NEW QUESTION # 229

Which metric can you use to evaluate a classification model?

- A. coefficient of determination (R²)
- **B. true positive rate**
- C. root mean squared error (RMSE)
- D. mean absolute error (MAE)

Answer: B

Explanation:

Explanation

What does a good model look like?

An ROC curve that approaches the top left corner with 100% true positive rate and 0% false positive rate will be the best model. A

random model would display as a flat line from the bottom left to the top right corner.
Worse than random would dip below the $y=x$ line.

NEW QUESTION # 231

You use drones to identify where weeds grow between rows of crops to send an instruction for the removal of the weeds. This is an example of which type of computer vision?

- A. optical character recognition (OCR)
- B. scene segmentation
- C. object detection

Answer: C

Explanation:

Explanation

Object detection is similar to tagging, but the API returns the bounding box coordinates for each tag applied.

For example, if an image contains a dog, cat and person, the Detect operation will list those objects together with their coordinates in the image.

NEW QUESTION # 232

To complete the sentence, select the appropriate option in the answer area.

The handling of unusual or missing values provided to an AI system is a consideration for the Microsoft principle for responsible AI.

- inclusiveness
- privacy and security
- reliability and safety
- transparency

Answer:

Explanation:

Explanation:

Privacy and security.

As AI becomes more prevalent, protecting privacy and securing important personal and business information is becoming more critical and complex. With AI, privacy and data security issues require especially close attention because access to data is essential for AI systems to make accurate and informed predictions and decisions about people. AI systems must comply with privacy laws that require transparency about the collection, use, and storage of data and mandate that consumers have appropriate controls to choose how their data is used. At Microsoft, we are continuing to research privacy and security breakthroughs (see next unit) and invest in robust compliance processes to ensure that data collected and used by our AI systems is handled responsibly.
