Contacts into Salesforce Campaigns using the NPSP Data Import tool, it is essential to consider how Campaign Members are created and matched.

Key Considerations:

Automatic Campaign Member Creation (A):

The NPSP Data Import tool will automatically create Campaign Member records for the imported Contacts with the default Member Status. This helps streamline the process of adding members to campaigns.

Exact Name Matching (D):

Existing Campaigns in Salesforce are matched by exact Name. This means that the names in the CSV files must match the names of the Campaigns in Salesforce exactly for the import process to associate Contacts with the correct Campaigns.

Steps to Set Up:

Prepare CSV Files:

Ensure that the Campaign names in the CSV files exactly match the names of the Campaigns in Salesforce.

Include all necessary fields to map Contacts to Campaign Members.

Configure NPSP Data Import:

Navigate to NPSP Settings -> Data Import.

Ensure the settings align with the import requirements, including handling duplicates and respecting duplicate matching rules if enabled.

Perform Dry Run:

Use the NPSP Data Import Dry Run feature to validate the import configuration and ensure that the Campaign Member Status and other settings are correctly applied.
